

2026 / 2027

PRODUCT COLLECTION

A person is standing on a snowy slope, holding a ski. The background is dark, and the snow is bright white. The text is overlaid on the image.

SINCE 1923

***THE TECH IS
GERMAN.
THE STOKE IS
WORLDWIDE.***

A stylized, layered illustration of a mountain range at sunset. The mountains are depicted in various shades of purple and blue, with a warm orange and yellow glow from the setting sun on the right side. The overall style is modern and graphic.

STATUS 2025

SUSTAINABILITY FACTS

COMMITMENT TO RESPONSIBILITY

As the last major ski manufacturer in Germany, we have been working for many years to make our entire development and production process more sustainable while living up to our corporate responsibility. As part of the Elevate Outdoor Collective, we have also committed to the Science Based Targets, because as a winter sports brand we naturally see ourselves as having a special responsibility in this regard. That is why a positive CO2 balance is of great importance to us, as is the validation of our targets through the SBTi. Wherever possible, we apply these validated insights across all four areas of our company - product, production, sales, and our brand family, which includes employees, customers, and the community.

TOTAL EMISSIONS

Völkl produces the majority of its skis (81% in 2024) in Straubing, Germany. 19% are produced at the Elevate factory in Kaitai, China.

The emissions shown here refer to the Straubing factory and the distribution centers in Bogen and Parkstetten.

Emissions from the production site in China are included in the calculation of the EOC's carbon footprint and are subject to the same reduction targets.

CARBON FOOTPRINT (SCOPE 1-3)

FOOTPRINT OF PRODUCTS (SCOPE 3)

TOGETHER TO ZERO CO₂: SUSTAINABILITY GOALS OF VÖLKL & EOC

SBI NEAR TERM
TARGET

2030

- 50 % CO₂

EOC INTERNAL
TARGET

2040

- 80 % CO₂

SBTI NET ZERO
TARGET

2050

- 100 % CO₂

The targets cover Scope 1–3

Multiradius concepts for maximum versatility for various snow conditions, both on-piste and off-piste, with increased stability on hard surfaces and improved performance in soft snow.

3D RADIUS

R1

Usage of long radii in the tip of the ski for big turns and high speed
// easy steering and maneuverability
// disruption resistant at the tip
// no radius limitation and stable at high speed

R2

Usage of shorter radius in the center for short turns and lower speed
// extremely easy to initiate short turns
// strikingly agile
// effortless and smooth in short turns

R3

Usage of long radii in the tail of the ski for big turns and high speed
// no radius limitation and ease of turn exit
// easy steering and maneuverability
// easy to slide the ski and release the tail

4 RADIUS DRIVE

R1 **SUPPORT**

For improved float in deep snow and precise initiation into the turn on groomers

R2 **RESILIENCE**

Open radius for catch-free skiing and variability while building up the turn

R3 **FUN**

Tight under-foot radius for agility in short turns

R4 **POP**

Open tail radius for smooth and easy release of the turn
