K2 SKI

TEAM

FACTORY TEAM

K2 is the original American Ski and Snowboard Brand, founded in 1962 in Washington State. It started with a shop. A garage. An island. It started with an idea. It started with belief. It started with madness and mistakes. From a garage brand to a garage brand gone global. For now and always, K2 continues to thrive with innovation, craftsmanship and commitment.
Whether it’s recreational league racing or early mornings on perfect corduroy, you need a ski that can stand up to anything. Look at the Disruption MTi Alliance. Complete with Dark Matter Damping – a proprietary damping technology designed to provide a ride like you’ve never experienced before – and a Titanal I-Beam, the MTi Alliance provides:

**DISRUPTION MTi Alliance**

Head for the hills and pull in like never before on the K2 Disruption SC Alliance. This freak of a ski packs a serious punch – a quick turning radius, Dark Matter Damping in the tip and tail, and carbon reinforcement – for an engaging, short-turn feel as you tear up the groomers.

**DISRUPTION SC Alliance**

When it's time to step up to more specialized piste skis, drop in on the K2 Disruption SC. With Dark Matter Damping placed over the edges and Carbon reinforcement, the SC offers the smooth, deflection-free feel needed to run the game on firm and fast at first chair.

**DISRUPTION STi**

For precise, edge-high knifing on firm snow, look no further than the K2 Disruption STi. With a quick edge-to-edge feel and tight turning radius, these skis will dive into the turn and engage frantically. And thanks to the Titanal I-Beam and DMD – that’s Dark Matter Damping – the skis offer the smooth, deflection-free feel needed to run the game on firm and fast at first chair.

**DISRUPTION SC**

When it’s time to step up to more specialized piste skis, drop in on the K2 Disruption SC. With Dark Matter Damping placed over the edges and Carbon reinforcement, the SC offers the smooth, deflection-free feel needed to run the game on firm and fast at first chair.
ALL NEW DISRUPTION 82Ti

Equipped and ready to be ripped with Dark Matter Damping and the Titanal I-Beam, the K2 Disruption 82Ti is the all-mountain freak that’s set to blast. With a big shovel and versatile waist, the 82Ti can roll up an edge and spark arcs like you never thought possible.

KEY FEATURES
Dark Matter Damping, Ti I-Beam, PowerWall

ANTHEM 82

With Stance Forward Geometry, Correct Flex inserts, and the performance driven Speed Rocker, the K2 Anthem 82 Skis are the all-mountain charger for the adventurous skier. If you’re looking for a ski to tackle the morning ice and afternoon slush, this ski pairs all that with Stance Forward™ Technology and a Correct Flex™ Insert, and you’ll be primed and ready to tackle it all.

Quick and nimble, the K2 Anthem 82 turns with intuitive precision and ultimate finesse. Inspired and tested by the K2 Alliance, the K2 Anthem 82 Skis offer the stability and nimble feel for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon, the K2 Anthem 82 turns with intuitive precision and ultimate finesse.

ANTHEM 80

Skis offer the stability and nimble feel for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon, the K2 Anthem 78 offers the comfort and casual quiver for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon, the K2 Anthem 78 turns with intuitive precision and ultimate finesse.

ANTHEM 78

Quick to transition and featuring the K2 Alliance approved Bio Konic™ Carbon configuration, the K2 Anthem 78 Skis offer the comfort and casual quiver for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon, the K2 Anthem 78 turns with intuitive precision and ultimate finesse.

ANTHEM 76X

Quick, nimble, and stable for any condition, the K2 Anthem 76X Skis offer the comfort and casual quiver for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon configuration, the K2 Anthem 76X Skis offer the comfort and casual quiver for all conditions and corners of the mountain.

ANTHEM 76

Quick, nimble, and stable for any condition, the K2 Anthem 76X Skis offer the comfort and casual quiver for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon configuration, the K2 Anthem 76X Skis offer the comfort and casual quiver for all conditions and corners of the mountain.

ANTHEM 75

Quick, nimble, and stable for any condition, the K2 Anthem 75 Skis offer the comfort and casual quiver for all conditions and corners of the mountain. Forged out of the lively Aspen/Fir Core and reinforced by Bio Konic™ Carbon configuration, the K2 Anthem 75 Skis offer the comfort and casual quiver for all conditions and corners of the mountain.

With an easy turn shape, massive sweet spot and the Stance Forward™ Technology, the K2 Anthem 75 Skis provide a stable platform on the road to all mountain skills that push beyond the bunny hill.
You know that ski you want for every occasion? The ski that jumps, shreds, edges and cuts. The ski that can bounce pillows to the ground floor, hit jumps late into the afternoon sun, and snipe transitions when the pow has been tracked. The Reckoner 112.

**KEY FEATURES**
- Spectral Braid, Carbon Boost, TwinTech Sidewalls

**CONSTRUCTION**
- Tip Midbody Tail
- Gradual, Extended Rise

**DIMENSIONS (MM):**
- 177, 184, 191
- 136 - 112 - 127

**ROCKER:**
- All-Terrain Twin Rocker

**CORE:**
- 22.9m @ 184

**SIZES (CM):**
- 177, 184, 191

---

From deep pow to the parks and everywhere in between, the Reckoner 102 heeds the call. So whether your whipping cork threes off of cat tracks or pivoting through tight east coast trees, the Reckoner 102 will treat you right. Mash, bash, and float. Jump, bounce, and charge. It’s the ski you need. Like, actually need.

**KEY FEATURES**
- Spectral Braid, Carbon Boost, TwinTech Sidewalls

**CONSTRUCTION**
- Tip Midbody Tail
- Gradual, Extended Rise

**DIMENSIONS (MM):**
- 163, 170, 177, 184
- 134 - 102 - 127

- All-Terrain Twin Rocker

**CORE:**
- 19.3m @ 184

**SIZES (CM):**
- 163, 170, 177, 184

---

We needed a big mountain slayer that can bounce switch and crush pillows. A ski that charges through pow but still can play. So we built the Reckoner 122. With a directional twin shape reinforced by Spectral Braiding, this ski bucks all convention. Creatures in the deep are lurking out there; take the plunge.

**KEY FEATURES**
- Spectral Braid, Carbon Boost, TwinTech Sidewalls

- Tip Midbody Tail
- High, Long Rise

**DIMENSIONS (MM):**
- 177, 184, 191
- 144 - 122 - 136

**ROCKER:**
- Powder Twin Rocker

**CORE:**
- 23.7m @ 184

**SIZES (CM):**
- 177, 184, 191

---
Not every day is hero pow and waist-deep trenchtown. But when that high pressure sets in, you still gotta put ‘em down and rip. So take on the hardpack, the blown out sastrugi – yeah that’s a word – and churn and burn no matter what’s in front of you on the Mindbender 90Ti skis. Make that hardpack fun again.

Harnessing the same Spectral Braid featured in some of the wider brethren, the Mindbender 90C offers the same torsional rigidity with a lighter energized vibe. Snappy, quick, and ready to rip, the Mindbender 90C Skis are your go-to.

This is where it begins: The K2 Mindbender 85. For those with big mountain dreams but don’t have the experience to get there yet. Easy, intuitive, but stable enough to encourage that next step, the Mindbender 85 is the ticket to brain expansion.

Quick edge-to-edge? Check. Absurd float in pow? Oh you bet. You might be surprised to hear that the Mindbender 99Ti only clocks in at 99 underfoot – it definitely hits above its weight. Toss in that Y-Beam and you’ll be wondering where the speed limit on this thing really is. West Coast, East Coast – it doesn’t matter. It’s the kind of ski you drop in the back of your car, and take with you wherever you go.
MINDBENDER ALLIANCE
**MINDBENDER 115C ALLIANCE**

Everyone needs a go-to. For the demanding skier, the K2 Mindbender 115C offers that and more. No-fuss construction, featuring a quick edge-to-edge feel thanks to the Aspen Veneer Core™ and Spectral Braid™, the 115C offers a serious in-the-variable snow. But when things get deep, lean in and hold on tight, you’ll be in for a sweet ride.

**KEY FEATURES**
- **CORE**: Aspen Veneer Core™
- **ROCKER**: All-Terrain Rocker
- **DIMENSIONS (MM)**: 149, 156, 163, 170
- **SIZES (CM)**: 159, 167, 175

---

**MINDBENDER 106C ALLIANCE**

Every day. We’re not joking. Every. Single. Day. That’s when you’ll want to ride the Mindbender 106C Alliance. Daring in-chop but everywhere at the top of the turns, the Mindbender 106C will change your opinion of sub-100 freeride skis. Take it in the pow, pull it in the slush—whatever, whenever. The 106C Alliance is the only ski you need. Full Stop.

**KEY FEATURES**
- **CORE**: Aspen Veneer Core™
- **ROCKER**: All-Terrain Rocker
- **DIMENSIONS (MM)**: 127 - 90 - 113
- **SIZES (CM)**: 154, 161, 168, 175

---

**MINDBENDER 90Ti ALLIANCE**

Yeah, yeah, another skinny-waisted freeride ski. But after that first turn, you’ll realize this isn’t something you’ve ridden before. Nimble where you need it, but damp when things get rowdy, the Mindbender 90Ti Alliance offers the precision and grip you’ve been searching for in that everyday skier. Strap it up with a stabilizing Y-Beam™ and we dare you to try to find the top end.

**KEY FEATURES**

**PONZOOON**

The Legacy of Shane McConkey is absolute. While his antics live on, his impact on ski design is ever-present. And to honor the legend, the K2 Ponzoon remains résilient in 62’s Product Line. Featuring Carbon Boost Braid, and the aggressive taper angle that keeps the skis afloat, the Ponzoon won’t ever sink. Thank You Shane. For your humor, for your wisdom – for everything.

**244**

Stout, stiff, and built for the bumps. Look, Johnny Moseley won the Olympic Gold in ’98 on a pair of 42’s, yeah, they aren’t the same ski, but holy hay can these things bake with the best of ‘em. Focus close and roll those airs. These colors don’t run and the 244 is the American Dual Ski all nasty ski endeavors.

**FATTY**

Look man, if you’re here, you already know what’s good. Those freaks mean business. They’re 68 centimeters of pure shred potential. Push Tricks? You bet. Hard Charging big mountain? 100%. Get it figured, ya nerds – if you don’t have Fatty, you’re missing out. People will call ya a kook, but they’re flat out wrong. Channel your inner Saucer Boy, because it’s time to party.

**ALL NEW DISRUPTION JR**

Made for the little kids that rip. For those on the race course or chasing behind you on the early morning groomer missions, the Disruption JR is the ski your micro-ripper will want – no, need. Slap ‘em down and let ‘em run.

**MINDBENDER JR**

For the little grom with big mountain dreams, snag the Mindbender Junior. With a full wood core, quick edge-to-edge feel, and the same look as the award-winning Mindbender Collection, these skis mean business. So for the aspiring young buck looking to step into the big mountain arena, The Mindbender Junior provides the basis for freeride domination.

**MINDBENDER TEAM**

You’ve got a young gun that sends cliffs bigger than you do. Maybe they’re into slaying deep pow, and have been eyeing that straightline all season. For big-mountain dreams, they’ll need a ski that can hang. Enter the K2 Mindbender Team strapped up with the same design ethos of the award-winning Mindbender Collection and a versatile 98mm waist, the Mindbender Team is built to blast.
With the same vibe and look as the full-sized version, the POACHER JR offers the same stance and feel for vertically challenged rippers with Dew Tour Dreams. And Poacher Junior offers the same stance and feel for those with the same vibe and look as the full-sized version, the POACHER JR.

When it’s time for your gun to step towards their own pair of skis, look no further than the K2 Indy Gios. These freaks feature a composite core and bomber cap construction for a rad ski that won’t break the bank. These skis will last long enough to get him there.

Thanks to the Aspen Core and durable cap construction, these skis will last long enough to get him there.

When it’s time for your gun to step towards their own pair of skis, look no further than the K2 Juvy Gios. With a durable cap construction and full wood core, she’ll be able to develop the skills to be in podium contention sooner than you might think.

Skiing is a family activity. When your little guy is ready to click into his very own pair of skis, look no further than the K2 Indy Gios. With an intuitive ski experience – thanks to the Catch Free Rocker™ – the Indy will pass along that loving passion to the even the youngest members of your brood.

Your little one hits every single side hit and jump in sight. She might even look up to the older girls ripping park and a composite core, the K2 Missy’s will take her skiing to new levels.

Pass on your love of skiing on to your little girl with the K2 LuvBug. If your little one is ready to step up to her very own pair of skis, you’re in the right place. It’s purpose-built and sturdy with a composite core, so it’ll standup for years of abuse. She might even look up to the older girls ripping park and a composite core, the K2 Missy’s will take her skiing to new levels.

Your little girl has outgrown those rental skis and is ready for a pair of her own. Featuring Duracap™ construction and a composite core, the K2 Missy’s will take her skiing to new levels.

With the same vibe and look as the full-sized version, the Poacher Junior offers the same stance and feel for vertically challenged rippers with Dew Tour Dreams. And Poacher Junior offers the same stance and feel for those with the same vibe and look as the full-sized version, the POACHER JR.

SKI BOOTS

2020 - 2021 K2 SKI

SKI BOOTS
Forged out of the award-winning PowerLite Shell but beefed up to a 140 flex, the all-new Recon Pro is the powerful performance boot you’ve been waiting for. Featuring an all-new PowerFit Pro Liner, optional Power Plate, and all the customizable features you expect from K2, the Recon Pro offers top-end performance without added weight.

RECON PRO

FLEX / FEEL

FLEX: 140
WEIGHT: 1650g (26.5)
LAST WIDTH: 98mm
SHELL MATERIAL: TPU
CUFF MATERIAL: Pebax
LINER: PowerFit Pro
STRAP: 45mm Ripcord Power Cinch Strap
SIZE RANGE: 24.5 - 30.5
MODEL OPTIONS: RECON PRO
OUTSOLE: Gripwalk Outsole System - Prolinked

RECON 130

The award-winning Recon 130 is back and ready to rally. Performance boots tend to be heavy, bulky, and tough to work on. But the lightweight K2 Recon 130s offer the same power and precision at an ultra-light 1650g. You read that right. Toss in a moldable shell, cantable outsoles, Fastfit entry – and the list goes on, but we’re running out of space. Buy it. Ski it. Believe the hype – this is the boot you need.

KEY FEATURES

PowerLite Shell, PowerFuse Spine, Energy Interlock, PowerFit Pro, Fully Heat Moldable, Dual Cuff Alignment, Cantable Outsoles, Power Plate
Whether you’re raking early-bird groomers or slamming slush bumps late in the day, you need a boot that offers snap-quick response and a fluid feel. With the K2 Recon 120 Boots – available with Thermic® heated liners – the Recon 120 offers all the customizable features and classic out-of-box fit you want without the overblown flex rating.

For the developing skier, boots make all the difference. With a solid, fluid flex that won’t overbear, the K2 Recon 100 Boots offer the customization to dial in a true one-to-one fit. Take on the mountain and push your skiing to new heights with the performance-driven Recon 100.

Black is the new black. When was the last time you heard that? Regardless, the Anthem Pro takes all of the customizable features from the award-winning anthem collection – fully moldable shells, women’s specific cuff, and more – and stacks it all up into a 120 flex-rated boot.

ANTHEM 100

We set out to build the most versatile and accommodating performance boot in the market. A boot that would go toe-to-toe with plug boots, but offer a true-to-K2 fit and feel. With the K2 Anthem 100 Ski Boots, you’ve got a precise, customizable boot without the bulky weight. They told us we were crazy, but you’ll have to ski it to believe it.

ANTHEM 80

Performance is more than just a stiff flex. With the K2 Anthem 80, get all the customizable features seen on the stiffer boots in a more approachable flex pattern. Because a boot can’t perform if you can’t stand to put your foot in it.

MINDBENDER 130

MINDBENDER 130

Gripwalk Deluxe System - Promoted
MINDBENDER 130

Take the stout 130 flex and the tried-and-true K2 fit, and head for the hills. Weighing 1675g, featuring pin inserts, and boasting fifty degrees of motion, the K2 Mindbender 130 Boots won’t slouch on the uphill. But with the Power TM Shell and Friction Free Pivot, this boot stacks up as one of the best freeride boots on the market. Toss in a bevy of customizable features, and boom – your dream boot is a reality.

MINDBENDER 120

With the walk mode and tech inserts you need for spine excursions, and the responsive Pebax Cuff, The Mindbender 120 offers all the performance you need to tear up the steeps and rally in the deep. With a 120 flex, these boots are meant to run hard and blast high. Slide into the PrecisionFit Pro Tour and feel the Power TM shell envelope your foot. Responsive and powerful, it’s time to blast in the K2 Mindbender 120 Boots.

MINDBENDER 100

For the intermediate skier with big mountain dreams, snag the medium flexing K2 Mindbender 100 boots. Light in weight but not features, these Medium Volume freaks won’t suck on the uphill but will crush on the downhill.

MINDBENDER TEAM JR

Young shredders rejoice, a hybrid freeride boot for the pint-sized is here. With the same ROM and lightweight feel as their big brothers, the Mindbender Team Jr offers a tech-compatible for those burgeoning backcountry focused freeriders.

MINDBENDER 110 ALLIANCE

Stiff flexing and yet ultralight, the K2 Mindbender Alliance 110 Ski Boots are the freeride boots you’ve been waiting for. With 50 degrees ROM, tech inserts, and a whole host of customizable features, the Mindbender Alliance 110 answer the call for hard-charging ladies looking to push their riding - both in and out of the resort.

MINDBENDER 90 ALLIANCE

Featuring a more approachable flex index, but not skimping on the feature set, the K2 Mindbender Alliance 90 offers the customizable fit you need in a flex that won’t overbear. And thanks to proprietary shell tooling, the MB Alliance 90 won’t bog you down with extra weight.

B.F.C. 120
Not all feet are created equal. Some folks have dainty little feet that can slide into anything. Some folks have some big ol’ slappers that are almost as wide as they are long. We get it. But even if your foot falls in the second category, you need performance. Enter the K2 BFC 120 Boot. Packed with all the tech and stout flex you need – just with a roomier fit.

B.F.C. 100
Easy to get into? Check. Comfortable? Yep. Loaded with customizable features? Better believe it. And it even can be strung up with a Thermic® Heated Liner. What else do you need to know? If you need a mid-flexing high volume boot, the K2 BFC 100 Ski Boots check all the boxes.

B.F.C. 90
When fit comes first, you need the BFC 90. So if that foot of yours falls on the wider end of the spectrum and you need a solid feel out of the box, look no further than the BFC 90. Toss in a host of customizable features and K2’s Hands Free Entry, and you’ll be wondering what you’ve been cramming your feet into for the last few seasons.

B.F.C. 80
With a roomy 103mm last and high instep, the BFC is meant for comfort. Heck, it’s in the freakin’ name: Built For Comfort. Because when you’re embarking on the journey of becoming a lifelong skier, you need a boot that is actually comfortable. Ditch the torture devices and upgrade to the K2 BFC 80 Ski Boots.

Snagging some boots for the kids can be tough. But this one-buckle boot is easy to slip on and off. So you can spark that love for the mountains in your young one.

With two buckles, this boot features added performance and value as your little ripper starts looking beyond the bunny hill.

Getting bigger and stronger, the groms need a boot that can keep up with their developing skills. Enter the Indy / Luvbug 3; comfortable and ready to rip with added performance for long days of battering bumps and spinning through the mini-park.
FREERIDE FLIPJAW 135/120

Forged out of sturdy 7075 Aluminum and featuring K2’s proprietary FlipJaw™ locking mechanism, the Freeride Flipjaw transitions from early morning skin tracks to afternoon resort laps. Glide these fragile touring poles for something that is at home on the skin-tracks and the brutal ramp-up of the resort.

All carbon ski poles are basically the same right? WRONG. Take a look at the K2 Power Carbon, with a slick pole strap adjustment and ultra-comfy Rip Cord Grip, you’ll be wondering what exactly you’ve been wrapping your fingers around all these years. You’re picky about your rock, boots, and goggles - why not be as discerning with your poles?  

**POWER CARBON**

With a thermo-formed Performance Rubber grip and lightweight yet durable composite construction, the K2 Power Composite represents that perfect balance between lightweight performance and durable practicality.

**KEY FEATURES**
- Rip Cord Grip
- Composite construction

**SIZES**
- 110, 115, 120, 125, 130, 135

**COLORS**
- Blue, Gunmetal

---

Save some coin without sacrificing proper pole plants. You might have just used “whatever is lying around” in the past, but that isn’t cutting it now. Suck up the Power Aluminum and push off into the unknown.

**POWER ALUMINUM**

- Rip Cord Grip
- Aluminum construction

**SIZES**
- 100, 105, 110, 115, 120

**COLORS**
- Black, Lava

---

Harnessing the comfort and customization of the unique Rip Cord grip, the K2 Style Carbon offers a featherweight feel for long days in the mountains. Discerning styling, lightweight feel, and the durability to last for seasons of use.

**STYLE CARBON**

- Rip Cord Grip
- Performance Rubber

**SIZES**
- 105, 110, 115, 120

**COLORS**
- Orange

---

Looks to kill and the durability you need. The Style Carbon is K2’s sensible offering that sheds weight without sacrificing strength. Snag a pair, equipped with the ergonomic performance rubber grip, and stop fussing with gear. Sometimes the simplest option is the best option.

**STYLE ALUMINUM**

- Rip Cord Grip
- Composite construction

**SIZES**
- 100, 105, 110, 115, 120

**COLORS**
- Grey, Yellow

---

All carbon ski poles are basically the same right? WRONG. Pole are poles, right? You’ve just poured a small fortune into your setup and now your poles. Save some money and pick up the Style Aluminum. It’s metal, it’ll pole plant, and it’s easy to hold. What else do you need?
**LOCKJAW CARBON PLUS**

You've been checking the forecast, and everything lines up. Stable, cold snow lies just a few hours’ skin from the trailhead. Scoop up the Lock Jaw Carbon Plus and take a hike (in a good way). With an extended horizon chain Adventure Grip, articulating powder basket, and built-in inclinometer, the Lock Jaw Carbon Plus Poles is as adventure ready as you are.

**LOCKJAW ALU / EVA**

With a carbon upper and aluminum lower, the K2 Lockjaw Carbon is made for big days in the backcountry. Crafty pole straps, extended Adventure Grip for easy sidehilling, and a bubble inclinometer, the Lock Jaw Carbon proves that poles are more than just pointy sticks to keep ya upright.

**SWIFT STICK**

Sometimes you just need a pole to get you there. A pole to get you into the backcountry, away from the horde of the resort, and deep into the unknown. No frills, just easy walking and untracked pow. Look no farther than the K2 Lockjaw Aluminum. Sturdy, adjustable, and wallet-friendly. Company your kit and get to stepping (into the backcountry). There’s a whole world out there.

**SPROUT**

Why run a pair of trekking poles in the summer and reserve a second pair for the skintrack? If your life revolves around the trails – both during the summer and winter – get the collapsible, adjustable K2 Swift Stick. With the K2 FlipJaw collapsible design, Adventure EVA grip, and aluminum construction, the Swift Stick will be your number one companion – regardless of season.

**POLES**

With two colorways – his and hers – the K2 Decoy and Charm Poles add a dash of style to your grom’s get-up. Plus it’s built out of a sturdy aluminum, so it’ll withstand all of their antics.

**KEY FEATURES**

- **Grip:** Adventure Ultra Light EVA
- **Shaft:** Adjustable Carbon Web
- **Basket:** 95mm Articulating
- **Sizes:** Adjustable 105-145cm
- **Colors:** Orange

Why run a pair of trekking poles in the summer and reserve a second pair for the skintrack? If your life revolves around the trails – both during the summer and winter – get the collapsible, adjustable K2 Swift Stick. With the K2 FlipJaw collapsible design, Adventure EVA grip, and aluminum construction, the Swift Stick will be your number one companion – regardless of season.

**SPOON**

Nothing is worse than buying a host of gear for your kid only to have them outgrow it within the year. So snag the K2 Sprout – adjustable in length and bound by the K2 FlipJaw locking mechanism – and at least your pole-choicehed kid’s poles will last for more than a season.

**POLES**

Sometimes you just need a pole to get you there. A pole to get you into the backcountry, away from the horde of the resort, and deep into the unknown. No frills, just easy walking and untracked pow. Look no further than the K2 Lockjaw Aluminum. Sturdy, adjustable, and wallet-friendly. Company your kit and get to stepping (into the backcountry). There’s a whole world out there.

ROCKER

Once thought of as a powder specific feature, K2 pioneered the use of rocker on all-mountain and piste skis, soon to be followed by the rest of the ski industry. Today, all of our skis are built with some amount of both rocker and camber: the height and length optimized on each model for maximum performance and enjoyment.

SPEED ROCK: Short and low rise in the tip, with camber throughout, for quick turn initiation, precise steering, and optimum stability on hard snow.

POWDER ROCK: High and long rise in the tip and with lower mellow rise in the tail to maximize float in softer snow.

POWDER TWIN ROCK: High and long rise in both the tip and tail for added versatility and float in softer snow.

ALL-TERRAIN ROCK: Suits with All-Terrain rocker have a gradual rise in the tip for great versatility in all conditions, with a short, low rise in the tail for added control in variable snow.

ALL-TERRAIN TWIN ROCK: All-Terrain Twin Rocker is a gradual, extended rise in the tip and tail for added versatility and control in all conditions with two-tip skis.

CATCH FREE ROCK: Effortless turn initiation at slow and moderate speeds with a gentle, gradual rise in the tip and tail.

SKI TECH

CORES

K2 uses and blends a variety of wood species in our cores to fine tune the performance and enjoyment.

ASPEN: Lightweight and resilient, great all around material.

FIR: Energic, tough, dense wood that absorbs impact.

BALSA: Ultra-light and responsive, Balsa cores are a key component to our class leading performance weight ratio.

PAULOWNIA: Light, flexible wood with excellent weight to strength ratio.

MAPLE: Dense hardwood with excellent power transfer and stability.

DARK MATTER DAMPING - DMD

Space. The final frontier. The object of every child’s fascination. And yet with so much of this supra-terrestrial discovery, there’s still so much to uncover. We harnessed this great unknown—these depths beyond the conception of gravity as we know it—to improve edge contact on rough and firm snows. It’s called Dark Matter Damping—supposedly where we sandwich a polymeric damper between two layers of high modulus carbon, and strategically place it along the ski edge. While your grasp of the outer reaches of our celestial sphere may be limited, the ski at the heart of the ski, the transmission of energy from skier to ski edge is direct and precise. And with more grip and control, you can push faster, harder, and pull in to the turn like never before. Get ready for lift off ya mates, it’s time to rage.

TITANAL Y-BEAM

Titanal runs tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.

CARBON I-BEAM

Full length uni-directional carbon running from tip to tail, providing increased accuracy and energy along the entire length of the ski.

TORSION CONTROL DESIGN

An extension of K2’s Torsion Control Design, Spectral Braid is a first of its kind, a variable angle reinforcement (Patent Pending) that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and retains its composition. Mindbender skis with K2’s Spectral Braid have both precise, accurate turn initiation and smooth, consistent turn release in all snow types.

TITANAL Y-BEAM

TGC optimized shape, placing Titanal directly over the edges in the forebody of the ski for powerful and consistent turn entry in variable and off-piste conditions. Underneath the Titanal extends the full width of the ski for maximum power transfer and control. In the tail, the Titanal narrows, tapering in, to allow the ski to break free on the back end of the turn, while still remaining supportive.

SPECTRAL BRAID

An extension of K2’s Torsion Control Design, Spectral Braid is a first of its kind, a variable angle reinforcement (Patent Pending) that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and retains its composition. Mindbender skis with K2’s Spectral Braid have stability and control in spades while remaining hyper-manueverable.

POWERWALL

Power Transfer is dramatically enhanced with the oversized ABS sidewalls that are laser cut and pocketed within the woodcore in the midbody of the ski. With the sidewall extending into the heart of the ski, the transmission of energy from skier to ski edge is direct and precise.

SLANTWALL

Adding a 30 degree angle to the sidewall in K2’s Hybritech construction, Slantwall increases a ski agility and responsiveness while maintaining accuracy and power.

PEARL PERFORMANCE

ALL NEW: Disruption Speed and Piste Performance

SKI TECH
BIOkonic
Developed around the specific biomechanical attributes of women and optimized for hard snow performance. BIOkonic construction places dense, heavier materials directly over the edges with lighter materials in the center of the ski for increased precision and stability, while retaining a large sweet spot.

STANCE FORWARD
Stance Forward: More than simply moving the mounting point on a men’s ski, the overall shape, sidecut, and flex are designed in concert around the biomechanics of how women stand and pressure the ski during a turn.

CORRECT FLEX
Correct Flex: Eliminates the overly stiff mid-section typically found on shorter length skis, yielding a smooth, consistent flex profile optimized on every size from longest to shortest.

DOUBLE BARREL
Ski shapes favor the edges for power and impact resistance and lighter center core for lively, energetic feel.

CARBON BOOST BRAID
Longitudinal Carbon Stringers woven into the patented Triaxial Braid for added pop and rebound.

CARBON OVERDRIVE
Uni-directional carbon fiber to reinforce the construction of our touring skis and keep them light and strong so we can add more metal. It’s about going downhill.

SKI TECH

T2 CONSTRUCTION
Titanal Touring Technology is based on the premise that going downhill is the priority. Same as we do with our high-end piste and freeride skis, we’ve incorporated Titanal laminate into the construction of our award-winning Wayback and Talkback skis. The weight of our touring skis speaks for itself. We’ll let the smile on your face at the bottom of the run speak to their downhill performance.

T3 SPINE
Titanal laminate specifically developed for the Wayback and Talkback collections to increase, predictability, stability, and damping on lightweight constructions.

CONSTRUCTION

T3 CONSTRUCTION
Titanal Touring Technology is based on the premise that going downhill is the priority. Same as we do with our high-end piste and freeride skis, we’ve incorporated Titanal laminate into the construction of our award-winning Wayback and Talkback skis. The weight of our touring skis speaks for itself. We’ll let the smile on your face at the bottom of the run speak to their downhill performance.

METAL LAMINATE
A metal laminate construction, denoted by “Ti” in the name, uses a sheet of Titanal above and below the core to give the ski a damp, precise and accurate feel.

HYBRIDTECH
Blending a sidewall construction underfoot with a cap construction in the extremities. The sidewall section gives the ski accuracy, power, and edge grip while the capped region reduces the swing weight and increases overall durability.

DURACAP
A molding process that envelopes the core and internal materials with the top layer of the ski. Our cap skis are generally lighter overall, with enhanced durability and forgiveness.

TWINTECH
A durable, full sidewall construction providing great edge feel and performance with added top sheet resistance to slush, ski impact damage.

SNOPHobic
Hydrophobic snow-shedding topsheet material that helps prevent snow buildup.
M3 TWINCAM X

- M3 11/12 TCx LIGHT - The Triple Pivot Comfort Toe with the Twin Cam X light heel reduces weight for enhanced overall comfort and performance.

- M3 10 COMPACT - A Lightweight binding system with the Triple Pivot Comfort Toe and a Compact heel for the most comfort and secure feel.

ERC 11 TWINCAM X LIGHT

- ERC 11 TCx LIGHT - Combining a Triple Pivot X toe with a Twin Cam X light heel.

- ERC 10 TWINCAM X LIGHT - The ERC Plate shares some weight but still retains all performance from Twin Cam X heel and comfort from the Triple Pivot Comfort Toe.

- ER3 10 COMPACT - A lightweight binding system with the Triple Pivot Comfort Toe and a Compact heel for the most comfort and secure feel.

GRIPWALK OUTSOLES

- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker's Grip Walk Binding system for better grip and ease of use while walking and standing in boots.

- A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

- Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

- A removable spoiler for an adjustable forward lean angle ranging from 12 to 14 degrees.

PEEK BIO-RESIN

- Lightweight, eco-friendly material for energy transmission and consistent flex across the wide range of temperatures.

INTEGRATED TECH FITTINGS

- Fully integrated into the shell, instead of just outside pods, compatible with both alpine and tech bindings.

RIPCORD POWER STRAP

- Quick Release pull tab unlocks the power strap. Easy to use and customize.

FASTFIT ENTRY

- Softer TPU designed into the instep area for quick and easy entry and exit.

FRICTION FREE CUFF PIVOT

- Low friction cuff pivot to ease range of motion.

GRIPWALK OUTSOLES

- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker's Grip Walk Binding system for better grip and ease of use while walking and standing in boots.

MAVICULAR FUNCH

- A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

ASYMMETRICAL TOE BOX

- Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

POWER WEDGE

- A removable spoiler for an adjustable forward lean angle ranging from 12 to 14 degrees.

POWER 112 SPINE

- Power 112 Spine walk mechanism allows for 50 degree range of motion while open. When in ski mode, the Powerlock provides a powerful connection while skiing.

- Designed to save weight with the highly functional compact heel and the TLT two-linkage toe for full lateral and backward release for beginner skiers.

- The lightest women's binding system offered with an easy entry and targeted functionality for beginning skiers.

Pebax® BIO-RESIN

- Lightweight, eco-friendly material for energetic and consistent flex across the wide range of temperatures.

INTEGRATED TECH FITTINGS

- Fully integrated into the shell, instead of just outside pods, compatible with both alpine and tech bindings.

RIPCORD POWER STRAP

- Quick Release pull tab unlocks the power strap. Easy to use and customize.

FASTFIT ENTRY

- Softer TPU designed into the instep area for quick and easy entry and exit.

FRICTION FREE CUFF PIVOT

- Low friction cuff pivot to ease range of motion.

GRIPWALK OUTSOLES

- Removable and interchangeable ISO 9523 alpine rockered soles collaboratively designed to work with Marker’s Grip Walk Binding system for better grip and easy of use while walking and standing in boots.

MAVICULAR FUNCH

- A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

ASYMMETRICAL TOE BOX

- Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

POWER WEDGE

- A reminder to the skier for an adjustable forward lean angle ranging from 12 to 14 degrees.
**BOOT TECH**

**ALL-MOUNTAIN COMFORT**
B.F.C. and B.F.C. W

**POWERFUSE SPINE**
A rear co-injected “Y” shaped support that adds strength and power to the Energy Interlock in order to maximize forward flex efficiency and lateral stiffness for responsiveness in every type of terrain.

**APRÉS MODE**
Locks the upper cuff from the lower shell for comfort and convenience while walking from car to lift to après and beyond without impeding downhill performance.

**HANDS FREE ENTRY**
dual material overlap for intuitive and easy hands-free exit and entry.

**NATURAL STACKS**
Supportive flex profile and design for a natural stance while standing in line at the ticket office.

**GRIPWALK OUTSOLES**
Renewable and interchangeable ISO 9523 alpine rocker soles collaboratively designed to work with Marker's Grip Walk Binding system for better grip and easy of use while walking and standing in boots.

**CUFF ALIGNMENT INDEX**
Single lateral sided cuff alignment for +/- 1 degree of cuff adjustment. (Models: Men’s B.F.C. 120, B.F.C. 110 and Women’s B.F.C. 90)

**DUAL CUFF ALIGNMENT INDEX**
Dual sided cuff alignment for +/- 2 degrees of cuff adjustment. Adjust the canting of cuff of the boot from both the lateral and medial sides. (Models: Men’s B.F.C. 90, B.F.C. 80 and Women’s B.F.C. 80 and 70)

**WOMEN’S BOOTS**
Specifically designed technologies for Women’s boots.

**WOMEN’S SPECIFIC LAST**
A lower cuff height, volume, and narrower heel to accommodate women’s lower leg and foot shapes.

**WOMEN’S ADJUSTABLE CUFF**
Easy adjustment feature on the anthem boots to quickly adjust the cuff opening to accommodate a variety of calf shapes.

**HEATED BOOTS**

**THERM-IC HEATED LINERS**
Integrated heating system to keep your feet warm on cold days. Increase mobility and performance of foot muscles. Three heat settings provide warmth from 4 to 19 hours.

**THERM-IC BLUETOOTH INTEGRATION**
Ability to control the heating element in Thermic’s heated liner system by app.

**BOOT LINERS**

**POWERFIT PRO**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Featuring a stiffer foam and upper, asymmetric tongue with added power, pre-molded ankle pockets, and a high density power collar.

**PRECISIONFIT PRO**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Featuring an asymmetric tongue, pre-molded ankle pockets, and a high density power collar for a firm but comfortable performance fit.

**POWERFIT PRO TOUR**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Featuring a stiffer foam and upper, asymmetric tongue with added power, pre-molded ankle pockets, and a high density power collar. Includes a tour notch for increased walk-ability.

**PRECISIONFIT PRO TOUR**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Features an asymmetric tongue, high density power collar, and a flex notch for increased range of motion while hiking.

**LUXFIT PRO**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Features an asymmetric tongue, high density power collar, and a flex notch for increased range of motion while hiking.

**LUXFIT PRO TOUR**
Pre-molded and lasted with ULTRALON HEAT MOLDABLE FOAM. Features an asymmetric tongue, a medium density collar and pre-molded ankle pocket with a flex notch for increased range of motion while hiking.

**CUSHFIT**
Lasted with a blend of open cell and EVA foam for an extremely comfortable yet supportive fit.

**CUSHFIT JR**
A blend of open cell and EVA foam for an extremely comfortable fit.
**Ski Pole Tech**

**Pole Construction**

- **Carbon Web**: External carbon strands are precisely laminated onto the carbon shaft creating K2’s lightest weight, most durable, and stiffest shaft offered.

- **Composite Construction**: Full composite construction for a great combination of weight, durability, and cost.

- **Aluminum 7075 or 6061**: High strength aircraft grade aluminum for a seamless, durable tubing shaft.

**Grip Tech**

- **Ripcord Grip System**: Safely releasable strap mechanism integrated into the top of the grip. Unique, lightweight, core-out grip design removes material where possible. Utilizing a slip, experience padded grip/soft strap for comfort and ease of entry. Push button fingering grip top allows for easy strap adjustment and removes the need for buckles and velcro, creating the most comfortable and seamless strap ever.

- **Utility Hook**: Stubborn boot buckles, heel risers and walkmode levers are no match for the utility hoop grip. Flip your pole over and use the notch on the front of the grip to flip, clip, pull, and buckle up your gear on the fly.

**Adjustment Tech**

- **Lockjaw 6000**: Completely redesigned with a 6000 series aluminum lever and a body linked together with teflon bushings to optimize clamp force with minimal lever pressure. The minimalist design achieves a reduced weight of 25% from its plastic equivalent and is the most durable non-slip adjustment mechanism.

- **Lockjaw Adjustment Mechanism**: Refined over several generations, the tried and true lockjaw system continues to define the standard for length adjustment mechanisms. Simple, lightweight and durable, the Lockjaw is the workhorse of the backside pole line.

- **Flipjaw Adjustment Mechanism**: Length adjustment mechanism connecting a smaller diameter upper shaft with a larger diameter, more durable, lower shaft.

- **Collapsible Pole Technology**: Collapsible for easy storage while maintaining durability.

**General Tech**

- **Bubble Inclinometer**: Quick and accurate slope angle measurement in the palm of your hand.

- **All-Season Kit**: Change up the tips and baskets without any tools to make them compatible for backcountry exploration in the summer.

- **Nesting Baskets**: Notches in the basket to couple the pair of poles for easy carry or storage.

- **Backup Probe**: Screw the lower pole segments together to create a backup probe ranging to 200cm.

- **Powder Basket**: Newly redesigned, the powder basket has a 95mm diameter for float in deep snow. Smooth flexing to conform to harder terrain during long skin tracks and traverses.

- **Articulating Powder Basket**: The 95mm ball and socket articulating basket features 50 degrees of unhindered movement. Allows the basket to effortlessly match the skier’s surface during traverses and when conditions turn icy.
CONSTRUCTION

HYBRID SHELL - This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting and increased durability.

IN-MOLD - In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. The result is a construction so light you'll forget it's even there.

DUAL ACTIVE - Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.

PASSIVE CHANNEL VENTING - Channels on the inside surface of the EPS direct airflow between your head and the helmet, removing moisture associated heat for all day comfort.

ACTIVE MATRIX - Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the push of a finger.

CONVERTABLE FULL WRAP LINER - Same coverage as a full-wrap but easily pops out, leaving the fit system and inner padding to accept add-on warm-in-class and wearing a hat inside your helmet.

FULL WRAP LINER - A comfortable, washable, full coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates fit and audio systems.

TECH FORM LINER - Compression formed, precise fit liner with removable ear pads and neck roll for a convertible customized fit.

BOA® - All the benefits of the 360 K2Dialed Fit System with the precision and quality that you have come to expect from BOA® Technologies.

360 K2DIALED - The 360 K2Dialed Fit System is an evolution of the K2Dialed Fit System, delivering unparalleled comfort around your entire head. An intricate web design results in 360 degrees of even pressure distribution for a secure and snug fit that you customize with the twist of a dial.

K2DIALED - The K2Dialed Fit System creates an adustable helmet no matter what your head shape is. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.

AUDIO TECH

AFTERSHOCK BLUETOOTH SPEAKER COMPATIBLE - All K2 helmets are now compatible with Outdoor Tech® Blue Tooth audio systems, as well as other after-market audio options.

BASELINE AUDIO - Pre-installed audio kit with a low profile speaker that easily connects to your mobile device without hindering the fit or comfort. The on-cord controller is designed for on-the-go usability at your fingertips for talk or tunes.

GENERAL TECH

MAGNA SNAP - Magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don't have to fumble for.

REMOVABLE EARPADS - Ability to easily remove ear pads for reduced bulk while retaining the fit system.

REMOVABLE GOGGLE AND HEADLAMP CLIPS - Customized fit for tool-free, on-the-go versatility.

POWFLY - Waterproof, vented cover for Route for added protection against the elements of winter weather.
