3 DENSITY WRAP LINERS

New liner concept based on the idea to differentiate the material properties of the liners layers in order to optimize the performance.

A **first layer** of softer foam around the foot for comfort, a **second layer** of harder foam to structure the liner and **finally the PuRE technology** (PolyUrethane recycled Enforcement): a sturdy layer of Recycled PU for better power transmission.

The manufacturing process is also revolutionary: the liner is pre-heated and formed around a metal foot by applying pressure from the outside, so the internal geometry of the liner is controlled and provides an excellent first fit.

3DENSITY WRAP MAX HIKE

- 1) Softer foam around the foot for the best comfort
- 2) Harder foam to structure the liner
- 2) PuRE Technology For a better power transmission (PU recycled enforcement)

SIZE/VOLUME ADJUSTER

Selected adult boots come with a pair of size/ volume adjuster in the box. When you set the inserts under the footbed, the boot volume gets half size smaller.

CANTING SOLES KIT

ARTICLE-NR.: KITDDS001.K20.UNI
