

2022/2023 SNOWBOARD COLLECTION

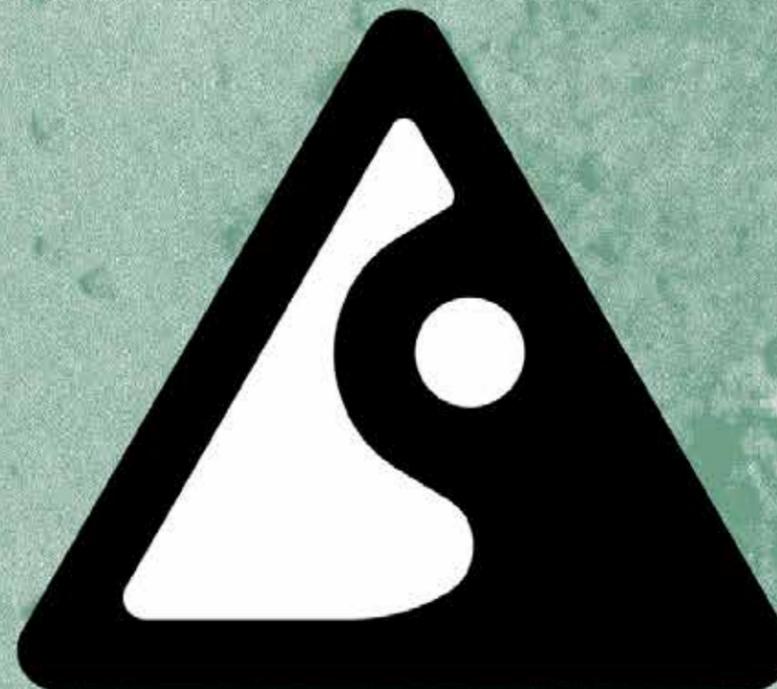

TEAM RIDERS

Jake Kuzyk - Tim Eddy - Matt Belzile
 Leanne Pelosi - Curtis Ciszek - Pat Moore
 Sage Kotsenburg - Mark Wilson - David Djite'
 Jody Wachniak - Yo Amagai - Steve Gruber
 Parker Szumowski - Daisuke Watanabe - Melissa Riitano
 Antti Jussila - Thomas Delfino - Kennedy Deck
 Adrian Krainer - Loranne Smans - Gabe Ferguson
 Noah Brown - Hanne Eilertsen - Dan McGonagle
 Noah Peterson - Fumiya Okamoto
 & Many More

TABLE OF CONTENTS

Landscape Collection	2-4
Unisex All-Mountain Snowboards	5-12
Women's All-Mountain Snowboards	13-16
Unisex Twin Tips	17-20
Women's Twin Tips	21-23
Deep Collection	23-25
Clicker™ X HB Collection	25-26
Snowboard Bindings	27-33
Snowboard Boots	34-38
Youth Collection	39-43
Bags & Accessories	43-45
Rental	45-49
Helmet	50-55
Technology, Specs, & Glossery	56-59

K2 is the original American Ski and Snowboard Brand, founded in 1962 in Washington State. It started with a shop. A garage. A barn. An island. It started with an idea. It started with belief. It started with madness and mistakes. From a garage brand to a garage brand gone global. For now and always, K2 continues to thrive with innovation, craftsmanship, and commitment.

A FREERIDE COLLECTION BY K2

MARKETED STYLE

ALCHEMIST

Terrain: Steeps, Deeps, Backcountry, and Resort Riding
Riding Style: Confident and Aggressive
Ability Level: Advanced to Expert

TECH

SnoPhobic Topsheet - Helps eliminate snow build up when it gets deep.
SpaceGlass™ Tip - Reduced Swing weight and Increased Edge Hold.
Spectral Braid™ - Allows torsional flex to be dialed in independently of tip and tail flex.
recess3D - Reduces Weight and Chatter without Sacrificing Strength.
S1 Core - Renewable, Durable, and Aimed to Increase Edge Pressure - 5 Year Warranty
Wax-Infused Sintered 4001 Base - Hard, Fast, and Durable. Wax-infused for a Better Glide.

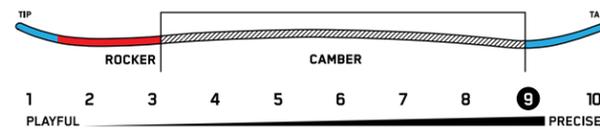

KEY FEATURES

Directional Camber Profile, S1 Core, Triax Glass, Spectral Braid, SpaceGlass™, recess3D, Carbon Power Fork, Wax-Infused Sintered 4001 Base, 2x4 Inserts

FAR OUT SPLIT BINDING

Built with backcountry durability, crowd avoidance, and all-day comfort in mind, the Far Out comes outfitted with our lightweight Aluminum Splitboard-Specific Chassis, a quick and easy Pinless Speed-Rail Mounting System, and Tool-less Forward Lean Adjustments with Touring Mode to ensure things are as effortless as possible when out past the gates.

BLACK

KEY FEATURES

Aluminum K2 Splitboard-Specific Chassis, Pinless Speed-Rail Mounting System, Forward Lean Adjustment with Touring Mode, Sender™ Anklestrap, Perfect-Fit™ 2.0 Toe Strap, One-Tool Adjustment

S (4-7.5), M (8-10.5), L (11+)

SPLITBOARD CRAMP-ON

Compatible with the Far Out binding, the K2 Cramp-On helps splitboarders get to the untouched terrain. Unlocking new goods starts now. Available in Standard and Wide widths.

KEY FEATURES & SIZING

6061 T6 Aluminum K2 Splitboard Cramp-On
 Standard Width Measurement: 130mm
 Wide Width Measurement: 149mm

SWIFT STICK

The Swift Stick is a no-nonsense splitboard pole that fits in your pack. The Swift Stick is a collapsible 4-segment pole that packs down to 13" long, making it the smallest volume splitboard pole on the market. This four-season pole also ships with a tip cap, so you can scope next winter's line, all summer long.

KEY FEATURES

Collapsible 7075 Aluminum Shaft, No-Slip EVA Handle™ Feature Bold™ - Feature Description Sabon Regular, SpeedLink Locking Mechanism

REPLACEMENT SKINS

Trim to fit and toss 'em on your split, The K2 Backside Skins feature the innovative, minimalist design of the Z-Clip system to ensure a strong hold, reduce weight, and make transitions faster than ever.

KEY FEATURES

Z-Clip Attachment, Offset Skin Cutter, Tip Hooks, Tail Clasps

CLICKER™ X HB

For the demanding snowboarder that refuses to sacrifice comfort and performance for convenience. The K2 Clicker™ X HB provides secure metal toe and heel mount points; aiding in quick edge-to-edge response, and natural lateral mobility for a familiar flex and feel. Tool-less forward lean adjustment lets you dial in your stance on the fly, and a 3° chassis cant keep you in your natural riding position.

VANDAL

Just because this board is shorter than the big guy's doesn't mean we have to skimp on the tech. With its time-tested Twin Rocker Profile and durable Aspen core, the Vandal is forgiving, playful, and finely tuned for progression. A long time favorite of the groms, this board is the perfect companion to accompany the little guy on his journey to the next level.

YOUTH COLLECTION

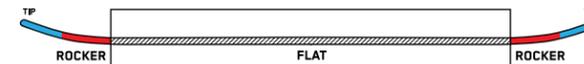

KEY FEATURES

Twin Rocker Profile, Aspen Core, Biax Glass, Extruded 2000 Base, Catch-Free™ Tune, 4x4 Inserts

YOU+H BINDING

A binding that performs but forgives, is technical but easy to adjust, and looks great but is made to take a beating. The K2 YOU+H binding is everything a grom would want and more. With 100% tool-less adjustability, our forgivable Tweakback™ highback, and durable A-Line™ Chassis, this binding was diligently engineered with fun, freedom, and progression in mind.

KEY FEATURES
ProFusion™ Chassis™, Groms Tweakback™, Tool-Less Bender™ Ankle Strap, Perfect Fit™ Toe Strap, 100% Tool-Less Adjustment

M: (4-9)

YOU+H BOOT

Comfortable, convenient, and full of next-level features, the K2 YOU+H boot was engineered with the grom's (and parent's) best interest in mind. With features including an easy-to-use Youth BOA® Fit System and our adjustable Grows-A-Long™ shims to adapt to the never-ending growth of young snowboarders.

KEY FEATURES
Youth BOA™ Fit System, Articulating Cuff Upper, Comfort Foam EVA Liner, Die Cut EVA Grows-A-Long Shims, Low Pro Outsole

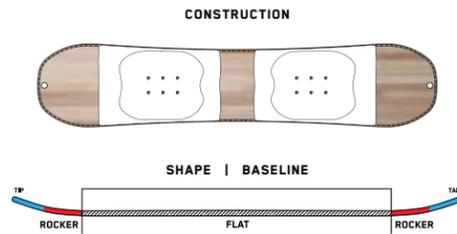

SIZES: (3-7)

MINI TURBO

Start 'em young and stoke 'em out. We made sure that the Mini Turbo pivots on a dime and turns like a champ to ease the learning curve on your grom's path down the mountain. A true twin shape with a symmetrical feel helps your grom focus on what's important - having fun!

BAGS, SOFTGOODS, & AX

SNOWBOARD ROLLER BAG

The most premium piece in our bag offering, the K2 Roller Board Bag is the ATV of snowboard bags. Room for multiple boards, outerwear, helmet, and extra whatever-you-need-when-ever-you-need-it. A fully padded, rugged exterior is protection on the road and against baggage-handlers, while a DWR ripstop interior makes loading stuff in and out easy and stress free. Plenty of storage meets plenty of style.

COLOR - Black

SIZE - Available in 175cm

VOLUME - 165cm: 85L, 175cm: 90L

FEATURES - 600D Ripstop Exterior, TPU Coated Bottom, #10 YKK Zippers w/ Accent Pulls, #8 YKK Coated Zipper on Exterior Pocket, Internal/External Cinch, 3 Carry Handles, Luggage Tag Window, Urethane Skate Wheels, Molded Base Plate, Exterior Storage Pocket, Removable Tarpaulin Boot Bag Included

SNOWBOARD PADDED BAG

Protect your ride without draining the bank account. The K2 Padded Board Bag aids in worry-free transportation with padding to protect multiple boards. A padded shoulder strap makes carrying your gear easy as pie, while a rugged exterior allows you to worry about one thing, getting to the hill. This is the ideal mate for light airline travel, day trips by car, and storing your gear during the off-season.

COLOR - Black, Military Green

SIZE - Available in 158cm, 168cm

VOLUME - 158cm: 80L, 168cm: 85L

FEATURES - 600D Ripstop Exterior, Tarpaulin Padded Lining, TPU Coated Bottom, #10 YKK Zippers w/ Accent Pulls, #8 YKK Coated Zipper on Exterior Pocket, Padded Shoulder Strap, Internal/External Cinch, 3 Carry Handles, Luggage Tag Window, External Zipper Pocket

SNOWBOARD SLEEVE

The K2 snowboard sleeve is a minimal investment with just the right amount of protection for day trips, off-season storage, and simple organization. Toss this thing in the car, the bed of the truck, or below on the bus without hassle - this burly ripstop exterior makes it so there's only one thing to focus on, getting to the fresh snow before the rest of the crowd.

COLOR - Black

SIZE - Available in 158cm, 168cm

VOLUME - 158cm: 80L, 168cm: 86L

FEATURES - 600D Ripstop Exterior with PE Backing, #10 YKK Zippers w/ Accent Pulls, #8 YKK Coated Zipper on Exterior Pocket, Padded Shoulder Strap, Luggage Tag Window, Water Resistant Exterior Pocket, 3 Grab Handles

K2 BOOT LOCKER

Keep snowboard boots dry, your goggles safe, and your gear organized with the Boot Locker from K2. Equipped with backpack straps and expandable boot compartment storage to fit one pair of snowboard boots, the Boot Locker lets you keep your gear in one secure spot.

COLORS - Black

SIZE - One Size

VOLUME - 38L

FEATURES - 600D Ripstop Exterior with PE Backing, Ridgig Tarpaulin Floor, TPU Coated Bottom, #10 YKK Zippers w/ Accent Pulls, Padded Stowable Backpack Straps, Adjustable Waist Strap/Cinch Buckles, 3 Carry Handles, Boot Compartment with Drainage, Helmet & Gear Compartment, Goggle Compartment, Exterior Storage Pocket

K2 BOOT BAG

Toss. 'Em.' in. The K2 Boot bag was designed to keep your boots dry and clean on the way to the hill and keep your ride clean on the way home. Trusted zipper pockets give you extra room for spare lenses, boot warmers, or even an afternoon snack.

COLORS - Black

SIZE - One Size

VOLUME - 35L

FEATURES - 600D Ripstop Exterior with PE Backing, Ridgig Tarpaulin Floor, TPU Coated Bottom, #10 YKK Zippers w/ Accent Pulls, Padded Adjustable Shoulder Strap, Carry Handle, 2 External Side Pockets

K2 BACKPACK

Designed with direct input from our team, the all-new backpack from K2 is packed full of features inside and out. A 600D ripstop exterior keeps your valuables safe and dry, sturdy YKK zippers keep everything locked in, a zippered bottle pocket keeps your hydration secure, and bungee straps hold a layer to keep you hands free.

COLORS - Black

VOLUME - One Size

VOLUME - 30L

FEATURES - 600D Ripstop Exterior with PE Backing, Padded Back Panel, TPU Coated Top & Bottom, #10 YKK Zippers w/ Accent Pulls, Padded Backpack Straps, Stowable Waist Strap, Adjustable Chest Strap, Dual Compression Straps, Bike Light Clip, Multi Functional Organization Pocket, Zippable Water Bottle Pocket, Exterior Storage Pocket, Padded Laptop Sleeve, Internal Mesh Lid Pocket, Exterior Bungee Stowage

SNOWBOARD TECHNOLOGY

WARRANTY

We stand by our snowboards. Unless otherwise stated, K2 places a three (3) year warranty on all 2020 Snowboards, guaranteeing that they are free of defects in regards to materials or craftsmanship.

3 YEAR WARRANTY | All K2 Snowboards come with a three (3) year warranty against manufacturer's defects.

5 YEAR WARRANTY | All snowboards featuring our A1, S1, and Bambooyah™ Cores come with a five (5) year warranty against manufacturer's defects.

PERFORMANCE & FEEL

When it comes to choosing the right snowboard for you, it is important to take height, weight, stability, power transfer, sidecut, flex, and more into consideration. Flex is often seen as the most important - as it will dictate how you are able to control your board on-snow. To simplify, we measure our flex spectrum using the scale of PLAYFUL to PRECISE.

In general, more PLAYFUL boards are great for learning how to link turns, press rails, and overall board handling.

In general, more PRECISE boards are often more stable at speed, have more pop, and have more energy than their playful counterparts.

RAILS/PARK

Boxes, rails, bonks, and jibs on-hill or in the streets.

JUMPS/PIPE

Kickers, hips, transitions, and stunt-ditches.

GROOMERS

Fresh corduroy. what

POWDER

That deep, deep white goodness.

BASES

3D CONTOUR NOSE | 3D contour (spoon) that is gradually blended from the running surface deflects soft snow, eases turn initiation, while remaining predictable on hardpack. Available on both Antidote (3mm) and Special Effects (8mm) models.

CARBON INFUSED 5500 SINTERED BASE | Fast, light, and strong. Our Carbon Infused 5500 base is the cream of the crop. By adding carbon to a sintered base, we've increased wax retention and decreased drag for a faster, smoother ride.

WAX INFUSED SINTERED 4001 BASE | ALL NEW! | Built using the hardest and fastest Sintered base material on the market from Crown, the Wax-Infused Sintered 4001 holds wax longer than other Sintered bases for a smoother glide, longer.

SINTERED 4000 BASE | Our Sintered 4000 base absorbs wax deep into the material for relentless glide and unrivaled durability.

EXTRUDED 2000 BASE | Our low-maintenance Extruded 2000 base delivers a consistent glide and is easy to both maintain and repair.

STONE GROUND BASES | K2 offers a Stone Ground finish on boards leaving directly from our factory. This ensures that our snowboards arrive to our customers with a flat, open p-tex base that is structured to perform well in all snow conditions, properly absorb wax, and glide faster than a belt sanded board.

CATCH-FREE TUNE | By bringing the contact points out of the snow, this beginner-friendly tune ensures linking turns without a catch. This small amount of bevel in the tip and tail aids in more confidence throughout the learning curve and unlocks faster progression on all terrain.

CORES

A1 CORE | ALL NEW! | Lightweight, snappy, and durable, our ALL NEW! A1 Core is made from three renewable species of timber - Bamboo, Aspen, and Paulownia. Aspen-dominant to highlight the snap and response of this wood, we've combined it with Bamboo at 30° underfoot to increase strength, supercharge the edge-to-edge response, and increase the pressure distribution along the edge. We've also placed lightweight paulownia in the tip and tail help to reduce swingweight.

S1 CORE | ALL NEW | The smooth-flexing cousin to our A1 core, our NEW S1 Core is designed to be damp underfoot and stronger than hell. Constructed from Bamboo, Aspen, and Paulownia, the S1 Core let's each wood do what it's best for. Tip-to-tail Bamboo stringers add snap, durability, and damping underfoot and are balanced out by lightweight paulownia in the midbody, tip, and tail help to reduce swingweight. Underfoot, Aspen and Bamboo are placed at 30° angles to increase strength, supercharge the edge-to-edge response, and increase the pressure distribution along the edge.

BAMBOOYAH™ BLENDED CORE | Renewable and stronger than hell. Bamboo possesses a higher tensile strength than steel and withstands compression better than concrete, and that's why we offer these boards complete with a five year warranty.

BAP CORE | Bamboo. Aspen. Paulownia. We've blended three species of renewable timber to assemble a core that's strong, lightweight, and designed to enhance dampening without the addition of other materials.

ASPEN CORE | A single species of wood ensures consistency - giving riders the advantage of a proven flex, durability, and snap.

RHYTHM CORE | Uniquely shaped and designed to complement the mechanics, geometry, and riding style of female snowboarders, we rely heavily on aspen to make this core snappy and agile, while placing lightweight paulownia in the tip and tail to reduce swingweight and ease turn initiation. ightweight.

CORE ADDITIVES

SPACEGLASS™ | An American made Aerospace grade preure fiberglass core insert used to provide unmatched structural performance at reduced weight. SpaceGlass™ inserts increase edge hold along contact points, reduce chatter, and provide unequaled durability.

SPECTRAL BRAID™ | K2's Patented (U.S. Patent No. 10,857, 445) Spectral Braid is a first of its kind variable angle reinforcement that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the snowboards. This makes our snowboards feel lively, energetic, and remarkably composed.

RECESS3D | By reducing the amount of materials in low-stress zones, we're able to reduce the swingweight of your snowboard, while also reducing chatter in the tip and tail - all without sacrificing strength.

CARBON POWER FORK™ | Pre-cambered Carbon Power Fork™ additives are strategically shaped to offer greater response and energy return by increasing the width toward the tail - allowing for more material to be engaged, and more energy to be created the harder the tail is flexed. Add Snap to Ollies, Increase Edge Pressure, and Give Energy In and Out of Turns.

OLLIE BAR™ | Built in place in a pre-loaded cambered shape and placed between the binding inserts, the Ollie Bar™ helps by adding extra snap between the feet to increase pop from the highest load-zone.

CARBON TORQUE FORKS™ | Carbon fiber stringers in a V-shape, extending from just outside of the inserts to the contact points in the tip and tail for added pop, responsive, and stability.

CARBON DARKWEB™ | A carbon fiber X-pattern that is strategically placed underfoot from edge-to-edge to speed up transitions, increase control, and increase underfoot strength.

UNDERFOOT REINFORCEMENT | Standard across all snowboards in the K2 Snowboarding collection, additional fiberglass reinforced binding patches placed underneath the binding mount area to increase board strength and decrease board breakages outside the binding.

GLASS TECHNOLOGY

ICG CARBON GLASS™ | Integrating tip-to-tail carbon fiber stringers into fiberglass layouts ensures a smooth power release in and out of turns while increasing pop, liveliness, and longevity of the snowboard without adding unnecessary rigidity. We offer ICG™ Glass in two variations; ICG™ 10 Biax, ICG™ 10 Triax, and ICG™ 20 Triax.

TRIAxIAL GLASS | A glass laminate with diagonal layers that adds torsional stiffness for increased stability and improved edge hold. The fibers three layers of fibers are woven at 45°, 45°, and 0°. This makes for a more responsive ride longitudinally and torsionally.

BIAXIAL GLASS | Smooth all-purpose performance with a no-frills design. Fibers are woven together at 0° and 90°, creating a more forgiving flex pattern.

SNOWBOARD TECHNOLOGY CONT.

SHAPES, CONSTRUCTIONS & K2 EXCLUSIVES

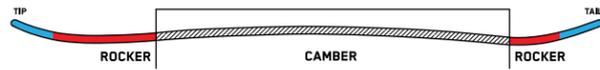

VOLUME SHIFT™ We've moved volume from the tips and tails of traditional snowboard shapes and placed it underfoot where it can be better controlled. This makes a wider, shorter design that maintains the same float and stability of a traditional board, but increases mobility and maneuverability. More slashing and better lines in the trees are now a reality.

HYBRITECH™ CONSTRUCTION | Backed by years of rigorous testing, Hybritech is the lightest weight, most durable snowboard construction on the market. Removing all excess sidewall material in the tip and tail and adding a 3D capped edge to increase the bond strength of the fiberglass and decrease the swing weight of the board is what makes Hybritech so revolutionary. Our boards will spin faster, maneuver easier, and last longer than any other boards on the market.

SINTERED P-TEX SIDEWALLS | By using a profiled Sintered 4000 P-Text material for the sidewalls in all of our snowboards, we are able to offer riders a host of benefits. P-Text sidewalls are durable and impact resistant, provide a smoother, damper ride, and helps us to reduce waste in the production process.

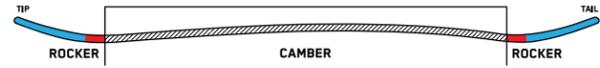

PROFILE OVERVIEW

Simply put, profile is the tip to tail curve on the bottom of the snowboard. This "profile" can be described as Rocker, Camber, Flat, or any combination of these. K2 offers multiple Profile options, hand picked by model and tailored to work in harmony with the materials and core profile to ensure the best possible riding experience.

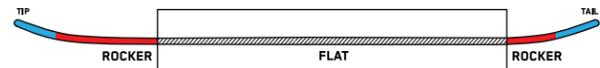

DIRECTIONAL COMBINATION CAMBER PROFILE

The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both; the pop and precision of camber, and the float and predictability of rocker.

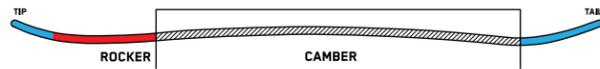

TWIN COMBINATION CAMBER PROFILE

The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both; the pop and precision of camber, and the float and predictability of rocker.

DIRECTIONAL ROCKER PROFILE

An all-purpose profile designed to be the perfect companion for the all-terrain snowboarder. Directional Rocker Profile has medium-rise rocker in the tip, flat in the middle of the board, and low-rise rocker in the tail, allowing for effortless turns on hardpack and ample float in soft snow and crud.

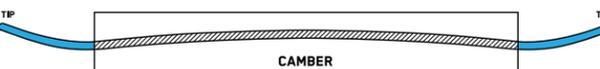

DIRECTIONAL CAMBER PROFILE

The most responsive camber profile in the line features camber running from in front of the front foot to the tail of the board with slight early rise in the nose. This gives the rider the most precision and control possible in any terrain while still floating effortlessly in the deep stuff.

TWIN ROCKER PROFILE

A versatile twin-rocker design built to dominate any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel without sacrificing pop and response.

TWIN CAMBER PROFILE

A twin camber profile makes the snowboard under your feet lively and poppy helping you track straight into jumps and pop ollies over fences.

TWEAKEND™

We've extended the rocker all the way out to the absolute ends of the board, and for good reason! This unlocks new ride-able surface area and gives you a bigger, more stable platform to press, float, and land on.

BOOT TECHNOLOGY

THE ORIGINAL BOA® BOOT COMPANY | Introducing BOA® Fit System to the snowboard market well over a decade ago, K2 believes that now, more than ever, BOA® is a standout advantage.

SHELL LACING BOA®

FOCUS AND ZONAL BOA® FIT SYSTEM | A two reel BOA® Fit System that allows for the upper and lower zones of the boot to be tightened independently.

BOA® FIT SYSTEM AND COILER BOA® FIT SYSTEM | A cable and reel based lacing system that creates even tension and easy lacing operation. This system features low friction guides for even tightening. BOA® Coiler works to automatically retract lace slack so your boots stay nice and neat.

TX3 BOA® LACING | BOA®'s first textile lace in the snowboarding category, TX3 is constructed from recycled PET with a structural core. This lace provides a softer, more flexible look similar to the characteristics of a traditional lace but the superior closure of a BOA® system.

TRADITIONAL LACE | No wires, reels, or pulls needed. Our braided textile laces offer a tried and true feel and customizable fit.

45° LACE LOCK | Positioned at the transition to the instep to give you a quick and easy ability to zonally lace your boots and keep them that way.

LINER LACING CONDA

CONDA™ WITH BOA® | UPDATED! | A patented K2 liner lacing system that uses a urethane harness to gently hug your ankle, creating unrivaled heel hold. BOA® Conda™ allows for adjusting liner tightness and heel hold on the fly from outside of the boot, even with gloves on.

3-POINT HARNESS | The 3-Point Harness is a straightforward solution that doesn't skimp on support. This system aims to optimize heel hold, while providing ankle support and unrivaled stability to help reduce fatigue. A taller, Pro Version is found on Orton and Format models for additional support.

REMOVABLE 3-POINT HARNESS | Now with the ability to choose your fit with our removable harness that locks to the shell to give you the choice of the amount of hold you want. Found on the Taro Tamai Snowsurfer LS and Taro Tamai Snowsurfer models.

FAST-IN | No frills adjustment and locks solid for all day fit and comfort. Easy to use and comfortable all day long.

LINER CONSTRUCTION

K2 AND INTUITION® | Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, flexible, and durable, K2 aims to create the most comfortable and best performing snowboard boot liners in the world.

INTUITION® SPACEHEATER™ | A liner designed for comfort and warmth, from start to finish. It features reflective heat blanket panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J-Bars, and 3D molded dual-density EVA insoles to keep your foot comfortable and warm all day long.

INTUITION® PRO FOAM 3D | Our most supportive liner, featuring a high-density Intuition® foam for added support without sacrificing comfort. This liner features both internal and external J-Bars around the ankles, where extra support is needed.

INTUITION® CONTROL FOAM 3D | Built with a blend of high and medium density Intuition® foam, this is our most versatile liner. With internal and external J-Bars and a 3D molded EVA insole, the Control Foam 3D liner is built to provide all-day comfort and support.

INTUITION® COMFORT FOAM 3D | Built for comfort and long-lasting fit, this liner is a softer build and features both internal and external J-Bars for added ankle support and heel hold.

COMFORT FOAM EVA | Focused on out-of-the-box fit and lasting comfort, the Control Foam liner has a forgiving flex and is packed with internal J-Bars for added ankle support.

OUTSOLES THISGRIPS

VIBRAM® ROLLSOLE OUTSOLE | Designed with mobility in mind, the Roll Sole™ Outsole aims at providing additional range-of-motion without sacrificing any support (thanks, Harshmellow™). This outsole is ergonomically shaped and allows riders additional maneuverability for next-level heelside carves and surf-style vibes.

VIBRAM® MOUNTAINEER OUTSOLE | The Mountaineer outsole is the first of its kind. An outsole designed specifically for snowboarding and the mountaineering that is required to get to those larger-than-life lines. With Vibram® rubber and a traditional lug design, this crampon compatible outsole is built to work with all the gear you need.

VIBRAM® V5 OUTSOLE | Vibram® V5 Outsole features a full EcoStep rubber (30% regrind) with and Harshmellow™ pods under the toe and heel to reduce noise underfoot. The V5 Outsole is the perfect combination of sustainability and performance.

THIS GRIPS! PREMIUM RUBBER OUTSOLE | A K2 exclusive built to offer the best possible performance at the lowest possible weight. An EVA midsole with Harshmellow™ pods makes this quiet underfoot, and a dual rubber compound provides unmatched grip for the parking lot and the boot pack.

ROLLSOLE™ OUTSOLE | The RollSole Outsole aims at providing additional range-of-motion without sacrificing grip or support. This outsole is keeps the overall weight of the boot down while offering extra mobility side to side.

RUBBER LIGHT OUTSOLE | Full rubber bottom for maximum grip and durability is matched with our impact absorbing Harshmellow™ technology - reducing fatigue and providing a quiet feel underfoot.

PHYLIGHT™ OUTSOLE | This EVA outsole offers a uniform flex and the durability of a rubber outsole in a lighter-than-light package.

LOW PRO OUTSOLE | A lightweight solid rubber cupssole that grips hard and lasts long.

CLICKER™ X OUTSOLE | The Clicker™ X outsole features exaggerated rocker for walkability and a full rubber outsole for both hikability and durability. Harshmellow™ is integrated in the midsole and is all securely layered around our Clicker™ X technology.

BRIGHT FUTURE OUTSOLE | Lighting up the stoke and fun for groms everywhere, this LED light powered outsole is built to be lightweight and have tons of grip for lasting the whole day.

BOOT TECHNOLOGY CONT.

BOOT MATERIALS

ENDGO
CONSTRUCTION

harshmellow
ULTIMATE DAMPENING

ENDGO™ CONSTRUCTION | A K2 Snowboarding exclusive, Endo™ Construction allows us to alter the flex, response, and rebound of a snowboard boot without adding extra materials (extra materials = extra weight). By replacing additional materials with an injected heel-counter, adding extra rebound is as easy as a formula change and helps us to provide a more consistent flexing, longer-lasting snowboard boot.

HARSHMELLOW™ | Harshmellow™ is a magical dampening system that replaces industry standard foam dampening materials. Harshmellow™ is strategically placed to dampen vibration underfoot to provide for a more "quiet" feel underfoot, reduce vibration from impact, and reduce fatigue while snowboarding.

REINFORCED RUBBER | Abrasion resistant reinforced outsole rubber is placed in areas of high stress to extend the life of the boot and increase durability.

HDR PREMIUM SYNTHETICS | Eight times more durable than a standard polyurethane material, HDR Premium Synthetics is a proprietary synthetic durable finish designed for extreme conditions. The dynamic resin system provides exceptional abrasion and durability performance well beyond standard synthetic materials.

SPACEHEATER™ FOOTBED | We've gone the extra mile to ensure that you stay warm and comfortable. By adding a reflective SpaceHeater™ material to the footbed on our boots, we're helping to trap heat inside the shell.

Found On: Taro Tamai Snowsurfer (+ LS), Aspect, Thraxis, Waive, Holgate, Orton, Ender, Hanford, Maysis, Format, Estate, Trance, & Contour models.

S'CAFE COFFEE MESH | With functionality and sustainability in mind, K2 coffee mesh is made from recycled post-consumer coffee grounds that is combined with post consumer recycled polyester. This mesh enhances odor control and moisture management of our standard lining mesh and is made from 95% recycled material with no added chemicals.

LASTING

K2 Snowboarding uses a 1-to-1 lasting system for every liner and shell throughout the entire collection. This ensures the customer will get the best possible fit when they put their foot into a K2 snowboard boot.

TRADITIONAL LAST | Our Traditional Last is based around a D Last with 11° of forward lean.
-Available on Boundary, Lewiston, Darko, Raider, Market, Kinsley, Sapera, Cosmo, Haven, and Belief models.

PERFORMANCE LAST | Our Performance Last is based around a D Last through the forefoot with a more performance-focused heel pocket, and also features 11° of forward lean.
-Available on Aspect, Thraxis, Waive, Holgate, Orton, Ender, Hanford, Maysis, Format, Estate, Trance, and Contour models.
- Also featured on Thraxis Clicker™ X HB and Maysis Clicker™ X HB models.

WIDE LAST | Our Wide Last is based around an E & ½ Last with 11° of forward lean. Both shell and liner at 7mm wider than our traditional last and boot shell.
-Available on Maysis Wide.

6+3 LAST | Unique to the Taro Tamai Snowsurfer shell, our 6+3 last features a more relaxed feel and is built to encourage turns. By reducing forward lean 6°, it provides a more upright feel, and it is met with 3° of medial lean that helps to bring the knees into the natural riding stance.
-Available on: Taro Tamai Snowsurfer LS, Taro Tamai Snowsurfer..
