K2 is the original American Ski and Snowboard Brand, founded in 1962 in Washington State. It started with a shop. A garage. A barn. An island. It started with an idea. It started with belief. It started with madness and mistakes. From a garage brand to a garage brand gone global. For now and always, K2 continues to thrive with innovation, craftsmanship, and commitment.
Titanal is placed directly over the edges in the forebody of the ski for predictable turn initiation. Underfoot the Titanal spans the full width of the ski for maximum control and power transfer. In the tail we move mass away from the mount points increasing directional stability, resulting in consistent turn release.

Spectral Braid™ is a first-of-its-kind variable-angle fiber reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. Skis with K2’s Patented Spectral Braid™ have stability and control in spades while remaining extremely maneuverable.

**TITANAL Y-BEAM**
Titanal is placed directly over the edges in the forebody of the ski for predictable turn initiation. Underfoot the Titanal spans the full width of the ski for maximum control and power transfer. In the tail we move mass away from the mount points increasing directional stability, resulting in consistent turn release.

**CARBON SPECTRAL BRAID**
Spectral Braid™ is a first-of-its-kind variable-angle fiber reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. Skis with K2’s Patented Spectral Braid™ have stability and control in spades while remaining extremely maneuverable.
### MINDBENDER 116C
The MINDBENDER 116C is built for those epic powder days that everyone dreams of while being able to handle any variable snow you encounter on the way to the stash. Strung up with our patented Spectral Braid technology and Powder Rocker profile, this surprisingly lightweight fat ski can run with the best of 'em, from effortless turns in the lightest snow to punching through that end-of-day chop.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**
- TIP: Maple/Paulownia
- TAIL: Maple/Paulownia

**DIMENSIONS (MM)**
- 177, 180, 183

**SIZES (CM)**
- 172, 176, 180, 183

**RADIUS (M)**
- 22.9 @ 186

**ROCKER PROFILE**
- All-Terrain Rocker

### MINDBENDER 108Ti
The MINDBENDER 108Ti delivers at any speed in any conditions. A mid-fat waist width, long turn radius, All-Terrain Rocker profile, and Titanium Y-Beam construction work together to create a stable, unflinching freeride ski that wants to be pushed. Whether the snow is soft, firm, chunky, or all of the above, you'll be ready to play through.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**
- TIP: Maple/Paulownia
- TAIL: Maple/Paulownia

**DIMENSIONS (MM)**
- 156, 163, 170, 177

**SIZES (CM)**
- 137, 140, 144, 148

**RADIUS (M)**
- 20.8 @ 163

**ROCKER PROFILE**
- All-Terrain Rocker

### MINDBENDER 99Ti
When soft snow is in short supply, turn to the MINDBENDER 99Ti. Although it’s built with the same Titanium Y-Beam construction and All-Terrain Rocker profile as its other metal-reinforced Mindbender siblings, the 99Ti stands apart thanks to a narrower waist width. Resulting in a ski that has the precision edge hold that you need to dominate the hardpack but is still wide enough for forays into the ungroomed.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**
- TIP: Maple/Paulownia
- TAIL: Maple/Paulownia

**DIMENSIONS (MM)**
- 156, 163, 170, 177

**SIZES (CM)**
- 134, 138, 142, 146

**RADIUS (M)**
- 19.6 @ 166

**ROCKER PROFILE**
- All-Terrain Rocker

### MINDBENDER 90C
Harnessing the same Spectral Braid technology featured in some of its wider brethren, the MINDBENDER 90C offers precision maneuverability with a lightweight design tailored for lighter skiers or those who don't need the stability and stiffness of a metal laminate ski. The Mindbender 90C’s Aspen veneer core and All-Terrain Rocker profile will deliver a fun, lively ride anywhere on the hill.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**
- TIP: Maple/Paulownia
- TAIL: Maple/Paulownia

**DIMENSIONS (MM)**
- 156, 163, 170, 177

**SIZES (CM)**
- 127, 131, 135, 139

**RADIUS (M)**
- 17.5 @ 177

**ROCKER PROFILE**
- All-Terrain Rocker

### MINDBENDER 85
When soft snow is in short supply, turn to the MINDBENDER 85. Although it’s built with the same Titanium Y-Beam construction and All-Terrain Rocker profile as its other metal-reinforced Mindbender siblings, the 85 stands apart thanks to a narrower waist width. Resulting in a ski that has the precision edge hold that you need to dominate the hardpack but is still wide enough for forays into the ungroomed.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**
- TIP: Maple/Paulownia
- TAIL: Maple/Paulownia

**DIMENSIONS (MM)**
- 156, 163, 170, 177

**SIZES (CM)**
- 120, 124, 128, 132

**RADIUS (M)**
- 13.3 @ 170

**ROCKER PROFILE**
- All-Terrain Rocker

### MINDBENDER 89Ti
When soft snow is in short supply, turn to the MINDBENDER 89Ti. Although it’s built with the same Titanium Y-Beam construction and All-Terrain Rocker profile as its other metal-reinforced Mindbender siblings, the 89Ti stands apart thanks to a narrower waist width. Resulting in a ski that has the precision edge hold that you need to dominate the hardpack but is still wide enough for forays into the ungroomed.

**KEY FEATURES**
- Spectral Braid
- Carbon Boost
- Slantwall

**CONSTRUCTION**

MINDBENDER 115C W

K2's female athletes led the way in perfecting this remarkably versatile powder crusher. We listened to specific feedback and accepted the challenge of delivering the fat ski they always wanted. The women's-specific Mindbender 115C W is infused with our Powder Rocker profile and Spectral Braid technology, all of which add up to a women-specific ski that can take on anything from deep pow, wind buff, and chunder, and look damn good doing it.

KEY FEATURES
- Spectral Braid, Carbon Boost, Slantwall

SIZES (CM):

ALL-NEW DISRUPTION Ti²

Looking to turn the mountain into your personal GS course? You’ve come to the right place. The Disruption Ti² is a no-holds-barred, stable-as-a-rock speed demon that doesn’t know the meaning of second place. Dark Matter Damping, a long turn radius, and our new Ti² I-Beam construction – with twice as much metal as our Disruption MTi – combine to make this the most damp, stable ski we’ve ever built. Buckle your seatbelt – these monsters have the need. The need for speed.

KEY FEATURES
Dark Motion Damping, Ti² I-Beam, World Cup Piston Plate

DISRUPTION MTi

The Disruption MTi is an aggressive ski designed for experts who wanna go fast. A medium-length turn radius, Titanal I-Beam construction, and Dark Matter Damping combine for precise edge hold and a smooth ride that inspire confidence when your primary concern is maxing out the speedometer on the corduroy.

KEY FEATURES
Dark Motion Damping, Titanal I-Beam, Powerwall

DISRUPTION STi

Perfect for the aggressive expert skier who commits to every turn and demands rock-solid edge hold when it counts. The Disruption STi employs a tight turn radius, Titanal I-Beam construction, and Dark Matter Damping to deliver a smooth, deflection-free feel that will elevate your game when conditions are firm and fast.

KEY FEATURES
Dark Motion Damping, Titanal I-Beam, Powerwall

DISRUPTION SC

It’s time to start railing turns like you’ve always imagined. The Disruption SC’s carbon I-Beam construction makes it more forgiving than its metal-laden siblings, while still delivering razor-sharp edge control and a smooth ride on the firmest of hardpack. Stepping up to a more specialized piste ski has never been more inviting.

KEY FEATURES
Dark Motion Damping, Carbon I-Beam, Powerwall
DISRUPTION 82Ti

Fully equipped and ready for it, the Disruption 82Ti has all our top tech including Titanal I-Beam construction and Dark Matter Damping. We gave it a big shovel and the widest waist width in the Disruption family to create a freakish combination of critical stability and confident edge control. You’ll be comfortable taking top speed while still having the confidence to roll up on edge and spark arcs like you never thought possible.

KEY FEATURES
- Dark Matter Damping
- Ti I-Beam
- Powerwall

CONSTRUCTION
- Marker MXCELL 12 TCx Quikclik

### DISRUPTION 79C W

When you’re ready to explore the mountains on your own, the women’s-specific Disruption 79C W is the ski that will take you everywhere with confidence. Its carbon and forgiving design, featuring a lightweight composite core and our Catch Free Rocker profile, will keep you smiling as you continue to develop your skills and push your limits as a skier.
INTRODUCING THE ALL NEW DISPATCH COLLECTION

DISPATCH

TECHNOLOGY: DISPATCH

HEX-BEAM: Improved Dampness and Directional Stability
- Moves mass away from the mounting point toward the tip and tail of the ski to increase swing weight and promote predictable turn initiation.
- Increases directional stability and tracking while maintaining power transmission

STEADFAST BASE: Glides Better, Longer
- Retains wax 9x longer than a high-end sintered base
- Improved wax adhesion, preventing skins from pulling wax from the base
- Requires 30% less energy to produce

UNI-DIRECTIONAL FLAX: Stability and Weight Savings
- Running Length of the Ski
  - Tip to Tail
- Dampness and Weight Savings
  - Stable and Maneuverable
  - High Performance with Low Environmental Impact

VIBRADET: Energy Absorption Under Foot
- Reduces vibrations between the ski/skier interface which enhances suspension and control
- Beneficial when paired with tech bindings
  - Adding Elasticity
  - Dampens Vibration Underfoot
**KEY FEATURES**
- Hex-Beam, Uni-Directional Flax, Steadfast Base

**CONSTRUCTION**
- Tip: Polyurethane wrap
- Tail: Polyurethane wrap

WAYBACK 106

Amid flat waist and a shape that excels in soft snow make the Wayback 106 your clear choice for when it's deep and weight is a concern. We put Titanal in our touring skis for unmatched downhill performance and stability, while still keeping things light enough for long days on the skin track. Click into the downhill performance and stability, while still keeping things light enough for long days on the skin track. Whether you’re taking your first steps into the backcountry or simply looking for a touring setup that won’t break the bank? The all-new Wayback 92 is the ski for you. Loaded with premium features like Snophobic topsheet and an ultra light paulownia Tour Light core, the Wayback 92 will change the way you approach the mountains.

KEY FEATURES
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet
- Camber Low, All-Terrain Rocker
- Gradual Rise, Short Rise
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet

WAYBACK 96

Strapped up with T3 Technology – that’s metal-laden Ti Spyne, Carbon Overdrive, Snophobic Topsheet – the Wayback 96 offers unparalleled downhill capabilities in a super light package. Whether you’re on a multi-day trip or pushing out for a quick dawn patrol, the Wayback 96 offers the best stability-to-weight ratio on a multi-day hut trip or pushing out for a quick dawn patrol, while still inspiring confidence on the way down.

KEY FEATURES
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet
- Camber Low, All-Terrain Rocker
- Gradual Rise, Short Rise
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet

WAYBACK 92

Taking your first steps into the backcountry or simply looking for a touring setup that won’t break the bank? The all-new Wayback 92 is the ski for you. Loaded with premium features like Snophobic topsheet and an ultra light paulownia Tour Light core, the Wayback 92 will change the way you approach the mountains.

WAYBACK 88

It’s hard to believe something this light can still deliver on the descents. The T3 reinforced Titanal-reinforced Wayback 88 will change your opinion of featherweight touring skis. They can fly up the skin track with the best of ‘em, yet inspire confidence when the snow is variable and the descents are steep. Why hike all that way if you’re not gonna have fun on the way down?

WAYBACK 84

With a Snophobic topsheet and an ultra light paulownia Tour Light core, the Wayback 84 is the reliable touring ski that won’t break the bank. Whether you’re crushing fitness laps at the resort or making your first moves into the backcountry, mount up the Wayback 84 and experience the mountains in a whole new way.

WAYBACK 80

Featuring our balsa/paulownia Tour Ultra Light wood core, Ti Spyne construction for stability underfoot, and integrated race notches in the tip, the Wayback 80 is an ultra light tool optimized to get you uphill fast. If blistering traverses and kilo-mountain climbing races sound like your idea of a good time, this is your dream ski.
Wayback 96 W

Rule the skin track and crush the descents with confidence on the Wayback 96 W. This lightweight, women-specific touring ski is built with our paulownia Tour Light wood core and reinforced with T3 Technology, which places metal in strategic locations along the length of the ski for added damping and stability. The Wayback 96 W strikes the perfect balance between uphill efficiency and downhill performance, making it the ideal companion for big days in the backcountry.

Key Features:
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet

Construction:
- Tip: Camber Low, Gradual Rise
- Tail: Camber Low, Short Rise

Sizes (cm): 156, 163, 170
Dimensions (mm): 128-96-115
Rocker: All-Terrain Rocker
Weight (g): 1154 / 16 @ 163
Core: Paulownia Tour Light

Wayback 88 W

The tried-and-true flagship model of K2’s women’s-specific touring collection, the Wayback 88 W is the perfect pairing for backcountry adventures. Featuring our paulownia Tour Light wood core, Carbon Overdrive reinforcements, and Titanal placed strategically underfoot, the Wayback 88 W offers lightweight maneuverability for ambitious alpine ascents, but is stout enough for even the most variable, white-knuckle descents.

Key Features:
- Ti Spyne, Carbon Overdrive, Snophobic Topsheet

Construction:
- Tip: Camber Low, Gradual Rise
- Tail: Camber Low, Short Rise

Sizes (cm): 153, 160, 167
Dimensions (mm): 121-88-109
Rocker: All-Terrain Rocker
Weight (g): 1154 / 16 @ 160
Core: Paulownia Tour Light
The Reckoner 122 is a dedicated powder twin-tip built to crush pillows, send cornices, and boost wind lips. A fir-aspen wood core combined with our patented Spectral Braid technology creates the perfect combination of surfy and stout, allowing this ski to bounce, pivot, and charge through the deepest snow without skipping a beat.

PARK & PIPE
### Midnight

Formerly known as the MissConduct, this is the ski that has taken K2’s female athletes to the top of freestyle skiing’s most prestigious podiums. The Midnight’s Carbon Boost construction and lightweight aspen wood core deliver pop for days, while the sturdy TwinTech sidewalls provide the durability you need to hit the park until that new trick is locked down.

### Sight

Whether your days on the hill involve lapping the park, railing rails, or sessioning the pipe, the Sight’s narrow waist and responsive feel inspire creativity and progression. Our Carbon Boost construction gives this ski the agility to satisfy any dedicated rail specialist who lives for technical tricks, and it’s even available in shorter lengths for smaller skiers who are looking to make a big impact.

### Poacher

A favorite among K2’s freestyle athletes, the Poacher is a common sight atop X Games and Dew Tour podiums. While it excels in the spotlight of major contests, this park ski is sturdy enough to dominate the seasoned late-night street sessions. Built with our Carbon Boost construction and a fir/aspen wood core, these skis deliver with tons of pop off the lip and the stability you need to stamp those deep landings.

### Pon2oon

Shane McConkey’s energy and innovation changed skiing forever, and his legacy lives on in the innovative design of the Pon2oon. Our Powder Rocker profile and a responsive fir/aspen wood core create an unsinkable ski for the deepest of days.

### Fatty

Equally at home in a starting gate or lapping soft bumps under bluebird skies, the Fatty is the precision mogul ski that will take your game to the next level. Stout, stiff, and built for competition, this ski’s pedigree can be traced back to Jonny Moseley’s Olympic gold in ‘98. These boards can bash with the best of ‘em.

### Key Features

- **Carbon Boost, TwinTech**
- **Rocker Profile**: All-Terrain Twin Rocker
- **Sizes (CM)**: 149, 159, 169, 179

- **Rocker Profile**: Full Camber
- **Sizes (CM)**: 153, 163, 173
- **Dimensions (MM)**: 97-66-82
- **Rocker**: Full Camber
- **Radius (MM)**: 19.5 @ 179
MINDBENDER TEAM

The Mindbender Team is the go-to tool for young groms who are looking to hang with the big dogs on serious freeride terrain. With a responsive Aspen veneer core and variable All-Terrain Rocker, these are the perfect skis for your little ripper.

KEY FEATURES
- Hardwax, TEAM Fan Tail

CONSTRUCTION
- Tip: Hybritech
- Tail: Hybritech

ROCKER PROFILE | ALL-TERRAIN ROCKED
- Short, Low Rise
- Flat camber

SIZES (CM): 145, 155, 165
DIMENSIONS (MM): 127-98-116
ROCKER: All-Terrain Rocked
RADIUS (M): 14.3 @ 153
CORE: Aspen Veneer
BINDING: Marker FDT 7.0

POACHER JR

Taking a cue from the full-size Poacher, the Poacher Jr offers the same freestyle stance and feel for young skiers dreaming of X Games podiums. Thanks to a poppy aspen wood core and durable cap construction, these skis are built for endless park laps, all season long.

KEY FEATURES
- Full Wood Core, 3D profiled tail

CONSTRUCTION
- Tip: Hybritech, Tapered Tip
- Tail: Hybritech, Tapered Tail

ROCKER PROFILE | SPEED ROCKER
- Short, Low Rise
- Flat camber

SIZES (CM): 109, 119, 129, 139, 149
DIMENSIONS (MM): 102-75-96
ROCKER: Speed Rocker
RADIUS (M): 10 @ 129
CORE: Aspen
BINDING: Marker FDT 4.5, FDT 7.0

WAYBACK JR

The Wayback Jr is the go-to tool for any grom looking to spend some time on the skin track. With a nimble Paulownia Tour Light core, versatile 84mm waist and All-Terrain Rocker, this is a smaller version of our steadfast Wayback 84, built for the future trailblazer.

KEY FEATURES
- Snophobic Topsheet

CONSTRUCTION
- Tip: Hybritech, Full Height Twin-Tip
- Tail: Hybritech, Full Height Twin-Tip

ROCKER PROFILE | ALL-TERRAIN TWIN ROCKER
- Short, Low Rise
- Flat camber

SIZES (CM): 126, 136, 146
DIMENSIONS (MM): 118-84-106
ROCKER: All-Terrain Twin Rocker
RADIUS (M): 11.2 @ 136
CORE: Paulownia Tour Light
BINDING: Marker FDT 4.5, FDT 7.0

DISRUPTION JR

Made for kids who know how to rail a turn. For those on the racecourse or chasing Mom and Dad on early morning groomers, the Disruption Jr is the plank for your little ripper.

KEY FEATURES
- Full Wood Core, Triaxial Braid

CONSTRUCTION
- Tip: Hybritech
- Tail: Hybritech

ROCKER PROFILE | SPEED ROCKER
- Short, Low Rise
- Flat camber

SIZES (CM): 134, 144, 154
DIMENSIONS (MM): 104-68-88
ROCKER: Speed Rocker
RADIUS (M): 16 @ 144
CORE: Aspen
BINDING: Marker FDT 7.0

DREAMWEAVER

Your little one hits every single side hit and jump in sight. She might even look up to the older girls ripping park laps and putting the boys to shame. If she’s on a mission to learn 180s, slide boxes, and jib around the entire mountain, snag her a pair of Dreamweavers. With a durable cap construction and full wood core, she’ll be developing the skills to be in podium contention sooner than you might think.

KEY FEATURES
- Full Wood Core, 3D profiled tail

CONSTRUCTION
- Tip: Hybritech, Full Height Twin-Tip
- Tail: Hybritech, Full Height Twin-Tip

ROCKER PROFILE | ALL-TERRAIN TWIN ROCKER
- Short, Low Rise
- Flat camber

SIZES (CM): 109, 119, 129, 139, 149
DIMENSIONS (MM): 102-75-96
ROCKER: All-Terrain Twin Rocker
RADIUS (M): 10 @ 129
CORE: Aspen
BINDING: Marker FDT 4.5, FDT 7.0
**JUVY**
When it's time for your grom to step up to a more capable pair of kids' skis, look no further than the Juvy. A lightweight composite core and durable cap construction make for a reliable ski that won't break the bank.

**KEY FEATURES**
- Duracap Construction
- Tip Tail Construction
- SIZES (CM): 109, 119, 129, 139
- DIMENSIONS (MM): 97-72-93
- ROCKER: Catch Free Rocker
- RADIUS (M): 8 @ 129
- CORE: Composite
- BINDING: Marker FDT 4.5, FDT 7.0

**MISSY**
Your little girl has outgrown those rental skis and is ready for a pair of her own. Featuring Duracap construction and a lightweight composite core, the Missy won't hold her back as she builds her skills and confidence.

**KEY FEATURES**
- Duracap Construction
- Tip Tail Construction
- SIZES (CM): 109, 119, 129, 139

- ROCKER: Catch Free Rocker
- RADIUS (M): 8 @ 129
- CORE: Composite
- BINDING: Marker FDT 4.5, FDT 7.0

**INDY**
When your little guy is ready to click into his very first pair of skis, the Indy will have him grinning ear to ear. Catch Free Rocker provides an intuitive ski experience, ensuring even the youngest family member can catch the ski bug early on in life.

**KEY FEATURES**
- Duracap Construction
- Tip Tail Construction
- SIZES (CM): 76, 88, 100, 112, 124, 136
- DIMENSIONS (MM): 96-70-86
- ROCKER: Catch Free Rocker
- RADIUS (M): 9 @ 112
- CORE: Composite
- BINDING: Marker FDT 4.5, FDT 7.0

**LUV BUG**
Pass your love of skiing on to your little girl with the Luvbug. If your little girl is ready to click into her very own pair of skis, you're in the right place. The Luvbug is purpose-built and sturdy with Catch Free Rocker and a composite core, so it will stand up to year's of fun on the hill.

**KEY FEATURES**
- Duracap Construction
- Tip Tail Construction
- SIZES (CM): 78, 88, 100, 124, 136
- DIMENSIONS (MM): 90-70-86
- ROCKER: Catch Free Rocker
- RADIUS (M): 9 @ 112
- CORE: Composite
- BINDING: Marker FDT 4.5, FDT 7.0
MINDBENDER TEAM

The Mindbender Team is new for Fall 2022 and stacked with performance. We upped the flex rating to a sturdy 140 and kept the weight down to create a boot that’s stiff, powerful, nimble, and ready to take on any lift-assisted or backcountry endeavor. Take control of the mountain with our fully customizable Powerfit Pro Tour liner, Powerlite Shell, and a huge 50-degree range of motion walk mode.

### MINDBENDER 100

The Mindbender 100 is a medium-volume workhorse built for the intermediate resort skier looking to break into the backcountry. A Luxfit Tour liner, tech fittings, and a walk mode with a 50-degree range of motion ensure all-day comfort on the skin track, while a heat-moldable Powerlite shell will keep you going strong through those bell-to-bell days of the resort.

**KEY FEATURES**
- Powerlite Shell, Powerlock Spyne, FastFit Instep, fully heat-moldable, Integrated Tech Fittings, Friction Free Cuff Pivot

### MINDBENDER W TEAM

Our team of all-star female skiers spoke, and we listened. The Mindbender Team Women’s is the stiffer women’s Mindbender boot we’ve made to date. A flex rating of 125, a fully heat-moldable PowerFit Pro Tour liner, and integrated tech fittings compatible with any alpine touring binding combine to create a one-boot quiver for long-lasting performance in the backcountry or the resort.

**KEY FEATURES**
- Powerlite Shell, Powerlock Spyne, FastFit Instep, fully heat-moldable, Integrated Tech Fittings, Friction Free Cuff Pivot, Power Plate

### MINDBENDER 95 W

Featuring a more approachable flex rating without skimping on features, the women’s specific Mindbender 95 W offers the customizable fit you need to take on the entire mountain. This boot’s tech fittings and walk mode with a 50-degree range of motion ensure you’re ready for whatever the mountain has in store, whether on the uphills or out.

**KEY FEATURES**
- Powerlite Shell, Powerlock Spyne, FastFit Instep, fully heat-moldable, Integrated Tech Fittings, Friction Free Cuff Pivot

### MINDBENDER 115 W

The Mindbender 115 W is built for women who need one boot to rule the resort and the backcountry. A stiff 115 flex, heat-moldable Powerlite shell, tech fittings, and a walk mode boasting a 50-degree range of motion guarantee you’ll be ready for whatever the mountain has in store, whether on the uphills or out.

**KEY FEATURES**
- Powerlite Shell, Powerlock Spyne, FastFit Instep, fully heat-moldable, Integrated Tech Fittings, Friction Free Cuff Pivot
The all-new Recon Team is the Recon Pro’s rebellious twin. Featuring the same stout 140 Flex and fully customizable PowerFit Pro liner, this ultra-precise high-performance boot features integrated tech fittings at the toe of the boot for full compatibility with the new generation of freeride tech bindings. Now go hit that line you’ve had your eye on all season.

Forgotten out of our award-winning Powerlite shell and sporting a stout 140 flex, the Recon Pro is the powerful performance boot you’ve been waiting for. Featuring our Powerfit Pro liner, a 98mm last, and fully heat-moldable shell, this boot offers top-end performance – from buttery, technical lines to pulling g-forces on the contours – while tipping the scales at a svelte 1740g.

Delivering power and precision at an ultra light 1700g, the Recon 130 is equipped with a heat-moldable shell, aggressive 130 flex rating, our top-of-the-line Powerfit Pro liner, GripWalk outsoles, and a Fastfit Instep. Proof that added performance doesn’t have to mean added weight, this award-winning boot is back for another year and ready to rally. Available in 98mm (LV) and 100mm (MV) lasts to accommodate a wide variety of foot shapes.

Don’t be in fear of early mornings and freezing temps. The Recon 120 HEAT offers all the same performance features of our Recon 120 with the added comfort of a Bluetooth-controlled Therm-ic heated liner. Combined with a 120 flex rating, heat-moldable shell, and 100mm last, this boot will have you spinning early-morning laps in the dead of winter without a second thought. Available in 98mm (LV) and 100mm (MV) lasts to accommodate a wide variety of foot shapes.

Whether you’re rallying early-morning groomers or slamming slush bumps late in the day, you need a boot that offers snap-quick response and a consistent flex. Sporting GripWalk outsoles, a heat-moldable shell, and our Precisionfit Pro liner, the Recon 120 offers all the customizable features and classic fit of the box you want, but without the punishing flex rating. Available in 98mm (LV) and 100mm (MV) lasts to accommodate a wide variety of foot shapes.
RECON 90

The all-new Recon 90 is designed for beginner to intermediate skiers looking to make the leap from comfort boots to some higher-performance footwear. A medium-volume fit provides greater precision and control than your old high-volume boots, but the 90 flex rating is still gentle on your shins when the snow gets choppy. Throw in our proven, heat-moldable Powerlite shell and you’ve got a boot that packs heaps of customization and value into a sleek package that won’t hold you back.

RECON 100

When it’s time to step up your boot game to something more performance-oriented, nothing is more important than the fit. The heat-moldable shell of the Recon 100 offers the customization you need, while the medium-volume shell and 100 flex rating are easy on your feet and legs. Take your skills to new levels with the Recon 100. Available in 84mm (LG) and 100mm (MV) shell sizes to accommodate a wide variety of foot shapes.

ALL NEW DISPATCH FREETOUR BOOTS
FEATURING ULTRA DURABLE CUSTOMIZATION

Building on the performance of the Powerlite shell. The All-New Dispatch collection features a lightweight Powerlite Tour shell and adds in smart and proven freetour features that focus on lightweight durability, simplicity and customization.

- 60 DEGREE HIKING ROM
- 9-15 DEGREES OF FORWARD LEAN ADJUSTABILITY
- HONEYCOMB BOOTBOARD
- SWITCHBACK BUCKLES
- DYNAFIT TECH FITTING
- VIBRAM OUTSOLE

INTRODUCING
THE HONEYCOMB BOOTBOARD
STAY WARMER, LONGER.

The Honeycomb Bootboard was specifically designed to keep you warmer, longer. The innovative honeycomb design traps heat and insulates like a down jacket. Retains heat 15% better than traditional bootboard. Is lightweight, customizable and boot-fitter friendly.

ALL-NEW
DISPATCH PRO

Brand new for Fall 2022, the Dispatch Pro is an ergonomic boot that weighs in at just 1500 grams. It boasts a Vibram sole, 60-degree range of motion walk mode, our new TourFit BOA liner, and a full 130 flex rating that makes for one of the stiffest touring-specific boots on the market. Experience zero compromises in both downhill and uphill performance on your next big objective.

The all-new BFC 120 is for experienced skiers who need a bit more room in their ski boots but don’t want to compromise on support and responsiveness. With a 103mm last and a performance-oriented 120 flex, these boots are packed with features like our new and improved Cushfit Pro liner, updated aprés Mode, a new Heat-Moldable shell, and a roomy 24.5-30.5 size range, all of which add up to a boot that can be relied on while providing all-day comfort.

**KEY FEATURES**
- Aprés Mode 2.0
- Updated Hands Free Entry
- Cushfit Pro liner
- Heat-moldable shell
- 24.5-30.5 size range

**FLEX / FEEL**
- Flex rating: 120
- Last Width (mm): 103
- Best flex: 1900
- Shell Material: TPU
- Cuff Material: Polypropylene (PP)
- Liner: Cushfit Pro
- Strap: 40mm Velcro
- Outsole: Polyurethane
- Size Range: 23.5-30.5

---

The all-new BFC 100 HEAT maxes out the comfort meter with its 103mm last, sleek heat-moldable shell, improved Aprés Mode walk mode, and Bluetooth-controlled heated Therm-ic liner. High-tech, easy to get into, and built for comfort, this medium-flexing boot is the ticket for skiers looking for the ultimate in warmth and convenience.

- Outsole: Polyurethane
- Size Range: 24.5-30.5
### BFC 80
The all-new BFC 80 is for beginner skiers looking to skip the rental counter and commit to their first pair of ski boots. A mellow flex rating, roomy fit, Hands Free Entry, and a new, slender heat-moldable shell mean your feet will be swathed in luxurious comfort, allowing you to focus on getting to those steeper runs on the upper mountains.

### BFC W 105
Out of the box comfort meets true on-snow performance in the all-new BFC W 105. Designed for advanced female skiers who prefer a roomier fit, the brand new CushFit Pro liner, slimmed-down heat-moldable shell, updated Après Mode, and precise 105 flex rating combine to create a boot that accommodates a wide variety of feet without sacrificing the support and responsiveness that experienced skiers demand.

### BFC W 95
Slide into the all-new BFC W 95 and see what comfort-driven performance is all about. With a 95 flex rating, wide 103mm last, our CushFit liner, and a sleek heat-moldable shell, these boots are the definition of comfort and responsiveness. The new in our updated Après Mode for easy walking in and from the slopes, and you’ve got the most comfortable full-featured boot on the mountain.

### BFC W 95 HEAT
What could be better than the supportive 95 flex rating, roomy fit, and all the bells and whistles of our full-featured BFC W 95? How about adding a Bluetooth-controlled heated Therm-ic liner to the equation? The BFC W 95 HEAT takes comfort and convenience to a new level, keeping your feet warm and toasty and allowing you to ski all day, no matter how nasty the weather.

With two sturdy buckles, these boots feature added performance and value as your little ripper starts looking beyond the bunny hill.

**FLEX / FEEL**

**KEY FEATURES**

- Easy on/off
- Replaceable outsoles

**INDY 1 / LUVBUG 1**

Choosing boots for the kids can be tough, but these one-buckle boots are easy to slip on and off, keeping things painless when you get to the mountain in the morning.

**FLEX / FEEL**

**KEY FEATURES**

- Easy on/off
- Replaceable outsoles

Freeride Flipjaw

Forged out of tough 7075 aluminum and featuring 42’s proprietary Flipjaw locking mechanism, the Freeride Flipjaw seamlessly transitions from early-morning skin tracks to afternoon resort laps. Ditch those featherweight touring poles for something that is equally at home on the skin track and the chairlift.

**FLEX / FEEL**

**KEY FEATURES**

- Flipjaw Adjustment Mechanism
- Freeride Dual Injection

Dispatch

From the skin track, to the camp site, to the second skin track, to the descent, you can count on the Dispatch pole to deliver comfort and lightweight performance every step of the way. Constructed from durable 7075 aluminum, the Dispatch pole features the new articulating powder basket so that you can be equipped for whatever the day has to offer.

**FLEX / FEEL**

**KEY FEATURES**

- Grip - Freetour Grip with Emergency Release Strap
- Articulating 2.0 Powder Basket
- Velcro Adjustable Strap

Freeride 18

With a comfy dual injection rubber grip and a bombproof 18mm diameter aluminum shaft, the Freeride 18 is built to last. Listen, you can get some crazy poles and whistles on poles these days, all you really need is a comfy grip paired with durable aluminum. Keep things sturdy and simple - grip in with the Freeride 18.

**FLEX / FEEL**

**KEY FEATURES**

- Freeride Dual Injection
- Adjustable 18mm Aluminum

FREERIDE 16

With a comfy grip and lightweight 14mm aluminum shaft, the Freeride 16 is built with female skiers in mind. Whether you’re hitting pow stashes far from the lift or shoving off for another park lap, reach for the reliable Freeride 16 and set the good times roll. Available in shorter lengths for smaller skiers.

KEY FEATURES
- Velcro Adjustable Strap

POWER CARBON

All carbon ski poles are basically the same, right? Wrong. Take a look at the lightweight Power Carbon — with a slick pole strap adjustment system and ultra-comfy Ripcord grip, you’ll be wondering what exactly you’ve been wrapping your fingers around all these years. You’re picky about your ski, boots, and goggles — why not be just as discerning when it comes to your gear?

KEY FEATURES
- 100% Composite
- Carbon Web

POWER COMPOSITE

With a thermo-formed Performance Rubber grip and lightweight yet-durable 16mm composite shaft, the Power Composite represents the perfect balance between lightweight performance and durable practicality.

KEY FEATURES
- Performance Rubber

POWER ALUMINUM

Save some coin without sacrificing proper pole plants. You might have just used “whatever is lying around” in the past, but that ain’t cutting it now. Get your hands on a pair of durable Power Aluminum poles, featuring a robust 18mm diameter shaft, and push off into your next on-mountain adventure.

KEY FEATURES
- Nesting Baskets

STYLE CARBON

Harnessing the comfort and customizability of our Ripcord grip, the Style Carbon offers a featherweight feel and full-carbon shaft for female skiers who demand the best from their gear. Understated styling, lightweight performance, and the durability to last for seasons of use. Available in shorter lengths for smaller skiers.

KEY FEATURES
- Carbon Composite

STYLE COMPOSITE

The Style Composite is K2’s sensible, lightweight pole offering for the ladies. Equipped with an ergonomic Performance Rubber grip and a 16mm shaft diameter that reduces weight without sacrificing durability, these poles will have you focusing on your skiing, not your gear. Available in shorter lengths for smaller skiers.

KEY FEATURES
- Composite
**STYLE ALUMINUM**

For the female skier who doesn’t want to worry about the durability of her ski poles, we offer the Style Aluminum. Built with a strong but lightweight 16mm aluminum shaft, these poles strike the perfect balance of reliable performance and incredible value. Available in shorter lengths for smaller skiers.

**KEY FEATURES**
- Nesting Baskets
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable Carbon Upper 7075 Aluminum Lower
- BASKET: Articulating 2.0 Power Adjustable: 90-130
- SIZES (CM): 75, 80, 85, 90, 95, 100, 105
- COLORS: Sage, Purple

**LOCKJAW CARBON PLUS**

You’ve been checking the forecast, and everything is lining up. Stable, cold snow is just a few hours’ ski from the trailhead. Round up the Lockjaw Carbon Plus and take a hike (or a good ride). With an extended Adventure Ultra Light EVA foam grip, articulating powder baskets, and proven Lockjaw G3000 locking mechanism, the Lockjaw Carbon Plus poles are all-adventure-ready, no wimpy sticks to keep you upright.

**KEY FEATURES**
- Lockjaw 6000 Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable Carbon Upper 7075 Aluminum Lower
- BASKET: Articulating 2.0 Power Adjustable: 105-145
- SIZES (CM): 85, 90, 95, 100, 105
- COLORS: Grey

**LOCKJAW CARBON**

With a carbon upper and aluminum lower, the Lockjaw Carbon is ready for big days in the backcountry. Featuring our bombproof Lockjaw G3000 adjustment mechanisms and elongated EVA foam grips for easy handling, the Lockjaw Carbon proves that poles are more than just pointy sticks to keep you upright.

**KEY FEATURES**
- Lockjaw 6000 Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable Carbon Upper 7075 Aluminum Lower
- BASKET: Articulating 2.0 Power Adjustable: 105-145
- SIZES (CM): 85, 90, 95, 100, 105
- COLORS: Off White, Sea Foam

**SWIFT STICK**

The Swift Stick is a four-piece, collapsible, adjustable pole designed for summer treks or the skin track. Featuring our Flipjaw telescoping design, Adventure EVA foam grip, and sturdy aluminum construction, the Swift Stick will be your number one companion, regardless of the season.

**KEY FEATURES**
- Flipjaw Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable 7075 Aluminum
- BASKET: Articulating 2.0 Power Adjustable: 110-130
- SIZES (CM): 110, 120
- COLORS: Grey

**SPROUT**

Nothing is worse than buying a bunch of gear for your kid, only to have them outgrow it within a year. Pick up the adjustable Sprout and rest easy, knowing that your pint-sized shredder’s poles will last for more than a season.

**KEY FEATURES**
- Flipjaw Adjustment Mechanism, Freetour Grip w/ Emergency Release Strap
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable 14mm Aluminum Upper/16mm Aluminum Lower
- BASKET: 50mm Performance
- SIZES (CM): Adjustable: 75-105
- COLORS: Off White, Sea Foam

**DECOY / CHARM**

With two colorways – his and hers – the Decoy and Charm poles add a dash of style to any kid’s setup. Plus, these poles are built out of sturdy aluminum, meaning they can withstand the roughest of on-snow antics.

**KEY FEATURES**
- Nesting Baskets
- GRIP: Freetour Grip w/ Emergency Release Strap
- SHAFT: Adjustable 7075 Aluminum
- BASKET: Articulating 2.0 Power Adjustable: 105-145
- SIZES (CM): 105, 110, 115, 120
- COLORS: Black, Taupe
From chasing the sneaky hidden honey holes deep in the trees, to high-speed arcing on afternoon groomers, the last thing you want to worry about is protecting your most precious asset (that’s your brain). Now available with an optional MIPS liner for increased protection, the Diversion rocks a low-profile design, 360 K2Dialed fit, and Dual Active Matrix venting so you’ll forget that you’re even wearing a helmet.

**ROUTE**

It’s the best-kept secret in the helmet game today. With integrated headlamp clips, a Boa fit system, and tons of ventilation, you’ve got everything you need for those all-day backcountry adventures. But here’s the kicker: it only weighs 320 grams. That’s it. There’s a reason some of the best ski mountaineers in the world choose the Route.

**Stash**

From the trail to the park and everything in between, the Stash is the freeride helmet that keeps things low-profile and discrete. No bolt-on visors or chunky ventilation sliders. It protects your head, fits great, and looks sleek even when it’s not. Put it on and push out.

**PHASE MIPS**

Spin in the perfect fit with the Phase helmet, now available with an optional MIPS liner for increased protection. Subtle contouring and perfectly placed Active Matrix ventilation combine for under-the-radar styling, functional fit, and supreme comfort.

**PHASE PRO**

Spin in the perfect fit with the Phase helmet, now available with an optional MIPS liner for increased protection. Subtle contouring and perfectly placed Active Matrix ventilation combine for under-the-radar styling, functional fit, and supreme comfort.
THRIVE

Spice up your cranial accessories game with the Thrive helmet. This stylish lid adds a subtle visor brim, in case you’re into that sort of thing. And the best part? It’s bike-certified, so you can double duty from the city to the slopes.

### KEY FEATURES

**MINDBENDER RX**
- **Construction**: I-Beam, Hybritech
- **Rocker Profile**: Speed Rocker
- **Dimensions (mm)**: 126-76-110
- **Rocker**: Short, Low Rise
- **Radius (m)**: 14.4 @ 170
- **Core**: Aspen Light

**DISRUPTION RX**
- **Construction**: I-Beam, Hybritech
- **Rocker Profile**: Speed Rocker
- **Dimensions (mm)**: 126-73-108
- **Rocker**: Short, Low Rise
- **Radius (m)**: 15.2 @ 174
- **Core**: Aspen Veneer

**DISRUPTION SPEED RX**
- **Construction**: I-Beam, Hybritech
- **Rocker Profile**: Speed Rocker
- **Dimensions (mm)**: 130-85-113
- **Rocker**: Low, Gradual Rise
- **Radius (m)**: 12.1 @ 163
- **Core**: Aspen Veneer

### RENTAL RENTAL RENTAL
**SPEED RENTAL**

**VERDICT RENTAL**

**ENTITY RENTAL**

**JUNIOR RENTAL**

**SPROUT RENTAL**

**SKI TECH**

**ROCKER**

Once thought of as a powder-specific feature, K2 pioneered the use of rocker on all-mountain and piste skis, with the rest of the ski industry following in our footsteps. Today, almost all of our skis are built with rocker, with the height and length optimized on each model for maximum performance and enjoyment.

**CORES**

K2 uses a variety of wood species in our cores to fine-tune the performance characteristics of each ski.

- **ASPEN**
  - Lightweight and resilient. Great all-around core material.

- **FIR**
  - Energetic, tough, dense wood that absorbs impacts well.

- **BALSAM**
  - Ultra-light and expansive balsam used in the cores of our lightest touring ski, the Wayback 80.

- **PAULOWNIA**
  - Light, flexible wood with excellent strength-to-weight ratio.

- **MAPLE**
  - Dense hardwood with excellent power transfer and stability.

**ROCKER TYPES**

- **SPEED ROCKER** - Short, low rise in the tip with camber throughout and a flat tail for quick turn initiation, precise steering, and maximum stability on groomed snow.

- **PONGER ROCKER** - High and long rise in the tip, low camber underfoot, and a medium-height, long rise in the tail for maximum float in soft snow.

- **PONGER TWIN ROCKER** - High and long rise in both the tip and tail for maximum float in soft snow.

- **ALL-TERRAIN ROCKER** - Gradual rise in the tip for great versatility in all conditions, with a low, short rise in the tail for added control in variable snow.

- **ALL-TERRAIN TWIN ROCKER** - Gradual, extended rise in the tip and tail for added versatility and control in all conditions.

- **CATCH-FREE ROCKER** - Effortless turn initiation at slow to moderate speeds thanks to a medium-height, gradual rise in the tip and a low, gradual rise in the tail.
DARK MATTER DAMPING
A polymeric damper sandwiched between two layers of high-modulus carbon, strategically placed along the ski edge to eliminate high-frequency vibrations, providing drastically increased edge grip at high speeds.

POWERWALL
Power transfer to the ski’s edges is dramatically enhanced with oversized ABS sidewalls that are laminated and pocketed within the wood core in the midbody of the ski.

TITANAL I-BEAM
Titanal runs tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.

T7 I-BEAM
Built with 100% more metal than our proven Titanal I-Beam construction, T7 I-Beam adds an additional layer of metal on top of the ski core, providing the ultimate in stability, dampness, and precision when hitting top speeds on groomed snow.

CARBON I-BEAM
Full length unidirectional carbon running from tip to tail, providing increased accuracy and energy along the entire length of the ski with a lighter, livelier feel than our Titanal I-Beam.

TORSION CONTROL DESIGN
Designed to enhance stability, and control in all snow types, Torsion Control Design combines a progressive torsional flex with a balanced and even longitudinal profile. Torcically stiffest in the forebody and center of the ski, then relaxing throughout the tail, K2 skis with TCD are characterized by precise, accurate turn initiation and smooth, consistent turn release. TCD can be found on Mindbender and Mindbender Alliance skis, utilizing either Titanal Y-Beam or Spectral Braid construction.

TI² I-BEAM
Built with 100% more metal than our proven Titanal I-Beam construction, TI² I-Beam adds an additional sheet of metal on top of the ski core, providing the ultimate in stability, dampness, and precision when hitting top speeds on groomed snow.

SPECTRAL BRAID (MINDBENDER AND MINDBENDER W COLLECTIONS)
Another implementation of K2’s Torsion Control Design, patented Spectral Braid is a first-of-its-kind variable angle fiber reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and composed, skis with K2’s Spectral Braid have stability and control in spades while remaining extremely maneuverable.

SLANTWALL
Adding a 30-degree angle to the sidewall in K2’s Hybritech construction, Slantwall increases a ski’s agility and responsiveness while maintaining accuracy and power.
**SNOPHOBIC TOPSHEET**
Hydrophobic snow-shedding topsheet material that helps prevent snow buildup.

**CORRECT FLEX**
A proprietary process involving custom core profiling combined with a composite insert retained within the top of the core in the middle of the ski to ensure consistent flex characteristics across all lengths of a given model of ski.

**TRIAXIAL BRAID**
Patented process that interlocks strands of fiberglass around a milled wood core for pronounced torsional strength while retaining the superior flex patterns inherent in a wooden ski.

**METAL LAMINATE**
Metal laminate construction, denoted by “Ti” in a ski’s model name, uses a custom-shaped sheet of Titanol in the ski’s layup to provide a damp, precise, and accurate feel.

**HYBRITEX**
Sidewall construction underlay blended with a cap construction in the tip and tail. The sidewall section gives the ski accuracy, power, and edge grip, while the cap construction regions reduce swing weight.

**DURACAP**
A molding process that envelops the core and internal materials with the top layer of the ski. Duracap skis are generally lighter and more forgiving than skis utilizing other construction methods.

**TWINTECH**
A durable, full-sidewall construction providing great edge feel and performance with added topsheet resistance to impact damage.

**XCOMP**
XCOMP 16 - Premium construction and technology, including magnesium components for precise steering and control. XCOMP dampening technology eliminates fast, hard impacts and keeps the boot perfectly centered.

**MXCELL**
MXCELL 12 TCx - Designed for maximum power transmission between ski and boot with the MXCELL Piston Technology toe piece to keep the boot centered during quick jolts, and the TCx heel for control and precise performance.

**M3 10 COMPACT**
M3 10/11 COMPACT - A lightweight binding system with the Triple Pivot Comfort toe and a compact heel for comfort and a secure feel.

**ER3 10 COMPACT**
ER3 10 COMPACT - A lightweight binding system with the Triple Pivot Comfort toe and a compact heel for comfort and a secure feel.

**ER3 10 X LIGHT**
ER3 10 X LIGHT - The lightest women’s binding system offered, with easy entry and targeted functionality for beginner skiers.

**ERP 10**
ERP 10 - The lightest women’s binding system offered, with easy entry and targeted functionality for beginner skiers.

**GRIIPWALK SYSTEM**
GRIFFIN™ SYSTEM - Now featured on all bindings. Patented ISO 9023 inner sole boot and binding system designed for better grip and added walking comfort without compromising the binding’s power transmission and release function.
2 PIECE BOOT TECH

SHELLS

POWERLITE SHELL

K2's highest performance shell design, utilizing shell walls of varying thicknesses and four different types of TPU to provide the ultimate combination of light weight and responsiveness.

POWERLITE TOUR SHELL

LINERS

BOA TOURFIT LINER

Open Air System increases adjustability and even heat across the entire foot. Features stiffer foam with asymmetric torque for added power and energy transmission. Completely heat moldable with pre-molded ankle pocket.

TOURFIT LT

Lightweight construction that offers same performance features as the pro model. Stiffer foam with asymmetric torque for added power and energy transmission. Completely heat moldable with pre-molded ankle pocket.

POWERFIT PRO TOUR

Pre-molded and lasted with ultralight heat-moldable foam. Featuring stiffer foam and a stiffer, asymmetric torque for added power and energy transmission, pre-molded ankle pockets, and mid-density power collar for a firm-but-comfortable performance fit.

PRECISIONFIT PRO

Pre-molded and lasted with ultralight heat-moldable foam. Featuring an asymmetric torque, pre-molded ankle pockets, and mid-density power collar for a firm-but-comfortable performance fit.

POWERFIT PRO

Pre-molded and lasted with ultralight heat-moldable foam. Featuring stiffer foam and a stiffer, asymmetric torque for added power and energy transmission, pre-molded ankle pockets, and mid-density power collar for a firm-but-comfortable performance fit.

LUXFIT PRO

Pre-molded and lasted with ultralight heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort.

LUXFIT PRO TOUR

Pre-molded and lasted with ultralight heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort. Includes a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

CUSHFIT

Lasted with a blend of open-cell and EVA foam for an extremely comfortable, warm, and supportive fit.

CUSHFIT PRO

Maintains the renowned comfort of the original Cushfit liner, but with a notable increase in support and performance thanks to the use of Ultralon foam, similar to what is used in our Powerfit Pro and Precisionfit Pro liners.

CUSHFIT COMFORT

Same great fit and feel of the box fit as our classic Cushfit liner, but with additional foam in key areas for increased comfort and durability.

CUSHFIT JR

A scaled-down version of our adult Cushfit liner built for your youth boots.

FEATURES

PEBA

Lightweight, eco-friendly material used in the cuff of select boot models for energetic and consistent flex across a wide range of temperatures.

FASTFIT WEBSTEP

Softier TPU material in the indentation area of select models’ shells for quick and easy entry and exit.

HANDS FREE ENTRY

Dual material overlay for hassle-free entry and exit.

ENERGY INTERLOCK

A true-free technology that integrates the cuff and shell, providing a low arch on the boot’s lower shell and producing a smooth, progressive flex.

POWERFUSS SPINE

An exceptionally shaped support in the rear of the boot that adds strength and power to the Energy Interlock in order to maximize turn-hold, flex efficiency, and lateral stiffness, providing enhanced responsiveness and energy transfer to the ski.

CUFF ALIGNMENT INDEX

Single-sided alignment system for +/- 1 degree of lateral cuff adjustment.

DUAL CUFF ALIGNMENT INDEX

Dual-sided alignment system for +/- 2 degrees of lateral cuff adjustment.

FULLY HEAT-MOLDABLE

Both the boot’s shell and cuff are capable of being heat-molded to a variety of foot shapes for a true custom fit.

WOMEN’S-SPECIFIC LAST

A lower, calf height, lower-volume shell, and narrower heel to accommodate women’s lower leg and foot shapes.

WOMEN’S ADJUSTABLE CUFF

Allows for quick adjustment of the cuff opening to accommodate a variety of lower leg shapes.

APRÈS MODE 2.0

A new, improved walk mode offering a massive 50-degree range of motion. A lever on the back of the boot unlocks the upper cuff from the lower shell, allowing for increased comfort and convenience when walking from the car to the lift.

POWERLOCK SPINE

A performance-oriented walk mode designed for ski touring that offers a 50-degree range of motion. When in ski mode, Powerlock Spyne provides a powerful and secure connection for uncompromised downhill performance.

INTEGRATED TECH FITTINGS

Tech fittings in the toe and heel are fully integrated into the shell injection, allowing for compatibility with both tech bindings and Alpine DIN bindings.

FRICTION FREE CUFF PIVOT

An easy-hinging cuff pivot designed to provide minimal resistance while in walk mode.

GRIPWALK OUTSOLES

Removable and interchangeable rubber soles designed to work with Marker’s GripWalk binding system for better grip and comfort while walking, standing, and hiking.

REPLACEABLE OUTSOLES

Dual-injected TPU for secure footing, direct power transfer to the ski, and increased wear resistance.

CANTABLE OUTSOLES

Shoes can easily be placed underneath the outsoles to cant the boots for a customized fit.

MAGNETIC PUNCH

A strategic bump built into the boot most to alleviate pressure commonly experienced during ankle flexion.

ASYMMETRICAL TOE BOX

Fitsthe natural curvature of your toes for added comfort food to ensure a Proper fit.

POWER WEDGE

A removable spiker that fits between the liner and the back of the boot cuff that allows for adjustment of the boot’s forward lean angle, ranging from 12 to 16 degrees.

THEMIC IC BLUETOOTH HEATED LINER

Control your Themic IC heated boot liner using the free Themic IC heat Control app on your smartphone. Available for iPhone and Android devices.

SWITCHBACK BUCKLE

Buckles lock in the forward position when touring to increase ROM. Toe buckles flipped on top of boots for increased clearance in variable terrain. Magnesium buckles and wire ties for additional weight savings.

DYNASTY TECH FITTING

Grosfiltech fittings in the toe and heel are fully integrated into the shell injection.

VIBRAM OUTSOLE

Designed with adventure in mind. Superior grip and durability. Kit exclusive tread pattern. SG23 as DIN.

HONEYCOMB BOOTSBOARD

POWERLOCK 2.0 WALK MECHANISM

Improved walk mechanism with locking lever. 0-15 degrees of forward lean adjustability and 60 degrees ROM.
REVOLVER
Revolver Shell, offers the same fit and feel as the Raichle boots of years past, updated to withstand the rigors of today. Precise, snug, and proven, this 99mm last shell has become the definitive freestyle boot of the modern era.

REVOLVER PLUS
The Revolver Plus Shell takes the same 99mm last and opens up the toe box for a roomier feel out of the box. The Pillar Shell uses the original 3-piece design and adds replaceable soles for extended longevity and increased traction.

METHOD
The Method Shell adds much needed depth to the FL3X line. Designed for those with a wider foot, the Method shell incorporates a higher volume fit and a 102mm last.

DIVERGE TOUR
The Diverge Tour Shell offers a smooth stride and articulated purchase in any situation. Walk farther and more comfortably than ever before. Featuring a higher back cuff and lightweight Grilamid™ plastic, this construction will take you anywhere.

INTUITION WRAP
The Intuition Wrap Liner's laminates are specifically engineered to be our lightest weight liner for increased maneuverability while maintaining it's warmth and custom moldable fit right out of the box.

INTUITION PRO TOUR TONGUE
With a Tour Flex Notch, removable external J-Bars, and lacing system, the Intuition Pro Tour Tongue makes walking a blister-free experience in an enveloping snug fit, while giving you the performance you need to send it on the downhill.

LINERS
INTUITION PRO TOUR WRAP
Slip-on the Intuition Pro Tour Wrap and get ready to motor on up the skin track. Crafted out of Intuition® Foam, and featuring a tour notch and lace-up system, the Intuition Pro Tour Wrap offers the added comfort and performance your boot is missing.

INTUITION PRO WRAP
Slip into the Intuition Pro Wrap, and experience unmatched ankle retention and pressure-free performance. Crafted out of Intuition® Foam, the Intuition Pro Wrap offers the added comfort and performance your boot is missing.

INTUITION WRAP
The Intuition Wrap Liner's laminates are specifically engineered to be our lightest weight liner for increased maneuverability while maintaining it's warmth and custom moldable fit right out of the box.

INTUITION PRO TOUR TONGUE
Crafted out of Intuition® Foam, the Intuition Pro Tour Tongue Liner's laminate is specifically engineered to provide energy transfer to the shell while maintaining warmth in a custom, moldable fit. Slip-on the Intuition Pro Tongue Liner and feel the power of the lightest performing liner that we've ever created.

INTUITION TONGUE
The Intuition Tongue Liner's laminates use multi-layered construction in a traditional tongue liner, designed to provide targeted comfort and performance in a familiar way.

INTUITION PRO TOUR TONGUE
With a Tour Flex Notch, removable external J-Bars, and lacing system, the Intuition Pro Tour Tongue makes walking a blister-free experience in an enveloping snug fit, while giving you the performance you need to send it on the downhill.

INTUITION PRO TONGUE
Crafted out of Intuition® Foam, the Intuition Pro Tongue Liner's laminate is specifically engineered to provide energy transfer to the shell while maintaining warmth in a custom, moldable fit. Slip-on the Intuition Pro Tongue Liner and feel the power of the lightest performing liner that we've ever created.

INTUITION TONGUE
The Intuition Tongue Liner's laminates use multi-layered construction in a traditional tongue liner, designed to provide targeted comfort and performance in a familiar way.

3 PIECE BOOT TECH
FEATURES
RIBBED TONGUE
100% Ribbed tongue enables smoother, more natural linear flow from your shin to your toe. The tongue bends like a flexible straw, never bottoming out while providing smooth rebound. No more shin bang!

EASY ON/OFF
The front of the shell opens a full 90º to slide your foot in and out with ease in all temperatures. Like putting on slippers!

MOLDABLE
Utilizing the QuickFit™ System, all FL3X boots – shells included – can be molded to the exact needs of your foot. Not all feet are the same, and with FL3X, we pride ourselves on creating boots that allow a personalized, 1-to-1 fit experience.

ADJUSTABLE FLEX
The boot's flex is rated on a single scale of 4-12 (12=stiffest). Change a boot's flex by simply switching the tongue. (Competitor's boots require permanent cutting.)

INFINITE PIVOT
Unlike traditional designs, the rear cuff never bottoms out. It pivots infinitely forward with your calf for less shell distortion, no shin pain and more control.

CUSTOMIZABLE
All parts are sold separately for unlimited personalization and repair using a standard phillips head screwdriver.

LADDER BUCKLE
The ladder buckle features an intuitive, easy to remember, macro-size adjustment, plus a micro-twist for fine adjustment with a light, easy-to-handle aluminum lever.

FORWARD LEAN & CUFF ALIGHMENT
Tool-less forward angle adjustment. Original & Soul shells: 2mm or 4mm. Easy, precise lateral angle adjustment. Revolver & Revolver Plus shells. 12mm.

WOMEN'S CUFF
The women's cuff is anatomically shaped to match a female's specific calf shape for increased comfort and control.

SHOCK ABSORBER BOOT BOARD
Soft rubber layer in the sole of the shell absorb vibrations, impact and shock for a smooth ride.

MIDTRACK BUCKLE
Durable aluminum lever with a minimalist lightweight design. This adjustment mechanism is engineered to increase precision and durability while maintaining on-the-fly, single-handed micro adjustment.

45 DEGREE HEEL LOCK
Keeps heels where they belong. Placing the middle buckle at an optimal 45 degree angle creates a solid lock for the heel to stay put when pressuring the tips and tails of the skis.

GRIPWALK OUTSOLE
Designed for a better purchase on unstable & slippery terrain. The convex shape and ribbed tread add both comfort & grip for getting from house to hill to peak! Sold separately. Available for Revolver Plus and Method models.
3 PIECE BOOT TECH

FEATURES CONT.

TECH FITTINGS
Compatible with all pin-tech bindings, the in-molded tech fittings open up a new world of possibilities for FL3X Boots. One boot – any objective.

MID GRIP
Whether you are climbing grated stairs or scrambling on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

TOUR HOOK
Whether you are climbing grated stairs or scrambling on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

WALK MODE
Flip the lever up to ascend with ease. And when it’s time to send it, flip the lever down, lock the cuff in place, and push into the fluid, progressive flex you’ve come to expect from FL3X. Works great for aprés bar sessions too.

DUAL MATERIAL OUTSOLES
No slipping getting in-between you and the ground. A firm TPU and a softer material combat wear and keep your feet underneath you on any surface.

POWER WRAP
An additional layer of ergonomically shaped EVAs is wrapped around the outside of the upper liner to increase energy transfer and horsepower to the shell.

J-BAR
An additional J-shaped piece of foam is inserted internally on both sides of the ankle area to dramatically increase ankle hold down, to keep your feet perfectly in place for precise control.

POWER WEDGE
Dial in your forward lean angle with this removable velcro spoiler.

WIDE TOE
A wider foam is used in the front of the liner to increase space without sacrificing control for people with wider feet or who prefer a little more toe room.

INTUITION
All boot liners are built using authentic Intuition™ closed cell foam. It is body heat activated to mold 100% to your feet and shells during use, or can be instantly heat molded by a shop in minutes for a light, warm and super comfortable fit.

WOMEN’S LINER
The women’s cuff is anatomically shaped to match a female’s specific calf shape for increased comfort and control.
**Construction**

**Freeride**

The Freeride Grip features an adjustable strap with an emergency release mechanism designed to release in the event of an accident or substantial impact. The Freeride grip also features a utility hole for convenient adjustment of risers or buckles.

**Carbon Web**

External carbon strands are precisely laminated onto the carbon shaft, creating K2’s lightest weight, most durable, and stiffest ski pole.

**Composite Construction**

Full composite construction for a great combination of weight, durability, and affordability.

**Aluminum**

High-strength aircraft-grade aluminum for a seamless, durable ski pole shaft.

**Grip**

**Ripcord Grip System**

Safety-releasable strap mechanism integrated into the top of the grip. Unique lightweight grip design eliminates all excess material. Slim, neoprene-padded, right/left specific straps for comfort and ease of entry. Push-button hinging grip top allows for easy strap adjustment and removes the need for buckles and velcro, creating our most comfortable and streamlined strap ever.

**Utility Hook**

Shallow non-shear, heel risers, and walk mode levers are no match for the utility hook grip. Flip your pole over and use the notch on the front of the grip to flip, clip, pull, and buckle up your gear on the fly.

**Adjustment**

**Lockjaw Good Adjustment Mechanism**

Completely redesigned with a 6000 series aluminum lever and a body that utilizes Teflon bushings to optimize comfort and minimal lever pressure. The Minimalist design is 20% lighter than its plastic equivalent and is the most durable non-slip adjustment mechanism available.

**Lockjaw Adjustment Mechanism**

Refined over several generations, the tried and true Lockjaw system continues to define the standard for reliable, durable length adjustment mechanisms. Simple and durable, the Lockjaw is the workhorse of K2’s adjustable pole collection.

**Flipjaw Adjustment Mechanism**

Length adjustment mechanism connecting a thinner upper shaft with a larger-diameter, more durable lower shaft.

**Collapsible Pole Technology**

Collapsible for easy storage.

**General**

**All-Season Kit**

Change up the tips and baskets of your poles without any tools to set them up for summertime backcountry exploration.

**Nesting Baskets**

Notches in the baskets to couple the pair of poles for easy carry or storage.

**Backup Probe**

Screw the lower pole segments together to create a backup probe ranging to 200cm in length.

**Powder Basket**

Powder basket with a 95mm diameter for float in deep snow. Smooth-flexing to conform to harder terrain on skin tracks and traverses.

**Articulating 2.0 Powder Basket**

The 95mm ball-and-socket articulating basket features 50 degrees of unhindered movement allowing the basket to effortlessly match the snow’s surface.
The K2Dialed fit system creates a custom-fitting helmet for any and all head shapes. An ergonomically-shaped, three-point adjustable interface maximizes fit and customization with the twist of a dial, allowing for easy fit adjustments on the fly.

**HYBRID**

This unique confection features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for increased durability and the implementation of our Advanced Active Matrix Venting.

**MIPS**

MIPS is a brain protection system integrated into select K2 helmet models that can offer increased protection in falls where the head experiences rotational forces from contacting the snow or other objects.

**IN-MOLD**

In-Mold is K2’s premium construction for ultra-lightweight performance and features an EPS liner that is molded directly to a lightweight polycarbonate shell. The result is a construction so light, you’ll forget you’re wearing a helmet.

**HARD-SHELL**

Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to a durable, injection-molded ABS shell.

**DUAL ACTIVE MATRIX**

User-regulated Active Matrix venting combined with integrated Passive Channel venting.

**PASSIVE CHANNEL**

Channels on the inside surface of the EPS liner direct airflow between your head and the helmet, removing moisture and excess heat for all-day comfort.

**ACTIVE MATRIX**

Climate control at the flip of a switch. Active Matrix venting allows the user to easily regulate the airflow of the helmet’s vent system.

**BOA® FIT SYSTEM**

All the benefits of the 360 K2Dialed Fit System with the precision and quality that you have come to expect from BOA® Technologies.

**360 K2DIALED**

The 360 K2Dialed fit system is an evolution of the K2Dialed fit system, delivering unparalleled comfort for your head. An intricate web design provides 360 degrees of even pressure distribution for a secure fit that is easily adjusted with the twist of a dial.

**BIKE CERTIFIED**

Conforms to United States and European safety standards for bicycle use.

**MAGNA SNAP**

Magnetic retention clip that easily flips up and over your goggle strap for a secure hold that you don’t have to fumble for.

**REMOVABLE EAR PADS**

Ability to easily remove ear pads for reduced bulk, while still keeping the helmet’s fit system in place.

**REMOVABLE HEADLAMP CLIPS**

Customized fit for tool-free, on-the-go versatility for early-morning or after-dark missions.

**POWFLY HELMET COVER**

Waterproof/breathable cover for the Route helmet that provides added protection against the elements.
