

2023/24 SKI COLLECTION

K2 is the original American Ski and Snowboard Brand, founded in 1962 in Washington State. It started with a shop. A garage. A barn. An island. It started with an idea. It started with belief. It started with madness and mistakes. From a garage brand to a garage brand gone global. For now and always, K2 continues to thrive with innovation, craftsmanship, and commitment.

DISRUPTION

DISRUPTION SKI TECH

CARVING TECHNOLOGY

CARBON I-BEAM CONSTRUCTION

Full-length unidirectional carbon running from tip to tail, providing increased accuracy and energy along the entire length of the ski with a lighter, livelier feel than our Titanial I-Beam.

BEAM
TECHNOLOGY

TITANIAL I-BEAM CONSTRUCTION

Titanial runs tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.

DISRUPTION MTi W

Whether it's your recreation league or early morning descents on fresh groomers, you need a women's-specific piste ski that can handle the charge. In the Disruption MTi W, there are no compromises. Built with our top materials and technology like Dark Matter Damping and Titanal I-Beam construction, the Disruption MTi W delivers the speed and stability you need to ski the way you want.

KEY FEATURES

Dark Matter Damping, Ti I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	146, 153, 160, 167
DIMENSIONS (MM):	115-72-103
WEIGHT (G):	1,499 @ 160
ROCKER:	Speed Rocker
RADIUS (M):	14.7 @ 160
CORE:	Aspen Veneer
BINDING:	Marker ERC 11 TCx light Quikclik

DISRUPTION SC W

The Disruption SC W is the perfect ski for women who like an agile, sporty, and short turn feel designed for solid carving on groomers. The SC W packs a serious punch thanks to classic Disruption features like Dark Matter Damping (which eliminates chatter and increases edge grip) and a responsive, sturdy I-Beam construction.

KEY FEATURES

Dark Matter Damping, Carbon I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	146, 153, 160, 167
DIMENSIONS (MM):	127-74-109
WEIGHT (G):	1,471 @ 160
ROCKER:	Speed Rocker
RADIUS (M):	12.6 @ 160
CORE:	Aspen Veneer
BINDING:	Marker ER3 10 Compact Quikclik

DISRUPTION 81Ti W

Fast. Stable. Agile. Impossible, you say? Spin a lap on the Disruption 81Ti W you'll be singing a different tune. Thanks to our Dark Matter Damping and Titanal I-Beam construction, this women's-specific piste destroyer is damp and calm when railing groomers, but is versatile enough to blast through chop and chunder when conditions are less than ideal.

KEY FEATURES

Dark Matter Damping, Ti I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	146, 153, 160, 167
DIMENSIONS (MM):	124-81-110
WEIGHT (G):	1,703 @ 160
ROCKER:	Speed Rocker
RADIUS (M):	14.8 @ 160
CORE:	Aspen Veneer
BINDING:	Marker ERC 11 TCx light Quikclik

DISRUPTION 78C W

The Disruption 78C W is the complete package - nimble and lively thanks to its Carbon I-Beam construction, and still delivers the edge grip you need to arc some serious turns on the hardpack. With classic Disruption construction, the 78C's Speed Rocker and Carbon I-Beam keeps things stable and precise when you're going edge to edge. This women's-specific piste ski will keep you carving from first chair to last.

KEY FEATURES

Dark Matter Damping, Carbon I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	146, 153, 160, 167
DIMENSIONS (MM):	123-78-108
WEIGHT (G):	1,599 @ 160
ROCKER:	Speed Rocker
RADIUS (M):	14.4 @ 160
CORE:	Aspen Veneer
BINDING:	Marker ER3 10 Compact Quikclik

DISRUPTION 76C W

Packed from tip to tail with features like our I-Beam construction and Hybritech sidewalls, the 76C W is built for women who need a piste ski that is light underfoot and quick edge to edge. Its Aspen Light Core is lightweight enough to be easy on the legs, but energetic in turns -- letting you carve through corduroy all day. The Hybritech sidewalls give the ski accuracy, power, and a firm edge grip. The 76C's are the ultimate piste performer for inspiring confidence on the hill.

KEY FEATURES

Carbon I-Beam, Hybritech

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	142, 149, 156, 163
DIMENSIONS (MM):	126-76-110
WEIGHT (G):	1,420 @ 156
ROCKER:	Speed Rocker
RADIUS (M):	11.8 @ 156
CORE:	Aspen Light
BINDING:	Marker ER3 10 Compact Quikclik

DISRUPTION 76 W

These smooth performers have all the tech a female skier could need to start carving harder and gain confidence going faster. Headlined by our I-Beam construction, Aspen Light core, and Speed Rocker profile, they'll be there to get you through it all, from the unexpectedly steep groomers to the afternoon crud. Enter the next chapter of your ski career with the Disruption 76 W

KEY FEATURES

I-Beam, Hybritech

CONSTRUCTION

ROCKER PROFILE | CATCH FREE ROCKER

BINDING:	Marker ERP 10 Quiklik, Marker ERP 10, flat

DISRUPTION Ti²

For those looking to maximize their carving to charging ratio -- you've come to the right place. The Disruption Ti2 is a no-hold, stable-as-a-rock hard-charging ski that doesn't know the meaning of second place. A long turn radius and a Ti2 I-Beam construction (an additional sheet of metal atop the ski core) provide the ultimate stable experience. The Disruption Ti2 is the most damp piste ski we've ever built. Get out in front of the group with the Disruption Ti2. Loved by pros like Warner Nickerson

KEY FEATURES

Dark Matter Damping, Ti² I-Beam, World Cup Piston Plate

CONSTRUCTION

ROCKER:	Speed Rocker
RADIUS (M):	22.3 @ 182
CORE:	Aspen Veneer
BINDING:	Marker XCOMP 16

K2 SKI 2023/24

DISRUPTION MTi

The Disruption MTi is another hard charger from the Disruption collection. Equipped with a medium-length turn radius and Titanal I-Beam construction, these MTis deliver precision and stability throughout the entire turn. The MTi's boast a smooth edge hold and enhanced power transfer thanks to Powerwall and Dark Matter Damping technology. With the Disruption MTis, you've hit the speed jackpot.

KEY FEATURES

Dark Matter Damping, Ti I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	165, 170, 175, 180
DIMENSIONS (MM):	118-74-104

ROCKER:	Speed Rocker
RADIUS (M):	18.1 @ 175
CORE:	Maple/Aspen
BINDING:	Marker MXCELL 12 TCx Quiklik

DISRUPTION STi

The Disruption STis are for the aggressive expert skier who goes all-in on every turn and demands a rock-solid edge hold. The Disruption STi utilizes a tighter turn radius for added agility and maneuverability - without sacrificing speed. Like other models in the Disruption family, Dark Matter Damping and a Speed Rocker profile delivers a smooth, deflection-free feel - elevating your game when conditions are firm and fast.

KEY FEATURES

Dark Matter Damping, Ti I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SIZES (CM):	155, 160, 165, 170

RADIUS (M):	13.6 @ 165
CORE:	Aspen Veneer
BINDING:	Marker MXC 12 TCx light Quiklik

DISRUPTION SC

It's time to start railing turns like you've always imagined. The Disruption SC's carbon I-Beam construction makes it more forgiving than its metal-laden siblings, while still delivering razor-sharp edge control and a smooth ride on the firmest of hardpack. Stepping up to a more specialized piste ski has never been more inviting.

KEY FEATURES

Dark Matter Damping, Carbon I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

RADIUS (M):	15.2 @ 174
CORE:	Aspen Veneer
BINDING:	Marker M3 11 Compact Quiklik

DISRUPTION 82Ti

Fully equipped and ready to rip, the Disruption 82Ti has all our top tech including Titanal I-Beam construction and Dark Matter Damping. We gave it a big shovel and the widest waist width in the Disruption family to create a freakish combination of critical stability and confident edge control. You'll be comfortable hitting top speed while still having the confidence to roll up on edge and spark arcs like you never thought possible.

KEY FEATURES

Dark Matter Damping, Ti I-Beam, Powerwall

CONSTRUCTION

ROCKER PROFILE | SPEED ROCKER

SKI TECH

FREERIDE TECHNOLOGY

TITANAL

Y - B E A M
T E C H N O L O G Y

TITANAL Y-BEAM

Titanal is placed directly over the edges in the forebody of the ski for predictable turn initiation. Underfoot the titanal spans the full width of the ski for maximum control and power transfer. In the tail we move mass away from the mount points increasing directional stability, resulting in consistent turn release.

SPECTRAL

BRAID
T E C H N O L O G Y
(U.S. PATENT
NO. 10,857,445)

SPECTRAL BRAID

K2's Patented Spectral Braid is a first of its kind variable angle reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. This makes our skis feel lively, energetic, and remarkably composed.

ALL NEW

MINDBENDER 116C W

The all-new K2 Mindbender 116C W encapsulates everything our athletes have been looking for in a powder ski. The 116C W underwent strategic updates to shape and rocker profiles with the intention of maximizing float, stability, and maneuverability. Featuring K2 patented Spectral Braid technology, Bio Resin, and Uni-Directional Flax. The 116C W is inspired and loved by pro athletes McKenna Peterson and Manon Lochi

KEY FEATURES

K2 SKI 2023/24

MINDBENDER 89Ti W

In typical Mindbender fashion, the women's 89Ti freeride ski has a classic construction with a powerful twist. Strapped with our Titanal Y-Beam technology the 89Ti are equipped for a consistent turn entry and enhanced power transfer. The 89Ti's are optimized for hardpack performance with confidence-inspiring stability and high-speed edge hold, while the All-Terrain Rocker profile still gives you the freedom to explore off the beaten path. The Mindbender 89Ti W is the perfect companion for when you're in the mood to rip but soft snow isn't on the menu.

KEY FEATURES

Ti Y-Beam

CORE:	Aspen Veneer
BINDING:	Squire 11 Quikclik, flat

MINDBENDER 89 Ti

When soft snow is in short supply, turn to the K2 Mindbender 89Ti men's freeride ski. Although it's built with the same Titanal Y-Beam construction and All-Terrain Rocker profile as its other metal-reinforced Mindbender siblings, the 89Ti stands apart thanks to a narrower waist width. Its All-Terrain Rocker profile knows no bounds and keeps you nimble enough to navigate bumps, trees, and the occasional chop. The result is a ski that has the precise edge hold you need to dominate the hardpack but is still wide enough for forays into the ungroomed.

KEY FEATURES

MINDBENDER 85

The Mindbender 85 is an ideal ski for anyone breaking out beyond the groomers. They are lightweight, forgiving, and intuitive - inspiring confidence in intermediate skiers looking to bring their improving skills to new parts of the mountain. Some skis are easy to outgrow for a developing skier, but these Mindbender 85's will remain in your arsenal even after you gain confidence in tougher terrain. Also available in shorter lengths.

KEY FEATURES

Bio Resin, Slantwall

DISPATCH SKI TECH

FREETOUR TECHNOLOGY

HEX BEAM

Moves mass away from the mounting points toward the tip and tail of the ski resulting in increased dampness and directional stability while maintaining power transfer in steep and deep terrain.

UNI-DIRECTIONAL FLAX

Flax is a lightweight and sustainable natural fiber reinforcement fabric that improves a ski's ability to track in variable terrain resulting in improved suspension and composure.

VIBRADET

Energy absorption underfoot. Reduces vibration between the ski/skier interface which enhances suspension and control.

DISPATCH 120

The Dispatch 120 was built for steep, deep, and bottomless terrain. Perfect for turning the backcountry into your own personal playground. Packed with new innovative features like Titanal Hex-Beam construction, Vibradet, and Uni-Directional Flax, this soft snow-specific ski boasts a foolproof union of weight-conscious stability and dampness. Loved by team riders McKenna Peterson and Marty Schaffer

KEY FEATURES

HEX-Beam, Uni Directional Flax, Vibradet

R RECKONER

SKI TECH

FREESTYLE TECHNOLOGY

SPECTRAL

BRAID
TECHNOLOGY

(U.S. PATENT
NO. 10,857,445)

Spectral Braid

Another implementation of K2's Torsion Control Design, the patented Spectral Braid makes another appearance in the Reckoner collection. In this iteration, tighter fiber angles are found in the midbody of the ski, with more open angles in the tip and tail. The result is a ski with playful extremities coupled with a stable and powerful feel underfoot. This allows for more playfulness and forgiveness in the ski's extremities while maintaining a stable and powerful feel underfoot.

RECKONER 122

The Reckoner 122 is a dedicated powder twin-tip built to crush pillows, send cornices, and boost wind lips. A high and long rise in the tip and tail help this ski float through the soft stuff. A Fir/Aspen wood core combined with our Spectral Braid technology creates the perfect combination of surfy and stout, allowing this ski to bounce, pivot, and charge through even the deepest snow without skipping a beat. Loved by pros like Corey Seeman and Lexi Dupont.

KEY FEATURES

Spectral Braid, Carbon Boost, Double Barrel, TwinTech

SIZES (CM):	177, 184, 191
DIMENSIONS (MM):	144-122-136
WEIGHT (G):	2,168 @ 184
ROCKER:	Powder Twin Rocker
RADIUS (M):	23.7 @ 184
CORE:	Fir/Aspen Double Barrel

RECKONER 112

You know that ski that can do it all? The one that slarves, slashes, jumps, and cuts? The one that can bounce pillows to the ground floor, hit jumps late into the afternoon sun, and charge through tracked-out pow? People say it doesn't exist, but we're here to tell you otherwise. The Reckoner 112 is all you need, no matter what the mountain throws at you. The go-to ski for team rider Karl Fostvedt.

KEY FEATURES

Spectral Braid, Carbon Boost, TwinTech

SIZES (CM):	170, 177, 184, 191
DIMENSIONS (MM):	136-112-127
WEIGHT (G):	2,062 @ 184
ROCKER:	All-Terrain Twin Rocker
RADIUS (M):	22.9 @ 184
CORE:	Fir/Aspen Double Barrel

RECKONER 102

From the powder to the park and everywhere in between, the Reckoner 102 delivers the same versatility and playfulness thanks to its heavy freestyle influence. Featuring the same tech as its bigger brothers but with a nimbler waist width, this playful twin-tip is at home whipping cork threes off cat tracks, or pivoting through tight east coast trees. These 102's are loved by team riders like Keegan Kilbride, McKenna Brown and Kai Mahler.

KEY FEATURES

Spectral Braid, Carbon Boost, TwinTech

SIZES (CM):	163, 170, 177, 184
DIMENSIONS (MM):	134-102-127
WEIGHT (G):	1,822 @ 177
ROCKER:	All-Terrain Twin Rocker
RADIUS (M):	19.3 @ 184
CORE:	Fir/Aspen Double Barrel

RECKONER 92W

The Reckoner 92 W is a women's-specific twin-tip built to confidently take you from the park to the steeps, and to the bumps and back again. Built with our All-Terrain Twin Rocker and a lively Aspen Veneer core, these skis are light on your feet and big on fun. Loved by pros like Mackenna Brown and available in shorter lengths.

KEY FEATURES

Triaxial Braid, Hybritech

SIZES (CM):	149, 159, 169

RADIUS (M):	14.6 @ 159
CORE:	Aspen Veneer

RECKONER 92

When it's time to click in to your first pair of twin-tips, the Reckoner 92 will make all your wildest dreams come true. From the park to the trees to afternoon chop, these playful boards and their versatile All-Terrain Twin Rocker profile will have you wondering why you waited so long to jump on the twin-tip train. Also available in shorter lengths for smaller skiers.

KEY FEATURES

Triaxial Braid, Hybritech

PARK AND PIPE

MIDNIGHT

Midnight's versatile construction has taken K2's female athletes to freestyle skiing's most prestigious podiums. The Midnight's Carbon Boost technology and lightweight Aspen core deliver pop for days, while the sturdy Twintech sidewalls provide the durability you need to lap the park until that new trick is locked down. Midnight is loved by K2 pros like Maggie Voisin and Johanne Killi

POACHER

A favorite among K2's freestyle athletes, the Poacher is a common sight atop X Games and Dew Tour podiums. Though most of its screentime comes from major contests, this park ski is burly enough to dominate even the heaviest of late-night street sessions. Built with our Carbon Boost construction and a Fir/Aspen wood core, these skis deliver tons of pop off the lip and the stability you need to stomp those deep landings. These Poachers are loved by freestyle athletes like Joss Christensen, Colby Stevenson, and Ferdinand Dahl.

K2 x BOA®

RECON
120 / BOA®

BOA® FIT SYSTEM BOOT TECH TECHNOLOGY

The BOA® Fit System delivers dialed in performance and a micro-adjustable precision fit. It consists of three integral parts: a micro-adjustable dial, lightweight yet extremely strong laces and low-friction lace guides, which are applied in uniquely designed configurations to improve the fit and performance of the boot.

THREE COMPONENTS. ENDLESS POSSIBILITIES.

1. DIAL

Adjusts fit with precision and allows for a fast release.

2. LACE

Lightweight, strong and expertly configured for performance.

3. GUIDES

Low-friction guides to ensure a smooth and precise fit, every time.

HOW IT WORKS:

Push in
to Engage

Turn for Precision
Fit (Tighten)

Turn for Precision
Fit (Loosen)

Pull Up for
Fast Release

BOA® FIT SYSTEM
BOOT TECH
ANATOMY

ENGINEERED FOR UNPRECEDENTED DURABILITY.

H+i1

H+i1 DIAL

Provides micro-adjustable, precision fit and quick release, with quality and durability guaranteed. The BOA dial platform features a breakaway design engineered to eject the dial cartridge upon severe impact without damaging the system, allowing skiers to pop the dial back into the bayonet mid-mount. In the unlikely event that the system is broken, it can be easily repaired and replaced.

SS3 LACE:

Built to withstand skiing the toughest terrain, season after season. Made of stainless steel, SS3 is our strongest, most durable lace, boasting a tensile strength of more than 254 kg.

RIVET GUIDES:

Heavy-duty guides for low friction tightening and loosening.

LACE & SYSTEM STRENGTH:

90 19 strands of stainless steel permeated and wrapped in Nylon coated by 90 more strands of stainless steel ensuring maximum durability

1.7 1.70 mm thin, lightweight and yet super durable

254 Tensile strength of more than 254 kg

BOA® FIT SYSTEM

BOOT TECH

PERFORMANCE BENEFITS

The BOA® Fit System provides a performance fit engineered to enhance feel and responsiveness while reducing pressure points by incrementally modulating the Alpine boot closure with precise micro-adjustments.

DIALED IN

Precision fit with on-the-fly tightening and loosening for enhanced responsiveness, optimized pressure distribution, and reduced pressure points.

LOCKED IN

Connected fit designed to uniformly wrap the foot and minimize downward pressure, increasing heel lock-down for improved power and edge-to-edge control.

CONFIDENT

Engineered for confidence and built to withstand rugged terrain and inclement weather, BOA® dials and laces deliver extreme durability. Bayonet and cartridge system ensures continued operation, even after heavy impacts.

ALL NEW

ANTHEM 115 BOA®

Introducing the all-new Anthem 115 BOA®. Outfitted with classic Powerlite construction, and BOA® Fit System - the Anthem 115 BOA® delivers complete out-of-the-box performance and comfort, a MultiFit Last, and Powerfit Pro liner giving these boots a performance-first approach without sacrificing comfort.

ANTHEM 95

The Anthem 95 is a great introductory boot for the athletic skier looking to level up their skills. Outfitted with classic Anthem construction – a Powerlite Shell, Powerful Spyne and an Adjustable Cuff, the Anthem 95 pairs responsiveness with a medium flex.

ANTHEM 85

Performance is about more than just a stiff flex rating. The Anthem 85 has the customizable features seen on our stiffer women's boots, like a heat-moldable Powerlite shell and GripWalk outsoles, but with a much more accommodating fit and feel. The end result is a user-friendly boot that delivers all-day comfort and impressive value. Available in 98mm (LV) and 100mm (MV) lasts to accommodate a wide variety of foot shapes.

KEY FEATURES

Powerlite Shell, Fastfit Instep, Energy Interlock, Powerfuse Spyne, Fully Heat Moldable, Women's-Specific Last, Women's-Adjustable Cuff

MINDBENDER TEAM

The Mindbender Team is stacked with performance. We upped the flex rating to a sturdy 140 and kept the weight down to create a boot that's stiff, powerful, nimble, and ready to take on any lift-assisted or backcountry endeavor. Take control of the mountain with our fully customizable Powerfit Pro Tour liner, Powerlite Shell, and a huge 50-degree range of motion walk mode.

MINDBENDER 130

Built with a heat-moldable Powerlite shell, Friction Free Cuff Pivot, tech fittings, and a burly 130 flex, the Mindbender 130 is the versatile freeride boot you need for both chairlift-assisted and human-powered endeavors. When it comes time to venture beyond the resort, flip the Powerlock Spyne into walk mode and appreciate the impressive 50-degree range of motion as you power uphill to your next objective.

ALL NEW

BFC 130

Long gone are the days where performance and comfort are exclusive factors. Strapped with a Cushfit Pro liner and a fully heat moldable shell, the BFC 130 has all the tech you need to carve from dawn to dusk. The BFC 130 pairs high volume, wide fit, and a stiffer flex for a more stable downhill performance – without sacrificing on comfort.

KEY FEATURES

Hands Free Entry, Fully Heat Moldable, Apres Mode 2.0, CushFit Pro

FLEX / FEEL

FLEX RATING:	130
LAST WIDTH (MM):	103

SIZE RANGE:	24.5-30.5

BFC 120

The BFC 120 is for experienced skiers who need a bit more room in their ski boots but don't want to compromise on support and responsiveness. With a 103mm last and a performance-oriented 120 flex, these boots are packed with features like our new and improved Cushfit Pro liner, updated Apres Mode walk mode, Hands Free Entry, and a new, sleek heat-moldable shell, all of which add up to a boot that can be skied hard while providing all-day comfort.

BFC 100

The all-new, medium-flexing BFC 100 is ideal for skiers who prioritize comfort but still need a supportive boot that won't hold them back. A wide 103mm last, Cushfit Plus liner, slimmed-down heat-moldable shell, and updated Après Mode for easy walking mean you'll be focused on your skiing, not your feet.

BFC 90

For skiers who prioritize ease of use above all else when it comes to their boots, we offer the all-new BFC 90. An easy flex rating of 90 won't beat your legs up when the snow gets choppy, Hands Free Entry makes getting them on (and off) a cinch, and the Cushfit Plus liner, low-profile heat-moldable shell, and roomy fit guarantee plenty of wiggle room for your toes.

KEY FEATURES

Lockjaw 6000 Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap

GRIP:	Freetour Grip W/ Emergency Release Strap
SHAFT:	Adjustable Carbon Upper/7075 Aluminum Lower
BASKET:	Articulating 2.0 Power
SIZES (CM):	Adjustable: 90-130, 105-145
COLORS:	White

LOCKJAW ALUMINUM

Sometimes you just need a reliable adjustable pole to get you into the backcountry. Look no further than the Lockjaw Aluminum: reliable, wallet-friendly, and available with an optional extended EVA foam grip. Complete your kit and hit the skin track.

KEY FEATURES

Lockjaw Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap

GRIP:	Freetour Grip W/ Emergency Release Strap
SHAFT:	Adjustable 7075 Aluminum
BASKET:	Articulating 2.0 Power
SIZES (CM):	Adjustable: 105-145
COLORS:	Eva,Grey

SWIFT STICK

The Swiftstick is a four-piece, collapsible, adjustable pole designed for summer treks or the skin track. Featuring our Flipjaw telescoping design, Adventure EVA foam grip, and sturdy aluminum construction, the Swift Stick will be your number one companion, regardless of the season.

KEY FEATURES

Flipjaw Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap

GRIP:	Freetour Grip W/ Emergency Release Strap
SHAFT:	Adjustable 7075 Aluminum
BASKET:	Articulating 2.0 Power
SIZES (CM):	Adjustable: 110-130
COLORS:	Grey

DECOY / CHARM

With two colorways – the Decoy and Charm poles add a dash of style to any kid’s setup. Plus, these poles are built out of sturdy aluminum, meaning they can withstand the rowdiest of on-snow antics.

KEY FEATURES

Nesting Baskets

GRIP:	Rubber
SHAFT:	16mm Aluminum
BASKET:	60mm Performance
SIZES (CM):	75, 80, 85, 90, 95, 100, 105
COLORS:	Sage, Purple

SPROUT

Nothing is worse than buying a bunch of gear for your kid, only to have them outgrow it within a year. Pick up the adjustable Sprout and rest easy, knowing that your pint-sized shredder’s poles will last for more than a season.

KEY FEATURES

Flipjaw Adjustment Mechanism, Nesting Baskets

GRIP:	Rubber
SHAFT:	Adjustable 14mm Aluminum Upper/16mm Aluminum Lower
BASKET:	50mm Performance
SIZES (CM):	Adjustable: 75-105

SKI TECH

ROCKER

Once thought of as a powder-specific feature, K2 pioneered the use of rocker on all-mountain and piste skis, with the rest of the ski industry following in our footsteps. Today, almost all of our skis are built with rocker, with the height and length optimized on each model for maximum performance and enjoyment.

SPEED ROCKER - Short, low rise in the tip with camber throughout and a flat tail for quick turn initiation, precise steering, and maximum stability on groomed snow.

POWDER ROCKER - High and long rise in the tip, low camber under foot, and a medium-height, long rise in the tail to maximize float in soft snow.

POWDER TWIN ROCKER - High and long rise in both the tip and tail for maximum float in soft snow.

ALL-TERRAIN ROCKER - Gradual rise in the tip for great versatility in all conditions, with a low, short rise in the tail for added control in variable snow.

ALL-TERRAIN TWIN ROCKER - gradual, extended rise in the tip and tail for added versatility and control in all conditions.

CATCH FREE ROCKER - Effortless turn initiation at slow to moderate speeds thanks to a medium-height, gradual rise in the tip and a low, gradual rise in the tail.

CORES

K2 uses a variety of wood species in our cores to fine-tune the performance characteristics of each ski.

ASPEN

Lightweight and resilient. Great all-around core material.

FIR

Energetic, tough, dense wood that absorbs impacts well.

BALSA

Ultra light and responsive, balsa is used in the core of our lightest touring ski, the Wayback 80.

PAULOWNIA

Lively, flexible wood with excellent strength-to-weight ratio.

MAPLE

Dense hardwood with excellent power transfer and stability.

DARK MATTER DAMPING

A polymeric damper sandwiched between two layers of high-modulus carbon strategically placed along the ski edge to eliminate high-frequency vibrations, providing drastically increased edge grip at high speeds.

POWERWALL

Power transfer to the ski's edges is dramatically enhanced with oversized ABS sidewalls that are laminated and pocketed within the wood core in the midbody of the ski

TITANAL I-BEAM

Titanal runs tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.

Ti² I-BEAM

Built with 100% more metal than our proven Titanal I-Beam construction, Ti² I-Beam adds an additional sheet of metal on top of the ski core, providing the ultimate in stability, dampness, and precision when hitting top speeds on groomed snow.

CARBON I-BEAM

Full-length unidirectional carbon running from tip to tail, providing increased accuracy and energy along the entire length of the ski with a lighter, livelier feel than our Titanal I-Beam.

TORSION CONTROL DESIGN

Designed to enhance stability and control in all snow types, Torsion Control Design combines a progressive torsional flex with a balanced and even longitudinal profile. Torsionally stiffest in the forebody and center of the ski, then relaxing throughout the tail, K2 skis with TCD are characterized by precise, accurate turn initiation and smooth, consistent turn release. TCD can be found on Mindbender and Mindbender Alliance skis, utilizing either Titanal Y-Beam or Spectral Braid construction.

TITANAL Y-BEAM

TCD-optimized shape, placing Titanal directly over the edges in the forebody of the ski for powerful and consistent turn entry in variable and off-piste conditions. Underfoot, the Titanal spans the full width of the ski for maximum power transfer and control. In the tail, the Titanal narrows, tapering to allow the ski to break free on the back end of the turn while still remaining supportive.

SPECTRAL BRAID (MINDBENDER AND MINDBENDER W COLLECTIONS)

Another implementation of K2's Torsion Control Design, patented Spectral Braid is a first-of-its-kind variable-angle fiber reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and composed, skis with K2's Spectral Braid have stability and control in spades while remaining extremely maneuverable.

SLANTWALL

Adding a 30-degree angle to the sidewall in K2's Hybritech construction, Slantwall increases a ski's agility and responsiveness while maintaining accuracy and power.

SKI TECH

TITANAL

HEX BEAM

HEX-BEAM

Moves mass (titanal) away from the mounting points toward the tip and tail of the ski resulting in increased dampness and directional stability while maintaining power transfer in steep and deep terrain.

VIBRADET
DAMPING MAT

VIBRADET

Energy absorption under foot. Reduces vibration between the ski/skier interface which enhances suspension and control.

STEADFAST
BASE

STEADFAST BASE

Glide Better, Longer. The Steadfast base requires 30% less energy to produce and retain wax 9 times longer than a high end sintered base. The improved wax adhesion also prevents skins from pulling away from the base.

UNI-DIRECTIONAL FLAX

UNI DIRECTIONAL FLAX

Weight-conscious Adds composure to the ski allowing it to track more predictably in varied terrain

SPECTRAL

BRAID
TECHNOLOGY

SPECTRAL BRAID (RECKONER COLLECTION)

K2's Spectral Braid makes another appearance in select models in the Reckoner collection. In this iteration, the tighter fiber angles are found in the midbody of the ski, with more open angles in the tip and tail. This allows for more playfulness and forgiveness in the ski's extremities while maintaining a stable and powerful feel underfoot.

DOUBLE BARREL

Dense fir core over the edges for power and impact resistance bonded with a lighter aspen center core for a lively, energetic feel.

CARBON BOOST

Longitudinal carbon stringers laid on top of the core for added pop and rebound.

T3 CONSTRUCTION

Titanal Touring Technology is based on the premise that going downhill is the priority. As with our high-end piste and freeride skis, we've incorporated Titanal laminates into the construction of our award-winning Wayback and Talkback skis. The weight of our touring skis speaks for itself, and we'll let the smile on your face at the bottom of the run speak to their downhill performance.

Ti SPYNE

Titanal laminate specifically developed for the Wayback and Talkback collections to increase predictability, stability, and damping on lightweight touring ski constructions.

CARBON OVERDRIVE

Unidirectional carbon fiber integrated into the layups of our Wayback and Talkback touring skis to keep them light and responsive.

CORRECT FLEX

A proprietary process involving custom core profiling combined with a composite insert recessed within the top of the core in the midbody of the ski that ensures consistent flex characteristics across all lengths of a given model of ski.

SNOPHOBIC TOPSHEET

Hydrophobic snow-shedding topsheet material that helps prevent snow buildup.

TRIAxIAL BRAID

Patented process that interlocks strands of fiberglass around a milled wood core for pronounced torsional strength while retaining the superior flex patterns inherent in a wooden ski.

METAL LAMINATE

Metal laminate construction, denoted by "Ti" in a ski's model name, uses a custom-shaped sheet of Titanal in the ski's layup to provide a damp, precise, and accurate feel.

HYBRITECH

Sidewall construction underfoot blended with a cap construction in the tip and tail. The sidewall section gives the ski accuracy, power, and edge grip, while the cap construction regions reduce swing weight.

DURACAP

A molding process that envelops the core and internal materials with the top layer of the ski. Duracap skis are generally lighter and more forgiving than skis utilizing other construction methods.

TWINTeCH

A durable, full sidewall construction providing great edge feel and performance with added topsheet resistance to impact damage.

MARKER BINDINGS

<p>XCOMP</p>	<p>POWERED BY MARKER</p> <p>GRIP WALK</p>	<p>XCOMP 16 - Premium construction and technology, including magnesium components for precise steering and control. XCOMP dampening technology eliminates fast, hard impacts and keeps the boot perfectly centered.</p>
<p>MXCELL</p>	<p>POWERED BY MARKER</p> <p>GRIP WALK</p>	<p>MXCELL 12 TCx - Designed for maximum power transmission between ski and boot with the XCELL Piston Technology toe piece to keep the boot centered during quick jolts, and the TCx heel for control and precision performance.</p>
<p>MXC TWINCAM X</p>	<p>POWERED BY MARKER</p> <p>GRIP WALK</p>	<p>MXC 12 TCx light - Combining aTriple Pivot X toe with a Twin Cam X light heel. Giving a modern look to all-mountain performance.</p>

<p>ERP 10</p>	<p>POWERED BY MARKER</p> <p>GRIP WALK</p>	<p>ERP 10 - The lightest women's binding system offered, with easy entry and targeted functionality for beginner skiers.</p>
<p>SQUIRE 11</p>	<p>POWERED BY MARKER</p> <p>GRIP WALK</p>	<p>SQUIRE 11 - lightweight Triple Pivot toe piece features a distinctive Ice Off Rail to keep the sole free of snow and ice. A state-of-the-art Hollow Linkage heel with its wider boot holder reduces the step-in force by approximately 35%, even with GripWalk soles.</p>
<p>GRIPWALK SYSTEM</p>	<p>GRIP WALK</p>	<p>GRIPWALK SYSTEM - NOW FEATURED ON ALL BINDINGS Patented ISO 9523 rocker sole boot and binding system designed for better grip and added walking comfort without compromising the binding's power transmission and release function.</p>

SHELLS**POWERLITE SHELL**

K2's highest-performance shell design, utilizing shell walls of varying thicknesses and four different types of TPU to provide the ultimate combination of light weight and responsiveness.

POWERLITE TOUR SHELL

Bootfitter Friendly. Completely heat moldable. Eco-Friendly Pebax Upper Cuff and Shell. Consistent flex across a wide range of temperatures.

LINERS**BOA® TOURFIT LINER**

BOA liner increases adjustability and even hold across the entire foot. Features stiffer foam with asymmetric tongue for added power and energy transmission. Completely heat moldable with pre-molded ankle pocket.

TOURFIT LT

Lightweight construction that offers same performance features in the pro model. Stiffer foam with asymmetric tongue for added power and energy transmission. Completely heat moldable with pre molded ankle pocket

TOURFIT

Lightweight, hard charging construction inspired by the Lux Fit Tour liners. Pre molded ankle bumps for added fit and fully heat moldable with asymmetric tongue.

POWERFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring stiffer foam and a stiff, asymmetric tongue for added power and energy transmission, pre-molded ankle pockets, and a high-density power collar.

PRECISIONFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring an asymmetric tongue, pre-molded ankle pockets, and a high-density power collar for a firm-but-comfortable performance fit.

POWERFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring stiffer foam and a stiff, asymmetric tongue for added power and energy transmission, pre-molded ankle pockets, and a high-density power collar. Includes a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

PRECISIONFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Features an asymmetric tongue, high-density power collar, and a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

LUXFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort.

LUXFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort. Includes a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

CUSHFIT PLUS

Lasted with a blend of open-cell and EVA foam for an extremely comfortable, warm, and supportive fit.

CUSHFIT PRO

Maintains the renowned comfort of the original Cushfit liner, but with a notable increase in support and performance thanks to the use of Ultralon foam, similar to what is used in our Powerfit Pro and Precisionfit Pro liners.

CUSHFIT COMFORT

Same great fit and out-of-the-box feel as our classic Cushfit liner, but with additional foam in key areas for increased comfort and compliance.

CUSHFIT JR

A scaled-down version of our adult Cushfit liner built for our youth boots.

FEATURES**MULTIFIT LAST**

The MultiFit Last was developed in conjunction with the BOA® Fit System to accommodate a variety of foot shapes ranging from 97mm to 100mm eliminating the need for multiple last option (LV, MV).

BOA FIT SYSTEM

The BOA® Fit System provides a performance fit engineered to enhance feel and responsiveness while reducing pressure points by incrementally modulating the Alpine boot closure with precise micro-adjustments.

PEBAX

Lightweight, eco-friendly material used in the cuff of select boot models for energetic and consistent flex across a wide range of temperatures.

FASTFIT INSTEP

Softer TPU material is used in the instep area of select models' shells for quick and easy entry and exit.

HANDS FREE ENTRY

Dual material overlap for hassle-free entry and exit.

ENERGY INTERLOCK

A rivet-free technology that integrates the cuff and shell, putting less stress on the boot's lower shell and producing a smooth, progressive flex.

2 PIECE BOOT TECH

POWERFUSE SPYNE

A co-injected Y-shaped support in the rear of the boot that adds strength and power to the Energy Interlock in order to maximize fore/aft flex efficiency and lateral stiffness, providing enhanced responsiveness and energy transfer to the ski.

CUFF ALIGNMENT INDEX

Single-sided alignment system for +/- 1 degree of lateral cuff adjustment.

DUAL CUFF ALIGNMENT INDEX

Dual-sided alignment system for +/- 2 degrees of lateral cuff adjustment.

FULLY HEAT-MOLDABLE

Both the boot's shell and cuff are capable of being heat-molded to a variety of foot shapes for a true custom fit.

WOMEN'S-SPECIFIC LAST

A lower cuff height, lower-volume shell, and narrower heel to accommodate women's lower leg and foot shapes.

WOMEN'S ADJUSTABLE CUFF

Allows for quick adjustment of the cuff opening to accommodate a variety of lower leg shapes.

APRÈS MODE 2.0

A new and improved walk mode offering a massive 50-degree range of motion. A lever on the back of the boot unlocks the upper cuff from the lower shell, allowing for increased comfort and convenience when walking from the car to the lift.

POWERLOCK SPYNE

A performance-oriented walk mode designed for ski touring that offers a 50-degree range of motion. When in ski mode, Powerlock Spyne provides a powerful and secure connection for uncompromised downhill performance.

INTEGRATED TECH FITTINGS

Tech fittings in the toe and heel are fully integrated into the shell injection, allowing for compatibility with both tech bindings and alpine DIN bindings.

FRICION FREE CUFF PIVOT

An easy-hinging cuff pivot designed to provide minimal resistance while in walk mode.

GRIPWALK OUTSOLES

Removable and interchangeable rockered soles designed to work with Marker's GripWalk binding system for better grip and comfort while walking, standing, and hiking.

REPLACEABLE OUTSOLES

Dual-injected TPU for secure footing, direct power transfer to the ski, and increased wear resistance.

CANTABLE OUTSOLES

Shims can easily be placed underneath the outsoles to cant the boots for a customized fit.

NAVICULAR PUNCH

A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

ASYMMETRICAL TOE BOX

Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

POWER WEDGE

A removable spoiler that fits between the liner and the back of the boot cuff that allows for adjustment of the boot's forward lean angle, ranging from 12 to 14 degrees.

THERM-IC BLUETOOTH HEATED LINER

Control your Therm-ic heated boot liners using the free Therm-ic Heat Control app on your smartphone. Available for iPhone and Android devices.

SWITCHBACK BUCKLE

Buckles lock in the forward position when touring to increase ROM. Toe buckle flipped on toebox for increased clearance in variable terrain. Magnesium buckles and wire bails for additional weight savings.

DYNAFIT TECH FITTING

Dynafit tech fittings in the toe and heel are fully integrated into the shell injection.

VIBRAM OUTSOLE

Designed with adventure in mind. Superior grip and durability. K2 exclusive tread pattern. 9523 iso DIN.

HONEYCOMB BOOTBOARD

Stay Warmer, Longer. Traps heat and insulates like a down jacket. Retains heat 15% better than traditional bootboard. Boot-fitter friendly

POWERLOCK 2.0 WALK MECHANISM

Improved walk mechanism with locking lever, 9-15 degrees of forward lean adjustability and 60 degrees ROM.

SHELLS**REVOLVE**

Revolve Shell, offers the same fit and feel as the Raichle boots of years past, updated to withstand the rigors of today. Precise, snug, and proven, this 99mm last shell has become the definitive freestyle boot of the modern era.

REVOLVE PLUS

The Revolve Plus Shell takes the same 99mm last and opens up the toe box for a roomier feel out of the box. The Pillar Shell uses the original 3-piece design and adds replaceable soles for extended longevity and increased traction.

METHOD

The Method Shell adds much needed depth to the FL3X line. Designed for those with a wider foot, the Method shell incorporates a higher volume fit and a 102mm last.

DIVERGE TOUR

The Diverge Tour Shell offers a smooth stride and articulated purchase in any situation. Walk farther and more comfortably than ever before. Featuring a higher back cuff and lightweight Grilamid™ plastic, this construction will take you anywhere.

LINERS**INTUITION PRO TOUR WRAP**

Slip-on the Intuition Pro Tour Wrap and get ready to motor on up the skin track. Crafted out of Intuition® Foam, and featuring a tour notch and lace-up system, the Intuition Pro Tour Wrap offers the added comfort and performance your boot is missing.

INTUITION PRO WRAP

Slip into the Intuition Pro Wrap, and experience unmatched ankle retention and pressure-free performance. Crafted out of Intuition® Foam, the Intuition Pro Wrap offers the added comfort and performance your boot is missing.

INTUITION WRAP

The Intuition Wrap Liner's laminates are specifically engineered to be our lightest weight liner for increased maneuverability while maintaining it's warmth and custom moldable fit right out of the box.

INTUITION PRO TOUR TONGUE

With a Tour Flex Notch, removable external J-Bars, and lacing system, the Intuition Pro Tour Tongue makes walking a blister-free experience in an enveloping snug fit, while giving you the performance you need to send it on the downhill.

INTUITION PRO TONGUE

Crafted out of Intuition® Foam, the Intuition Pro Tongue Liner's laminate is specifically engineered to provide energy transfer to the shell while maintaining warmth in a custom, moldable fit. Slip-on the Intuition Pro Tongue liner and feel the power of the highest performing liner that we've ever created.

INTUITION TONGUE

The Intuition Tongue Liner's laminates use multi-layered construction in a traditional tongue liner, designed to provide targeted comfort and performance in a familiar way.

INTUITION TOUR TONGUE

With a Tour Flex Notch and multi-layered construction, the Intuition Tour Tongue makes walking a blister-free experience in an enveloping snug fit while giving you the warmth and performance you need to send it on the downhill.

3 PIECE BOOT TECH

K2 SKI 2023/24

FEATURES

RIBBED TONGUE

100% Ribbed tongue enables smoother, more natural linear flex from your shin to your toe. The tongue bends like a flexible straw, never bottoming out while providing smooth rebound. No more shin bang!

EASY ON/OFF

The front of the shell opens a full 90° to slide your foot in and out with ease in all temperatures. Like putting on slippers!

MOLDABLE

Utilizing the QuickFit™ System, all FL3X boots – shells included – can be molded to the exact needs of your foot. Not all feet are the same; and with FL3X, we pride ourselves on creating boots that allow a personalized, 1-to-1 fit experience.

ADJUSTABLE FLEX

The boot's flex is rated on a simple scale of 4-12 (12=stiffest). Change a boot's flex by simply switching the tongue. (Competitor's boots require permanent cutting.)

INFINITE PIVOT

Unlike traditional designs, the rear cuff never bottoms out. It pivots infinitely forward with your calf for less shell distortion, no shin pain and more control.

CUSTOMIZABLE

All parts are sold separately for unlimited personalization and repair using a standard phillips head screwdriver.

LADDER BUCKLE

The ladder buckle features an intuitive, easy to remember, macro-size adjustment, plus a micro-twist for fine adjustment with a light, easy-to-handle aluminum lever.

FORWARD LEAN & CUFF ALIGNMENT

Tool-less forward angle adjustment. Original & Soul shells: 2mm or 4mm. Easy, precise lateral angle adjustment. Revolver & Revolver Plus shells: 12mm.

WOMEN'S CUFF

The women's cuff is anatomically shaped to match a female's specific calf shape for increased comfort and control.

SHOCK ABSORBER BOOT BOARD

Soft rubber layer in the sole of the shell absorbs vibrations, impact and shock for a smooth ride.

WIDETRACK BUCKLE

Durable aluminum levers with a minimalistic lightweight design. This adjustment mechanism is engineered to increase precision and durability while maintaining on-the-fly, single-handed micro adjustment.

45 DEGREE HEEL LOCK

Keep heels where they belong. Placing the middle buckle at an optimal 45 degree angle creates a solid lock for the heel to stay put when pressuring the tips and tails of the skis.

GRIPWALK OUTSOLE

Designed for a better purchase on unstable & slippery terrain. The convex shape and ribbed tread add both comfort & grip for getting from house to hill to peak! Sold separately. Available for Revolver Plus and Method models.

FEATURES CONT.**TECH FITTINGS**

Compatible with all pin-tech bindings, the in-molded tech fittings open up a new world of possibilities for FL3X Boots. One boot – any objective.

MID GRIP

Whether you are climbing grated stairs or scrambling on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

TOUR HOOK

Whether you are climbing grated stairs or scrambling on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

WALK MODE

Flip the lever up to ascend with ease. And when it's time to send it, flip the lever down, lock the cuff in place, and push into the fluid, progressive flex you've come to expect from FL3X. Works great for après bar sessions too.

DUAL MATERIAL OUTSOLES

No slipping getting in-between you and the ground. A firm TPU and a softer material combat wear and keep your feet underneath you on any surface.

POWER WRAP

An additional layer of ergonomically shaped EVA is wrapped around the outside of the upper liner to increase energy transfer and horsepower to the shell.

J-BAR

An additional j-shaped piece of foam is inserted internally on both sides of the ankle area to dramatically increase ankle hold down, to keep your feet perfectly in place for precise control.

POWER WEDGE

Dial in you forward lean angle with this removable velcro spoiler.

WIDE TOE

A thinner foam is used in the front of the liner to increase space without sacrificing control for people with wider feet or who prefer a little more toe room.

INTUITION

All boot liners are built using authentic Intuition™ closed cell foam. It is body heat activated to mold 100% to your feet and shells during use, or can be instantly heat molded by a shop in minutes for a light, warm and super comfortable fit.

WOMEN'S LINER

The women's cuff is anatomically shaped to match a female's specific calf shape for increased comfort and control.

CONSTRUCTION

FREETOUR GRIP

The Freetour Grip features an adjustable strap with an emergency release mechanism designed to release in the event of an accident or substantial impact. The Freetour grip also features a utility hook for convenient adjustment of risers or buckles.

CARBON WEB

External carbon strands are precisely laminated onto the carbon shaft, creating K2's lightest-weight, most durable, and stiffest ski pole.

COMPOSITE CONSTRUCTION

Full composite construction for a great combination of weight, durability, and affordability.

GRIP

ALUMINUM

High-strength aircraft-grade aluminum for a seamless, durable ski pole shaft.

RIPCORD GRIP SYSTEM

Safety-releasable strap mechanism integrated into the top of the grip. Unique, lightweight grip design eliminates all excess material. Slim, neoprene-padded, right/left specific straps for comfort and ease of entry. Push-button hinging grip top allows for easy strap adjustment and removes the need for buckles and velcro, creating our most comfortable and streamlined strap ever.

UTILITY HOOK

Stubborn boot buckles, heel risers, and walk mode levers are no match for the utility hook grip. Flip your pole over and use the notch on the front of the grip to flip, clip, pull, and buckle up your gear on the fly.

ADJUSTMENT

LOCKJAW 6000 ADJUSTMENT MECHANISM

Completely redesigned with a 6000-series aluminum lever and a body that utilizes Teflon bushings to optimize clamp force with minimal lever pressure. The minimalist design is 25% lighter than its plastic equivalent and is the most durable non-slip adjustment mechanism available.

LOCKJAW ADJUSTMENT MECHANISM

Refined over several generations, the tried-and-true Lockjaw system continues to define the standard for reliable, durable length adjustment mechanisms. Simple and durable, the Lockjaw is the workhorse of K2's adjustable pole collection.

FLIPJAW ADJUSTMENT MECHANISM

Length adjustment mechanism connecting a thinner upper shaft with a larger-diameter, more durable lower shaft.

COLLAPSIBLE POLE TECHNOLOGY

Collapsible for easy storage.

GENERAL

ALL-SEASON KIT

Change up the tips and baskets of your poles without any tools to set them up for summertime backcountry exploration.

NESTING BASKETS

Notches in the baskets to couple the pair of poles for easy carry or storage.

BACKUP PROBE

Screw the lower pole segments together to create a backup probe ranging to 200cm in length.

POWDER BASKET

Powder basket with a 95mm diameter for float in deep snow. Smooth-flexing to conform to harder terrain on skin tracks and traverses.

ARTICULATING 2.0 POWDER BASKET

The 95mm ball-and-socket articulating basket features 50 degrees of unhindered movement allowing the basket to effortlessly match the snow's surface.

CONSTRUCTION**MIPS**

MIPS is a brain protection system integrated into select K2 helmet models that can offer increased protection in falls where the head experiences rotational forces from contacting the snow or other objects.

IN-MOLD

In-Mold is K2's premium construction for ultra-lightweight performance and features an EPS liner that is molded directly to a lightweight polycarbonate shell. The result is a construction so light, you'll forget you're wearing a helmet.

HARD-SHELL

Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to a durable, injection-molded ABS shell.

HYBRID

This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for increased durability and the implementation of our advanced Active Matrix Venting.

VENTILATION SYSTEMS**PASSIVE CHANNEL**

Channels on the inside surface of the EPS liner direct airflow between your head and the helmet, removing moisture and excess heat for all-day comfort.

ACTIVE MATRIX

Climate control at the flip of a switch. Active Matrix venting allows the user to easily regulate the air flow of the helmet's vent system.

DUAL ACTIVE MATRIX

User-regulated Active Matrix venting combined with integrated Passive Channel venting.

LINER SYSTEMS**FULL WRAP**

A comfortable, washable, full-coverage, breathable liner design that wicks moisture to prevent overheating and seamlessly integrates K2's fit and audio systems.

CONVERTIBLE FULL WRAP

Same coverage as our Full Wrap liner, but can be easily removed, leaving the fit system and minimal padding to accommodate a thin beanie under the helmet or for maximum ventilation on warm days.

TECH FORM FULL WRAP

Compression-formed, precision-fit liner with removable ear pads and neck roll for a convertible, customizable fit.

FIT SYSTEMS**K2DIALED**

The K2dialed fit system creates a custom-fitting helmet for any and all head shapes. An ergonomically-shaped, three-point adjustable interface maximizes fit and customization with the twist of a dial, allowing for easy fit adjustments on the fly.

360 K2DIALED

The 360 K2dialed fit system is an evolution of the K2dialed fit system, delivering unparalleled comfort for your head. An intricate web design provides 360 degrees of even pressure distribution for a secure fit that is easily adjusted with the twist of a dial.

BOA®

All the benefits of the 360 K2dialed Fit System with the precision and quality that you have come to expect from Boa® Technologies.

**AUDIO****AFTERMARKET BLUETOOTH SPEAKER COMPATIBILITY**

All K2 helmets are now compatible with Outdoor Tech® Bluetooth audio systems, as well as other aftermarket audio options.

BASELINE AUDIO SYSTEM

Pre-installed audio kit with a low-profile speaker that easily connects to your mobile device. The on-cord remote puts control of your talk and tunes right at your fingertips.

**GENERAL****BIKE CERTIFIED**

Conforms to United States and European safety standards for bicycle use.

MAGNA SNAP

Magnetic retention clip that easily flips up and over your goggle strap for a secure hold that you don't have to fumble for.

REMOVABLE EAR PADS

Ability to easily remove ear pads for reduced bulk, while still keeping the helmet's fit system in place.

REMOVABLE HEADLAMP CLIPS

Customized fit for tool-free, on-the-go versatility for early-morning or after-dark missions.

POWFLY HELMET COVER

Waterproof/breathable cover for the Route helmet that provides added protection against the elements.
