PARTY PLATTER

Requested by our Team, we’ve redesigned the Party Platter from the ground up with all-terrain enjoyment on the mind. As a brand, it was important for us to stay true to the personality and DNA of the Party Platter; we just wanted to evolve on this model as snowboarding as a whole has continued to evolve. In our re-tink of the Party Platter, we’ve updated the Baseline™ to our Combination Camber profile to ensure more energy in and out of turns without sacrificing the loose and surfy feel that the Party Platter is known for. This, coupled with the Ollie Bar™, gives the Party Platter good snap without feeling rigid and dull.

The second step of the process was to extend the running length of the Party Platter to ensure that more edge was on the snow when turning, resulting in a more stable ride. We added volume to the tail to help give some substance to those slashes and aid in riding switch. Lastly, we’ve added more sizes to accommodate riders on the smaller side, starting as small as 138cm. For a shorter, wider board that strikes the balance between performance and playfulness, the Party Platter has all of the benefits needed to bring a whole new dimension for riding and turning your snowboard.

The rethink of the Party Platter helps to evolve with snowboarding’s non-stop progression.
The Manifest is for riders putting their gear through the harshest conditions, weather or not.

An instant Team favorite, the Manifest is fluent in versatility and is fully at home in terrain parks, groomed runs, or anything in between. Designed to ensure backcountry snowboarding and the freeride category, the Manifest hits the right note of some of the best terrain parkers and backcountry riders, making it agile, snappy and powerful. To get us on the right track, we consulted our most demanding Team riders - Curtis Ciszek, Matt Belzile, Jody Wachniak, and Johnny Brady. They spoke and we listened, which helped us solidify the Manifest as a rugged, do-it-all snowboard that surmounts whatever you put in front of it with unparalleled expertise.

The Manifest is a tribute to fallen K2 Snowboarding rider Aaron Robinson in both name and personality. Dynamic, fun-loving, and progressive, the Manifest has the freeride hallmarks right on its heel.
We know that it might sound a bit cliché, but the Cold Shoulder is truly the one board that can do it all. A Directional Camber Baseline™ helps make the Cold Shoulder feel lively and energetic in and out of turns and stable on hard pack. A setback stance and a slightly tapered outline aid in easy turn initiation and effortless float in powder. Inside, we’ve added our women’s-specific Rhythm Core™ and our Integrated Carbon Glass™ to ensure that this all-terrain ripper is ready to take on anything that is put in front of it.

First formed in 2003, the Alliance™ is the most established women’s feedback and design group in the industry. 2019 marks a major turning point in the energy and direction of the Alliance™ with the addition of new members. This new energy can be seen in each and every one of our women’s products.

Designed to be a fully-fledged all-mountain explorer specifically for women.
When creating the Medium, we knew that we needed to reach out to Russ Pope. Pope’s artwork is the perfect complement to Jake’s style and snowboarding, as well as K2 Snowboarding’s aesthetic. The product of the right amounts of raw talent, hard work, and attention to detail, hailing from Central California and currently calling New England home, Pope has been representing the world through art and snowboarding since childhood. Learn more about Pope’s artwork at https://www.russpope.com.

The epitome of premium freestyle, the Medium is built to live up to Jake Kuzyk’s standards.
**SIMPLE PLEASURES**

The Simple Pleasures was created for those that love the feeling of a long powder turn and setting rail on a groomed run. A Directional Camber Baseline™ and tapered shape works in harmony with a wider profile, making it feel right at home floating through the deep stuff or weaving through trees.

The updated Party Platter features a longer running length and more volume in the tail than its predecessor. Requested and tested by our Team, we’ve added a little bit of snap by coupling our Ollie Bar™ with a Directional Combination Camber Baseline™ and made switch riding more friendly by reducing taper.

### Medium

We worked with Jake Kuzyk to construct a snowboard that lives up to his standards - so we built the Medium. Packed with carbon to be snappy, a Twin Cambered Baseline™ to remain nimble, and our Inked Glass™ topsheet to make the board lightweight and durable, the Medium is the epitome of premium freestyle.

EIGHTY SEVEN

A board that truly embodies the spirit of K2 Snowboarding, the Eighty Seven features a Bambooyah™ core, carbon fiber additions, and a tapered profile. A wider waist width and a tight sidecut make the Eighty Seven smooth, snappy, stable, and fun as hell.

BOTTLE ROCKET

Built on a mid-wide outline with a long sidecut radius, the Bottle Rocket is a team favorite for street missions, park laps, and those slushy summer days on the glacier. A predictable Twin Rocker Baseline™ makes spinning and pressing a breeze, while carbon additions give the Bottle Rocket the perfect amount of snap.
### Broadcast

The one board to build your quiver around. Carefully calculated in design, this is the perfect tool if you’re looking for a go-anywhere, do-anything snowboard. Versatile in shape and construction, the Broadcast boasts a comfortable sidewall, hard sintered base, and tip to tail carbon stringers for stability.

### Afterblack

Feeling just as comfortable pressing a rail as it does tracking into the biggest jump in the park, the Afterblack quickly became THE choice for our Team pushing the freestyle envelope. A sintered base, snappy core, and Carbon DartWick™ all work in harmony to provide snap while keeping a playful feel.

### Raygun

With a new shape for 2019, we aimed to put a modern take on a classic outline. Designed to be forgiving and fun, the Raygun doesn’t skimp on performance either: it comes packed with our ICG™ 10 Carbon Glass - integrated carbon stringers running the length of the board for added pop and stability without any rigidity.

### Raygun Pop

We took the Raygun construction, updated the shape and complemented it with a Directional Camber Baseline™, providing riders with increased control and elevated confidence. Tip to tail carbon stringers aid in pop and stability, and a low maintenance base makes this board ready to rip out of the box.

The K2 Outline is a stable medium flexing all-mountain directional twin with a predictable sidecut and Directional Rocker Baseline™. Designed to both float in powder and hold its edge in the choppiest of conditions, our premiere women’s model is packed full of a laundry list of next-level tech.

Inside our women’s collection you will find female-specific shapes, cores, and sidecut profiles to optimize performance and comfort. The K2 Women’s Alliance™ approves and we wouldn’t have it any other way.

OUTLINE

WILDHEART

Looking for a committed powder-hungry soulmate? Perfect. A tight sidecut radius, tapered shape, and a Directional Camber Baseline™ gives the K2 Wildheart the ability to excel in powder, while it’s women’s specific Rhythm Core™ and carbon additives make this board lively and fun when it gets on trail.

The K2 Cold Shoulder is a slightly tapered, directional board that is designed to navigate the resort effortlessly. Integrated carbon stringers and a Directional Camber Baseline™ help with stability, while a little bit of rocker in the nose helps with float when it gets a little deeper.

MEN’S/BOOTS
Simply put, the K2 Holgate was built for the riders that are tough on their gear and demand response when they are ready to charge. In order to welcome the Holgate to family, we packed it full of an endless list of features; Intuition® SpaceHeater™ liner, BOA® Conda™ heel retention system, Ends™ 2.0, and a beefy Vibram® V4 outsole.

**KEY FEATURES**

- H3 BOA® Coiler Lacing
- Rubber Reinforced Articulating Cuff Upper with Ends™ 2.0
- Intuition® Pro Foam 3D Liner with SpaceHeater™
- BOA® Conda™ Liner Lacing
- 3D Dual Density Footbed
- Vibram® V4 Outsole with Harshmellow™

6-13 (½ Sizes 6, 7, 8, 9, 10, 11)

The K2 Renin blends a classic silhouette, technology that matters, and a fit that wins time and time again. Our BOA® Mobility Conda™ is wrapped around an Intuition® Pro Foam 3D Liner and works in harmony with a softer Flex Zone upper. We added a Vibram® RollSole to give the Renin increased lateral mobility to help channel surf style vibes and ensure good times.

**KEY FEATURES**

- H3 BOA® Coiler Lacing
- Rubber Reinforced Flex Zone Upper with HDR Premium Synthetics
- Intuition® Pro Foam 3D Liner
- BOA® Mobility Conda™ Liner Lacing
- 3D Dual Density Footbed
- Vibram® RollSole Outsole with Harshmellow™

6-13 (½ Sizes 6, 7, 8, 9, 10, 11)

We created the K2 Ender to bring a durable, rugged premium all-mountain freestyle boot to the market. The Vibram® V4 Outsole with Harshmellow™ grips for hiking and softens impact, the Intuition® Pro Foam 3D Liner and BOA® Mobility Conda™ provide an unrivaled fit, and K2’s ™ 2.0 construction makes the Ender ready for the long haul.

**KEY FEATURES**

- Traditional Lacing
- Rubber Reinforced Articulating Cuff Upper with Ends™ 2.0
- Intuition® Pro Foam 3D Liner
- BOA® Mobility Conda™ Liner Lacing
- 3D Dual Density Footbed

MINI TURBO

The first step toward linking turns, and the first step toward on-snow independence. We’ve aimed to help speed up progression by building the K2 Mini Turbo snowboard using our Catch-Free Rocker Baseline™ and Noodle™ construction, giving groms the ability to flex their boards just like older rippers.

MINI TURBO BINDING

The first step toward on-snow independence is linking turns, and we designed the K2 Lil Kat snowboard to make progression fun and easy. Built using our Catch-Free Rocker Baseline™ and Noodle™ construction, we’ve given girls the ability to flex their boards and engage sidecuts just like the older girls.

**CONSTRUCTIONS**

**HYBRID**

This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting and increased durability.

**IN-MOLD**

In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. This result in a construction so light you’ll forget it’s even there.

**HARD SHELL**

Hard-Shell helmets are built to last and will look good no matter how many trips they make it and out of your gear bag. Hard-Shell helmets protect you from impact forces. The lightweight EPS foam bonded to an injection molded and durable ABS shell.

**LINER SYSTEMS**

**CONVERTIBLE FULL WRAP LINER**

Same coverage as a full-wrap but ready to pop out, housing the fit system and original padding to accommodate warm days and seamless in the helmet under the helmet.

**FULL WRAP LINER**

A comfortable, washable, full-coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates fit and audio systems.

**TECH FORM LINER**

Compression formed, precise fit liner with removable ear pad and neck roll for a convertible customized fit.

**BOA**

At the heart of the Fit System, BOA delivers unparalleled comfort around your entire head. An intricate web design results in 360 degrees of pressure distribution for a secure and snug fit that you customize with.

**K2DIALED**

The K2Dialed Fit System creates custom fitting helmet no matter what your head shape. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.

**DUAL ACTIVE**

Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.

**PASSIVE CHANNEL VENTING**

Channels on the inside surface of the EPS direct air flow between your head and the helmet, removing moisture and excess heat for all day comfort.

**ACTIVE MATRIX**

Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the touch of a finger.

**DESIGN**

**VENTILATION**

With multiple ventilation solutions, K2 helmets are designed to keep you cool when the sun is shining, and warm when it’s cold. It’s science.

**COMFORT**

Multiple liners, an unparalleled fit system and some of the best foam varieties in the industry give K2 helmets a custom comfortable feel on the head.

**CUSTOMIZATION**

Removable ear pads, liners, and multiple color way combos and designs. K2 has something to fit your style.

**TECHNOLOGY**

**CERTIFICATION**

BIKE CERTIFIED

Certified by North American bicycle helmet safety standard and European bicycle and skateboard helmet safety standard on certain models.

**MAGNA SNAP**

Magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don’t have to fumble for.

**REMOVABLE EAR PADS**

Ability to easily remove ear pads for reduced bulk while retaining the fit system.

**REMOVABLE GOOGLE AND HEADLAMP CLIPS**

Customized fit for toucans, on-the-go versatility.

WARRANTY
We stand by our snowboards. Unless otherwise stated, K2 places a three (3) year warranty on all 2019 boards, guaranteeing that they are free of defects in regards to materials or craftsmanship.

3 YEAR WARRANTY
All K2 Snowboards come with a three (3) year warranty against manufacturer’s defects.

5 YEAR WARRANTY
All snowboards featuring our Bambooyah™ Core come with a five (5) year warranty against manufacturer’s defects.

WARRANTY
All K2 Snowboards come with a three (3) year warranty against manufacturer’s defects.

PERFORMANCE & FEEL
The materials and technology found on the inside of each one of our snowboards affect the personality and performance. When it comes to choosing the right snowboard for you, it is important to take height, weight, stability, power transfer, sidecut, flex, and more into consideration. Flex is often seen as the most important - as it will dictate how you are able to control your board on snow. Simply put, our flex spectrum runs from PLAYFUL to PRECISE.

PLAYFUL
In general, more PLAYFUL boards are great for learning how to link turns, press rails, and overall board handling.

PRECISE
In general, more PRECISE boards are often more stable at speed, have more pop, and have more energy than their playful counterparts.

BASELINE™
Simply put, Baseline™ is the line that the steel edge makes on the bottom of the snowboard. This “line” can be described as Rocker, Camber, Flat, or any combination of these. K2 offers multiple Baseline™ options, hand picked by model and tailored to work in harmony with the materials and core profile to ensure the best possible riding experience.

COMBINATION CAMBER BASELINE™
The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both: the pop and precision of camber, and the float and predictability of rocker. Available in Directional and Twin Combinations.

DIRECTIONAL ROCKER BASELINE™
An all-purpose profile designed to be the perfect companion for the all-terrain snowboarder. Directional Rocker Baseline™ has a medium-rise in the tip and a lower rise in the tail, allowing for effortless turns on hardpack and ample float in soft snow and crud.

DIRECTIONAL CAMBER BASELINE™
Directional Camber Baseline™ | Response? We got that. Our Directional Camber Baseline™ is known for it’s pop and response, and is favored by those looking for a little more precision in their ride. A little bit of rise in the tip and tail allow for effortless turns on hardpack and ample float in soft snow and crud.

TWIN CAMBER BASELINE™
A versatile twin-rocker design built to dominate any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel without sacrificing pop and response.

FREESTYLE ROCKER BASELINE™
A versatile twin rocker design built to take on any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel while maintaining instant response and pop.

CATCH-FREE ROCKER BASELINE™
By bringing the contact points out of the snow, this beginner-friendly design ensures linking turns without a catch. This small amount of rocker in the tip and tail aids in more confidence throughout the learning curve and unlocks faster progression on all terrain.

TWEEND™
We’ve extended the Baseline™ rocker all the way out to the absolute ends of the board, and for good reason! This unlocks new ride-able surface area and gives you a bigger, more stable platform to press, float, and land on.

RAILS/PARK
Boxes, rail, boxes, and jibs on-hill or on the streets.

JUMPS/PIPE
Kickers, hips, transitions, and stunt ditches.

GROOMERS
Fresh corduroy.

POWDER
That deep, deep white goodness.
**SHAPES, CONSTRUCTIONS, AND K2 EXCLUSIVES**

**HYBRITECH® CONSTRUCTION**

Hybritech® is the most efficient way to make a snowboard without sacrificing performance. Fea-
turing sideboards along the running surface that flows into the tip and tail, reducing swing-weight,.
optimizing turn initiation, and providing unrivaled durability.

**BASES**

**CARBON INFUSED 5500 SINTERED BASE**

Fast, light, and strong. Our Carbon infused 5500 Sintered base is the cream of the crop. By
adding carbon to a sintered base, we’ve increased wear resistance and decreased drag for a
faster, snickered ride.

**SINTERED 4000 BASE**

Our Sintered 4000 base additive was deep into the material for relentless glide and
unrivaled durability.

**CORES / LUMBER**

**BAMBOOYAH™ BLENDED CORE**

Taking influence from skateboard manufacturing, our Bambooyah™ Blended cores are stronger
than fool and core packed complete with a five year warranty.

**BAP CORE**

We’ve blended those three species of renewable timbers to assemble a core that’s strong, lighteweight,
and designed to enhance damping without the addition of other materials.

**CORE ADDITIVE**

**OLLIE BAR™**

Built in place in a pre-laid down carton shape and placed between the binding inserts, the Ollie
Bar lets the honeycomb add to the core without adding unnecessary rigidity.

**CARBON TORQUE FORKS™**

Adding carbon that extends from the inserts to the contact point allows for an extra responsive
and fast edge to edge transitions and keeping you in control at times of need.

**GLASS TECHNOLOGY**

**ICG™ CARBON GLASS**

Integrating tip to tail carbon fiber stringers into fiberglass layups ensures a smooth power
release in and out of turns while increasing pop, flexibility, and longevity of the snowboard
without adding unnecessary rigidity. We offer ICG™ Glass in two variations: ICG™ 10 Biax and
ICG™ 20 Triax.

**INKED GLASS™**

This lightest way to get a top quality graphic on a snowboard. This process saves the graphic
into digitally into the fiberglass in one seamless step that increases durability and removes the
need for an additional plastic topcoat.

**VOLUME SHIFT™**

We’ve moved volume from the tips and tail of traditional snowboard shapes and placed it underfoot where it can be better controlled. This makes a wider, shorter design that
maintains the same float and stability of a traditional board, but increases mobility and
maneuverability. More starting and better turns in the trees are now a reality.

**EXTRUDED 2000 BASE**

Our Extruded 2000 base delivers a consistent glide and is easy to maintain and repair.

</tbody>
</table>

**RHYTHM CORE**

A single species of wood ensures a proven flex, durability, and snap.

**CARBON DARKWEB™**

A carbon fiber lay-up that aids in energy transfer and stability, speeding up edge-to-edge
transitions and keeping you in control in times of need.

**HONEYKOMB™**

A urethane-skinned Honeykomb™ additive aids in bonding strength and increases
durability.

**CARBON-INFUSED 5500 SINTERED BASE**

Fast, light, and strong. Our Carbon-infused 5500 Sintered base is the cream of the crop. By
adding carbon to a sintered base, we’ve increased wear resistance and decreased drag for a
faster, snickered ride.

**BAMBOOYAH™ BLENDED CORE**

Taking influence from skateboard manufacturing, our Bambooyah™ Blended cores are stronger
than fool and core packed complete with a five year warranty.

**BAP CORE**

We’ve blended those three species of renewable timbers to assemble a core that’s strong, lighteweight,
and designed to enhance damping without the addition of other materials.

**CORE ADDITIVE**

**OLLIE BAR™**

Built in place in a pre-laid down carton shape and placed between the binding inserts, the Ollie
Bar lets the honeycomb add to the core without adding unnecessary rigidity.

**CARBON TORQUE FORKS™**

Adding carbon that extends from the inserts to the contact point allows for an extra responsive
and stable ride.

**GLASS TECHNOLOGY**

**ICG™ CARBON GLASS**

Integrating tip to tail carbon fiber stringers into fiberglass layups ensures a smooth power
release in and out of turns while increasing pop, flexibility, and longevity of the snowboard
without adding unnecessary rigidity. We offer ICG™ Glass in two variations: ICG™ 10 Biax and
ICG™ 20 Triax.

**INKED GLASS™**

This lightest way to get a top quality graphic on a snowboard. This process saves the graphic
into digitally into the fiberglass in one seamless step that increases durability and removes the
need for an additional plastic topcoat.

**VOLUME SHIFT™**

We’ve moved volume from the tips and tail of traditional snowboard shapes and placed it underfoot where it can be better controlled. This makes a wider, shorter design that
maintains the same float and stability of a traditional board, but increases mobility and
maneuverability. More starting and better turns in the trees are now a reality.

**EXTRUDED 2000 BASE**

Our Extruded 2000 base delivers a consistent glide and is easy to maintain and repair.

K2 warrants this product to be free from defects in materials and workmanship for a period of (1) year from the original date of purchase at retail.

100% TOOL-LESS ADJUSTMENTS
K2 warrants this product to be free from defects in materials and workmanship for a period of (1) year from the original date of purchase at retail.

CHASSIS
SPLITBOARD-SPECIFIC ALUMINUM
Based off a tried and true splitboard baseplate, this chassis works with a splitboard puck-mount system and features an easy-to-use rail and hook system for the interchange between walk and ride modes.

PROFUSION™
Simple, tough, and lightweight, the Profusion™ chassis is the go-to standard in the K2 binding collection. On-board tool-less power ramp and toe strap adjustments are paired with multiple ankle strap mount points to help dial in perfect fit and ideal power transfer.

TRIPOD™
A way to rethink the traditional binding baseplate design. Designed to act as the most biomechanically efficient chassis possible, the TriPod™ baseplate features power transmission pods that coincide with the three points of contact of the foot and is designed to flex the way that the foot is naturally meant to.

HIGHBACKS
GAP ERASER™
Gap Eraser™ technology completely eliminates all gapping between boot, highback, and heelcup, creating an even stronger bond between you and your snowboard.

TWEAKBACK™
Tweakback™ highbacks are constructed using an injected urethane that is formulated to perform in cold temperatures and allow you to flex the highback to its limit without any distortion.

ALL-TERRAIN
The most durable temperature resistant highback shapes that make every K2 binding model perform best for its designed purpose. Available in both Nylon and Polycarbonate materials.

RATCHETS
NEW! ULTRA RATCHET™
Lightweight hairpin jaw aluminum ratchet constructed from T6061 Aluminum.

HELLA RATCHET™
Large release lever for super easy entry and resin composite construction for lightweight durability.

EZ FEED RATCHETS™
A wider, tapered ratchet opening allows for the easiest of entry.

FOOTBED & DISC
3° CANTED FOOTBED
Canted 3° to match your natural leg position during riding. More support to the outside of the foot provides improved control while reducing fatigue.

ADJUSTABLE POWER RAMP
Tool-less adjustment design built right into the integrated, full coverage, seamless EVA footbed.

**K2 & BOA® PARTNERSHIP**

**THE ORIGINAL BOA® BOOT COMPANY**

Introducing BOA® lacing systems to the snowboard market well over a decade ago, K2 believes that now, more than ever, BOA® is a standout advantage.

**SHELL LACING**

**FOCUS AND ZONAL BOA®**
A two reel BOA® system that allows for the upper and lower zones of the boot to be tightened independently.

**BOA® AND BOA® COILER**
A cable and reel based lacing system that creates even tension and easy lacing operation. This system features low friction guides for more tightening. BOA® Coiler works to automatically retract lace slack on your boots stop twice and ease.

**TRADITIONAL LACE**
No wires, reels, or pulleys needed. Our braided textile laces offer a tried and true feel and customizable fit.

**LACE LOCK**
Positioned at the transition to the instep to give you a quick and easy ability to zonally lace your boots and keep them that way.

**LINER SYSTEMS**

**BOA® CONDA™**
A patented K2 liner lacing system that uses a urethane harness to gently hug your ankle, creating unrivaled heel hold. BOA® Conda™ allows for adjusting liner tightness and heel hold on the fly from outside of the boot, even with gloves on.

**BOA® MOBILITY CONDA™**
Everything you love about BOA® Conda™ with a narrower lace path that allows a bit more freedom to tweak.

**REMOVABLE 3-POINT HARNESS**
Now with the ability to choose your fit with our removable harness that locks to the shell to give you the choice of the amount of hold you want. Found on the Taro Tamai Snowsurfer and TT Women’s models.

**FAST-IN**
No frills adjustment and locks solid for all day fit and comfort. Easy to use and comfortable all day long.

**3-POINT HARNESS**
This 3-Point Harness is a straightforward solution that doesn’t skimp on support. This system aims to opinion heel hold, while providing ankle support and unrivaled stability to help reduce fatigue.
OUTSOLES

VIBRAM® ROLLSOLE OUTSOLE
Designed with variety in mind, the RollSole™ OUTSOLE aims at providing additional range-of-motion without sacrificing any support. This OUTSOLE is ergonomically shaped and above riders additional hardshell for frontside freeride savers and surf-style dirs.

VIBRAM® MOUNTAINIEER OUTSOLE
The Mountainieer OUTSOLE is the first true boot. An OUTSOLE designed specifically for snowboarding and the mountaineering that is required to get to those larger-than-life lines. With Vibram® rubber and traditional lug design, this crampon compatible OUTSOLE is built to work with all the gear you need.

VIBRAM® V4 OUTSOLE
We’ve combined decades of experience with the knowledge of Vibram to create a rough and rugged OUTSOLE focused on durability, weight reduction, grip, and classic design.

VIBRAM® PRO LIGHT OUTSOLE
Combining the ultra-light and durability of Vibram with K2’s rider insight, the Pro Light OUTSOLE is lightweight and built to last.

ROLLOSE® OUTSOLE
The RollSole® OUTSOLE aims at providing additional range-of-motion without sacrificing grip or support. This OUTSOLE is kept on the overall weight of the boot down while offering extra stability side to side.

VIBRAM® 3.0 OUTSOLE
Rip the cord and move on up. The Vibram® 3.0 OUTSOLE allows you to ride above the rest and get to the best lines in the world. The 3.0 OUTSOLE is lightweight and built to last.

CHARGING INSTRUCTIONS

1. Plug the charger into a socket. The charge indicator will light up green.

2. Plug the charging connector of the boot into the charger, charge indicator will be red.

3. Allow battery pack to charge for 6-7 hours, or until charge indicator light is green.

NOTE: This lithium-ion battery can be charged in any state, as it has no memory effect. The battery should be charged to at least 50% and unplugged in times of travel and extended period of storage.

BOOT MATERIALS

VIBRAM® ROLLSOLE OUTSOLE
Full rubber bottom to machine grip, durability, and impact absorbent Harshmellow™ technology.

LOW PRO OUTSOLE
A lightweight solid rubber cupsole that grips hard and lasts long.

BRIGHT FUTURE OUTSOLE
Lighting up the stoke and for groms everywhere, this LED light powered OUTSOLE is clickable™ components to your foot.

RUBBER LIGHT OUTSOLE
Full rubber bottom to machine grip, durability, and impact absorbent Harshmellow™ technology.

SPACEHEATER™ OUTSOLE
A liner designed for comfort and warmth, from start to finish. It features reflective heat blankets panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J-Bars, and 3D molded, dual-density EVA insoles to keep your foot comfortable and warm all day long.

LINEAR CONSTRUCTION

K2 AND INTUITION®
Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, and durable, K2 aims to create the most comfortable and best performing snowboard boot in the world.

THERM IC® HEATED LINERS
Integrated heating system to keep your feet warm on the coldest of days. Warmth and blood flow increases functionality, mobility, and overall comfort for any type of boot. 3 heat settings provide warmth up to 19 hours, and fully charges in 7 hours with a USB cable.

INTUITION® CONTROL FOAM 3D
Built with a blend of high and medium density Intuition® foam, this is our most versatile liner. With internal and external J Bars and a 3D molded EVA insole, the Control Foam 3D liner is built to provide alpine comfort and support.

INTUITION® SPACEHEATER™
A liner designed for comfort and warmth, from start to finish. It features reflective heat blanket panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J Bars, and 3D molded, dual-density EVA insoles to keep your foot comfortable and warm all day long.

IMAGE OF SPACEHEATER™

INTUITION® PRO FOAM 3D
Our most supportive liner, featuring high-density Intuition® foams for added support without sacrificing comfort. This liner features both internal and external J Bars around the ankles, where extra support is needed.

COMFORT FOAM EVA
Focused on the insole and lasting comfort, the Control Foam liner has a long-lasting use and is packed with internal J Bars for added ankle support.

HARSHMELLOW®
A magical dampening system that replaces industry standard foam dampening materials. Harshmellow® dampens the specific target vibration for each product and works to create the smoothest ride imaginable.

INTUITION® PRO FOAM 3D
Our most supportive liner, featuring high-density Intuition® foams for added support without sacrificing comfort. This liner features both internal and external J Bars around the ankles, where extra support is needed.

HARSHMELLOW®
A magical dampening system that replaces industry standard foam dampening materials. Harshmellow® dampens the specific target vibration for each product and works to create the smoothest ride imaginable.

BLANKET PANELS
Reflective Blanket Panels that work to trap heat in and keep cold out. These reflective blanket panels work alongside heat moldable Intuition® foam, internal J Bars, and 3D molded, dual-density EVA insoles to keep your foot comfortable and warm all day long.

REINFORCED RUBBER
Ablation resistant reinforced outside rubber is placed in areas of high stress to extend the life of the boot and increase durability.

HDR PREMIUM SYNTHETICS
Eight times more durable than a standard polyurethane material, HDR Premium Synthetics is a proprietary synthetic durable finish designed for extreme conditions. The dynamic wear system provides exceptional abrasion and durability performance well beyond standard synthetic materials.

SPACEHEATER™ FOOTBED
Stitched to the bottom of the liner, a layer of thermal reflective SpaceHeater™ material helps add bonus warmth to the boot without extra bulk or weight. Found on Maysis, Renin, Ender, Holgate, Thraxis, Aspect, Torin Tanaka Snowshoes, Contest, Estate, TT Women’s.

VIBRAM® ROLLSOLE OUTSOLE
The RollSole® OUTSOLE aims at providing additional range-of-motion without sacrificing grip or support. This OUTSOLE is kept on the overall weight of the boot down while offering extra stability side to side.

K2 AND INTUITION®
Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, and durable, K2 aims to create the most comfortable and best performing snowboard boot in the world.

HARSHMELLOW™
A magical dampening system that replaces industry standard foam dampening materials. Harshmellow® dampens the specific target vibration for each product and works to create the smoothest ride imaginable.

LINING CONSTRUCTION

K2 AND INTUITION®
Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, and durable, K2 aims to create the most comfortable and best performing snowboard boot in the world.

THERM-IC® HEATED LINERS
Integrated heating system to keep your feet warm on the coldest of days. Warmth and blood flow increases functionality, mobility, and overall comfort for any type of boot. 3 heat settings provide warmth up to 19 hours, and fully charges in 7 hours with a USB cable.

3 AVAILABLE HEAT SETTINGS – Keep feet warm for up to 19 hours.

INTEGRATED BATTERY – With USB charging adapter.

ZONAL HEATING ELEMENT – With in-ratu ted liner; keeping foot warm and comfortable.

CHARGING INSTRUCTIONS

1. Plug the charger into a socket. The charge indicator will light up green.

2. Plug the charging connector of the boot into the charger, charge indicator will be red.

3. Allow battery pack to charge for 6-7 hours, or until charge indicator light is green.

4. Go snowboarding.

NOTE: This lithium-ion battery can be charged in any state, as it has no memory effect. The battery should be charged to at least 50% and unplugged in times of travel and extended period of storage.

BOOT MATERIALS

VIBRAM® ROLLSOLE OUTSOLE
Full rubber bottom to machine grip, durability, and impact absorbent Harshmellow™ technology.

LOW PRO OUTSOLE
A lightweight solid rubber cupsole that grips hard and lasts long.

BRIGHT FUTURE OUTSOLE
Lighting up the stoke and for groms everywhere, this LED light powered OUTSOLE is clickable™ components to your foot.

RUBBER LIGHT OUTSOLE
Full rubber bottom to machine grip, durability, and impact absorbent Harshmellow™ technology.

SPACEHEATER™ OUTSOLE
A liner designed for comfort and warmth, from start to finish. It features reflective heat blanket panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J Bars, and 3D molded, dual-density EVA insoles to keep your foot comfortable and warm all day long.
