

25/26 SNOWBOARDING COLLECTION

THE ORIGINAL AMERICAN SNOWBOARDING BRAND.

**FOUNDED IN 1962 IN WASHINGTON STATE.
IT STARTED WITH A SHOP. A GARAGE. A BARN. AN ISLAND.
IT STARTED WITH AN IDEA. IT STARTED WITH BELIEF. IT
STARTED WITH MADNESS AND MISTAKES. FROM A GARAGE
BRAND TO A GARAGE BRAND GONE GLOBAL. FOR NOW AND
ALWAYS, K2 CONTINUES TO THRIVE WITH INNOVATION,
CRAFTSMANSHIP, AND COMMITMENT.**

COLLECTIVE PROGRESS: TOGETHER, DRIVING CHANGE FOR THE OUTDOORS

Like-minded people driving progress for the outdoors, together

K2 believes that protecting the places we love is a shared responsibility. Through our **Collective Progress** initiative, we're bringing together passionate people, partners, and ideas to reduce our impact, safeguard natural resources, and inspire the next generation of outdoor enthusiasts.

Carbon Reduction

We're committed to lowering our carbon footprint through the use of cleaner energy, sustainable materials, and more efficient production processes.

Sustainable Materials

By integrating flax, bio-resins, recycled materials, and eco-friendly technologies across our ski and boot lines, we're reducing waste and using materials that give back to the earth.

Product Lifecycle & Repairability

We focus on durability, repairability, and recycling to extend the life of our products and reduce waste. Our products are built to last and designed to be easily repaired or recycled.

Community & Partnerships

Working with like-minded organizations and communities, we're fostering collaboration that drives environmental awareness and action within the outdoor industry.

Join Us on the Journey

A person wearing a green and tan snow jacket, a red helmet with a colorful pattern, and yellow ski goggles is using a red and black power drill to adjust a black snowboard binding. The binding is mounted on a snowboard. The person is wearing a ring on their finger. In the background, there are parked vehicles, including a red truck and a silver truck. The scene is outdoors on a snowy surface.

A full-page photograph of a snowy mountain scene. In the foreground, a snowboarder wearing a brown jacket and a grey beanie walks away from the camera, carrying a snowboard. In the middle ground, a red ski lift structure is visible, with a few people standing nearby. The background is filled with snow-covered trees and a clear sky. The text "YOUTH BINDINGS" is overlaid in the center in a large, white, sans-serif font.

SNOWBOARD TECHNOLOGY

PERFORMANCE / FEEL

When it comes to choosing the right snowboard for you, it is important to take height, weight, stability, power transfer, sidecut, flex, and more into consideration. Flex is often seen as the most important - as it will dictate how you are able to control your board on-snow. To simplify, we measure our flex spectrum using the scale of PLAYFUL to PRECISE.

In general, more **PLAYFUL** boards are great for learning how to link turns, press rails, and overall board handling.

In general, more **PRECISE** boards are often more stable at speed, have more pop, and have more energy than their playful counterparts.

WARRANTY

We stand by our snowboards. Unless otherwise stated, K2 places a five (5) or three (3) year warranty on all 2024 Snowboards, guaranteeing that they are free of defects in regards to materials or craftsmanship.

5YR
WARRANTY

5 YEAR WARRANTY

All snowboards featuring our A1, S1, and Bambooyah™ Cores come with a five (5) year warranty against manufacturer's defects.

3YR
WARRANTY

3 YEAR WARRANTY

All K2 Snowboards come with a three (3) year warranty against manufacturer's defects.

K2 EXCLUSIVES

VOLUME SHIFT™

We've moved volume from the tips and tails of traditional snowboard shapes and placed it underfoot where it can be better controlled. This makes a wider, shorter design that maintains the same float and stability of a traditional board, but increases mobility and maneuverability. More slashing and better lines in the trees are now a reality.

HYBRITECH™ CONSTRUCTION

Backed by years of rigorous testing, Hybritech is the lightest weight, most durable snowboard construction on the market. Removing all excess sidewall material in the tip and tail and adding a 3D capped edge to increase the bond strength of the fiberglass and decrease the swing weight of the board is what makes Hybritech so revolutionary. Our boards will spin faster, maneuver easier, and last longer than any other boards on the market.

SINTERED P-TEX SIDEWALLS

By using a profiled Sintered 4000 P-Tex material for the sidewalls in all of our snowboards, we are able to offer riders a host of benefits. P-Tex sidewalls are durable and impact resistant, provide a smoother, damper ride, and helps us to reduce waste in the production process.

PROFILES

DIRECTIONAL CAMBER PROFILE

The most responsive camber profile in the line features camber running from in front of the front foot to the tail of the board with slight early rise in the nose. This gives the rider the most precision and control possible in any terrain while still floating effortlessly in the deep stuff.

DIRECTIONAL COMBINATION CAMBER PROFILE

The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both; the pop and precision of camber, and the float and predictability of rocker.

DIRECTIONAL ROCKER PROFILE

An all-purpose profile designed to be the perfect companion for the all-terrain snowboarder. Directional Rocker Profile has medium-rise rocker in the tip, flat in the middle of the board, and low-rise rocker in the tail, allowing for effortless turns on hardpack and ample float in soft snow and crud.

FLAT ROCKER PROFILE

A terrain and powder specific profile, designed to be ridden in deep or soft snow. A rockered, early rise tip provides float and lift in deep snow, and a flat tail provides the perfect platform to finesse or power turn while snorkeling through the deepest of days.

CAMBER PROFILE

Full camber all the way out or near the contact points provides an ultra-responsive and stable platform for powerful and precise freestyle maneuvers in all terrain or conditions, and delivers most pop available in the K2 line.

TWIN COMBINATION CAMBER PROFILE

The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both; the pop and precision of camber, and the float and predictability of rocker.

TWIN ROCKER PROFILE

A versatile twin-rocker design built to dominate any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel without sacrificing pop and response.

SNOWBOARD TECHNOLOGY

CORES

A1 CORE
Lightweight, snappy, and durable, our ALL NEW! A1 Core is made from three renewable species of timber - Bamboo, Aspen, and Paulownia. Aspen-dominant to highlight the snap and response of this wood, we’ve combined it with Bamboo at 30 ° underfoot to increase strength, supercharge the edge-to-edge response, and increase the pressure distribution along the edge. We’ve also placed lightweight paulownia in the tip and tail help to reduce swingweight.

S1 CORE
The smooth-flexing cousin to our A1 core, oure NEW S1 Core is designed to be damp underfoot and stronger than hell. Constructed from Bamboo, Aspen, and Paulownia, the S1 Core let’s each wood do what it’s best for. Tip-to-tail Bamboo stringers add snap, durability, and damping underfoot and are balanced out by lightweight paulownia in the midbody, tip, and tail help to reduce swingweight. Underfoot, Aspen and Bamboo are placed at 30 ° angles to increase strength, supercharge the edge-to-edge response, and increase the pressure distribution along the edge.

BAMBOOYAH™ BLENDED CORE
Renewable and stronger than hell. Bamboo possesses a higher tensile strength than steel and withstands compression better than concrete, and that’s why we offer these boards complete with a five year warranty.

BAP CORE
Bamboo. Aspen. Paulownia. We’ve blended three species of renewable timber to assemble a core that’s strong, lightweight, and designed to enhance dampening without the addition of other materials.

ASPEN CORE
A single species of wood ensures consistency - giving riders the advantage of a proven flex, durability, and snap.

RHYTHM CORE
Uniquely shaped and designed to complement the mechanics, geometry, and riding style of female snowboarders, we rely heavily on aspen to make this core snappy and agile, while placing lightweight paulownia in the tip and tail to reduce swingweight and ease turn initiation.ightweight.

CORE ADDITIVES

SPACEGLASS™
An American made Aerospace grade precure fiberglass core insert used to provide unmatched structural performance at reduced weight. SpaceGlass™ inserts increase edge hold along contact points, reduce chatter, and provide unequaled durability.

SPECTRAL BRAID™
K2's Patented (U.S. Patent No. 10,857, 445) Spectral Braid is a first of its kind variable angle reinforcement that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the snowboards. This makes our snowboards feel lively, energetic, and remarkably composed.

RECESS3D
By reducing the amount of materials in low-stress zones, we're able to reduce the swingweight of your snowboard, while also reducing chatter in the tip and tail - all without sacrificing strength.

CARBON POWER FORKS™
Pre-cambered Carbon Power Fork™ additives are strategically shaped to offer greater response and energy return by increasing the width toward the tail - allowing for more material to be engaged, and more energy to be created the harder the tail is flexed. Add snap to ollies, increase edge pressure, and give energy in and out of turns.

CARBON BACKBONE™
Tip to tail cambered carbon insert running down the center of the snowboard adds response and rebound for precise control on approaches and landing heavy tricks, and adding snap to every ollie.

CARBON DARKWEB™
A carbon fiber X-pattern that is strategically placed underfoot from edge-to-edge to speed up transitions, increase control, and increase underfoot strength.

UNDERFOOT REINFORCEMENT
Standard across all snowboards in the K2 Snowboarding collection, additional fiberglass reinforced binding patches placed underneath the binding mount area to increase board strength and decrease board breakages outside the binding.

CARBON Y BEAM™
Adding snap and stability in the tail, and sending energy to the contact points in the nose - this means that you’ll get the stability and edge pressure that you want, without the unnecessary torsional rigidity.

FIBERGLASS TECH

ICG CARBON GLASS™
Integrating tip-to-tail carbon fiber stringers into fiberglass layups ensures a smooth power release in and out of turns while increasing pop, liveliness, and longevity of the snowboard without adding unnecessary rigidity. We offer ICG™ Glass in two variations; ICG™ 10 Biax, ICG™ 10 Triax, and ICG™ 20 Triax.

TRIAXIAL GLASS
A glass laminate with diagonal layers that adds torsional stiffness for increased stability and improved edge hold. The fibers three layers of fibers are woven at 45°, 45°, and 0°. This makes for a more responsive ride longitudinally and torsionally.

BIAXIAL GLASS
Smooth all-purpose performance with a no-frills design. Fibers are woven together at 0° and 90°, creating a more forgiving flex pattern.

BASES

3D BASE CONTOUR
3D contour (spoon) that is gradually blended from the running surface deflects soft snow, eases turn initiation, while remaining predictable on hardpack. Available on Antidote, Sky Pilot (3mm), and Special Effects (8mm) models.

CARBON INFUSED 5500 SINTERED BASE
Fast, light, and strong. Our Carbon Infused 5500 base is the cream of the crop. By adding carbon to a sintered base, we've increased wax retention and decreased drag for a faster, smoother ride.

WAX INFUSED SINTERED 4001 BASE
Built using the hardest and fastest Sintered base material on the market from Crown, the Wax-Infused Sintered 4001 holds wax longer than other Sintered bases for a smooother glide, longer.

SINTERED 4000 BASE
Our Sintered 4000 base absorbs wax deep into the material for relentless glide and unrivaled durability.

EXTRUDED 2000 BASE
Our low-maintenance Extruded 2000 base delivers a consistent glide and is easy to both maintain and repair.

STONE GROUND BASES
K2 offers a Stone Ground finish on boards leaving directly from our factory. This ensures that our snowboards arrive to our customers with a flat, open p-tex base that is structured to perform well in all snow conditions, properly absorb wax, and glide faster than a belt sanded board.

CATCH-FREE TUNE
By bringing the contact points out of the snow, this beginner-friendly tune ensures linking turns without a catch. This small amount of bevel in the tip and tail aids in more confidence throughout the learning curve and unlocks faster progression on all terrain.

BINDING TECHNOLOGY

CHASSIS

SPLITBOARD-SPECIFIC ALUMINUM

Based off a tried and true splitboard baseplate, this chassis works with a splitboard puck-mount system and features an easy-to-use rail and hook system for the interchange between walk and ride modes.

MODULE™

Featured on all K2's new bindings, the Module chassis is composed of a fiberglass infused nylon, and minimizes “dead” board flex zones directly underneath the binding. This in turn allows the rider to feel the flex and response of the entire board length, while providing maximum support, security, comfort, and vibration damping. Intergrated with our all new Sugarcane EVA Canted Harshmellow™ Footbed w/ Pods on every Module chassis.

PROFUSION™

Simple, tough, and lightweight, the ProFusion™ chassis is the go-to standard in the K2 binding collection. On-board tool-less power ramp and toe strap adjustments are paired with multiple ankle-strap mount points to help dial in perfect fit and ideal power transfer.

TRIPOD™

A way to rethink the traditional binding baseplate design. Designed to act as the most biomechanically efficient chassis possible, the TriPod™ baseplate features power transmission pods that coincide with the three points of contact of the foot and is designed to flex the way that the foot is naturally meant to.

A-LINE™

Our female-specific A-Line™ chassis is a one-piece design for lightweight performance, power, and comfort. This polycarbonate baseplate was designed in collaboration with our Women's Alliance™ product group and is fully outfitted with tool-less adjustment for a custom fit.

CLICKER™ X

The Clicker™ X chassis features a guide that glides you into the system and a 3 degree cant that helps put riders in their natural riding position.

HIGHBACKS

FR1 HIGHBACK

K2's new FR1 Highback harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Path and men's Program binding.

AM1 HIGHBACK

K2's new AM1 Highback harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Albany and men's Edition binding.

TEAM HIGHBACK

K2's new Team Highback harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Network and men's Bond binding.

GAP ERASER™

Gap Eraser™ technology completely eliminates all gapping between boot, highback, and heelcup, creating an even stronger bond between you and your snowboard. Better contact means better response.

TWEAKBACK™

Tweakback™ highbacks are constructed using an injected urethane that is formulated toperform in cold temperatures and will allow you to flex the highback to its limit without any distortion.

ALL-TERRAIN

The most durable temperature resistant highback shapes that make every K2 binding model perform best for its designed purpose. Available in both Nylon and Polycarbonate materials.

ECLIPSE™ HIGHBACK

Slightly shorter than it's men's counterparts and uses female-specific geometry to ensure maximum comfort and performance.

STRAPS / ADDITIVES

DUAL DENSITY ANKLE STRAP

K2's new dual density ankle strap harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Path and men's Program binding.

SINGLE DENSITY ANKLE STRAP

K2's new single density ankle strap harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Albany and Network binding, and the men's Edition and Bond binding.

DUAL DENSITY TOE STRAP

K2's new dual density toe strap harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Path and Albany binding, and the men's Program and Edition binding.

SINGLE DENSITY TOE STRAP

K2's new single density toe strap harnesses the strength and sustainability of the castor bean, and represents a huge step toward our over goal of carbon net-neutrality. All new and feature on the women's Network binding, and the men's Bond binding.

SENDER™

Padless and responsive. The Sender™ ankle strap is a comfortable and low-profile ankle strap that was built to optimize power transfer and look damn good.

BENDER™

Twist and shout. Our Bender™ strap is our most flexible padless ankle strap option. We created it with the aim to improve freestyle mobility and help you tweak until those bindings creak.

P.I.

Available on our Sonic and Cassette binding models, our new P.I. ankle strap is forgiving, comfortable, and lightweight.

CUSTOM CADDI™

The most cushion out of any strap in our offering, this proven design features ladder covers and durable PU laminates.

ASYM STRAP™

3D contoured shape with a narrower waist profile focuses this design on fit and flex.

PERFECT FIT™ 2.0

Fitting good and looking better. The Perfect Fit™ 2.0 Strap's engineered to provide maximum adjustability, and fit each and every boot, no matter the brand.

PERFECT FIT™

Hinged design fits any boot toe shape, holds well, and sits in a low-profile configuration.

MULTIMOUNT™

Featured on the Module™ Chassis, mulitple mount points for the ankle strap on the Module chassis allow for a fine-tuned, custom fit.

LEANBLOCK

Featured on our FR1 and AM1 highbacks, a traditional forward lean adjustment allow the rider to fine-tune the response of the binding and board.

CAM LOCK™ CENTER ADJUSTING

Center and adjust your straps with your gloves on.

HINGE MOUNT™

The hinge mount ensures your ankle straps easily stay out of the way.

TOOL-LESS UNIVERSAL™

Tool-less adjustment allows for on-board, on-the-fly changes.

RATCHETS

SIGNATURE ALUMINUM K2 RATCHET

Lightweight fixed-pivot aluminum ratchet constructed from T6061 Aluminum.

SIGNATURE POLY K2 RATCHET

Large release lever for super easy exit and resin composite construction for lightweight durability.

EZ FEED RATCHETS™

A wider, tapered ladder opening allows for the easiest of entry. No need to take the gloves off.

FOOTBEDS / MOUNT DISC

SUGARCANE EVA CANTED HARSHMELLOW™

FOOTBED W/ PODS

Derived from scrap native sugarcane raised with minimal impact on rainforests, the footbeds on our Module chassis represent a huge leap toward our goal of carbon net-neutrality. Integrated with K2's proprietary Harshmellow™ technology, our these eco-conscious footbeds provide grip, cushion, and performance for all day riding in every condition.

THIS GRIPS!™ BASEPAD

K2's proprietary rubber compound, integrated onto the bottom of our Module chassis, provides vibration damping and cushion between board and binding, reducing fatigue and joint impact.

3° CANTED EVA FOOTBED

Featured on every K2 binding, a 3° inward cant places the rider in a more ergonomic stance, reducing fatigue and increasing comfort in all terrain and conditions.

MINI MOUNT DISC

Featured on our Tripod Chassis, a smaller mount disc minimizes the “dead” board flex zone underfoot, allowing for a truer board flex and feel.

MULTI-COMPATIBLE MOUNT DISC

Featured on K2's Profusion™ and A-Line™ Chassis. Intergrated with offset mount holes for centering the binding on the board and minimizing heel and toe drag.

BOOT TECHNOLOGY

SHELL LACING

THE ORIGINAL BOA® BOOT COMPANY

Introducing BOA® Fit System to the snowboard market well over a decade ago, K2 believes that now, more than ever, BOA® is a standout advantage.

FOCUS AND ZONAL BOA® FIT SYSTEM

A two reel BOA® Fit System that allows for the upper and lower zones of the boot to be tightened independently.

BOA® FIT SYSTEM AND COILER BOA® FIT SYSTEM

A cable and reel based lacing system that creates even tension and easy lacing operation. This system features low friction guides for even tightening. BOA® Coiler works to automatically retract lace slack so your boots stay nice and neat.

TX3 BOA® LACING

BOA®'s first textile lace in the snowboarding category, TX3 is constructed from recycled PET with a structural core. This lace provides a softer, more flexible look similar to the characteristics of a traditional lace but the superior closure of a BOA® system.

TRADITIONAL LACING

No wires, reels, or pulls needed. Our braided textile laces offer a tried and true feel and customizable fit.

45° LACE LOCK

Positioned at the transition to the instep to give you a quick and easy ability to zonally lace your boots and keep them that way.

NO-SHOW LACE COVER

Protects traditional laces from snow, moisture, and abrasion. Waterproof zipper.

LINER LACING

CONDA™ WITH BOA®

A patented K2 liner lacing system that uses a urethane harness to gently hug your ankle, creating unrivaled heel hold. BOA® Conda™ allows for adjusting liner tightness and heel hold on the fly from outside of the boot, even with gloves on.

3-POINT HARNESS

The 3-Point Harness is a straightforward solution that doesn't skimp on support. This system aims to optimize heel hold, while providing ankle support and unrivaled stability to help reduce fatigue. A taller, Pro Version is found on Orton and Format models for additional support.

REMOVABLE 3-POINT HARNESS

Now with the ability to choose your fit with our removable harness that locks to the shell to give you the choice of the amount of hold you want. Found on the Taro Tamai Snowsurfer LS and Taro Tamai Snowsurfer models.

FAST-IN

No frills adjustment and locks solid for all day fit and comfort. Easy to use and comfortable all day long.

K2 SNOWBOARDING

LINER CONSTRUCTION

K2 AND INTUITION®

Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, flexible, and durable, K2 aims to create the most comfortable and best performing snowboard boot liners in the world.

INTUITION® SPACEHEATER™

A liner designed for comfort and warmth, from start to finish. It features reflective heat blanket panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J-Bars, and 3D molded dual-density EVA insoles to keep your foot comfortable and warm all day long.

INTUITION® PRO FOAM 3D

Our most supportive liner, featuring a high-density Intuition® foam for added support without sacrificing comfort. This liner features both internal and external J-Bars around the ankles, where extra support is needed.

INTUITION® CONTROL FOAM 3D

Built with a blend of high and medium density Intuition® foam, this is our most versatile liner. With internal and external J-Bars and a 3D molded EVA insole, the Control Foam 3D liner is built to provide all-day comfort and support.

INTUITION® COMFORT FOAM 3D

Built for comfort and long-lasting fit, this liner is a softer build and features both internal and external J-Bars for added ankle support and heel hold.

COMFORT FOAM EVA

Focused on out-of-the-box fit and lasting comfort, the Control Foam liner has a forgiving flex and is packed with internal J-Bars for added ankle support.

BOOT MATERIALS

NEW! ENDO™ 3.0 CONSTRUCTION

A K2 Snowboarding exclusive, Endo™ Construction allows us to alter the flex, response, and rebound of a snowboard boot without adding extra materials (extra materials = extra weight). By replacing additional materials with an injected heel-counter, adding extra rebound is as easy as a formula change and helps us to provide a more consistent flexing, longer-lasting snowboard boot.

HARSHMELLOW™

Harshmellow™ is a magical dampening system that replaces industry standard foam dampening materials. Harshmellow™ is strategically placed to dampen vibration underfoot to provide for a more "quiet" feel underfoot, reduce vibration from impact, and reduce fatigue while snowboarding.

REINFORCED RUBBER

Abrasion resistant reinforced outsole rubber is placed in areas of high stress to extend the life of the boot and increase durability.

HDR PREMIUM SYNTHETICS

Eight times more durable than a standard polyurethane material, HDR Premium Synthetics is a proprietary synthetic durable finish designed for extreme conditions. The dynamic resin system provides exceptional abrasion and durability performance well beyond standard synthetic materials.

SPACEHEATER™ FOOTBED

We've gone the extra mile to ensure that you stay warm and comfortable. By adding a reflective SpaceHeater™ material to the footbed on our boots, we're helping to trap heat inside the shell. Found On: Taro Tamai Snowsurfer (+ LS), Aspect, Thraxis, Waive, Holgate, Orton, Ender, Hanford, Maysis, Format, Estate, Trance, & Contour models.

S'CAFE COFFEE MESH

With functionality and sustainability in mind, K2 coffee mesh is made from recycled post-consumer coffee grounds that is combined with post consumer recycled polyester. This mesh enhances odor control and moisture management of our standard lining mesh and is made from 95% recycled material with no added chemicals.

HARSHMELLOW™ PRO/PLUS FOOTBEDS

Three separate compositions, Pro, Plus. and Base, now all incorporate K2's proprietary Harshmellow™ damping into the layup of the footbed. The result is superior vibration absorbing and comfort for all-day excursions into the backcountry or hiking and riding around the resort.

LASTING

K2 Snowboarding uses a 1-to-1 lasting system for every liner and shell throughout the entire collection. This ensures the customer will get the best possible fit when they put their foot into a K2 snowboard boot.

TRADITIONAL LAST

Our Traditional Last is based around a D Last with 11° of forward lean.

PERFORMANCE LAST

Our Performance Last is based around a D Last through the forefoot with a more performance-focused heel pocket, and also features 11° of forward lean.

WIDE LAST

Our Wide Last is based around an E & ½ Last with 11° of forward lean. Both shell and liner at 7mm wider than our traditional last and boot shell.

6 + 3 LAST

Unique to the Taro Tamai Snowsurfer shell, our 6+3 last features a more relaxed feel and is built to encourage turns. By reducing forward lean 6°, it provides a more upright feel, and it is met with 3° of medial lean that helps to bring the knees into the natural riding stance.

OUTSOLES

VIBRAM® ROLLSOLE OUTSOLE

Designed with mobility in mind, the Roll Sole™ Outsole aims at providing additional range-of-motion without sacrificing any support (thanks, Harshmellow™). This outsole is ergonomically shaped and allows riders additional maneuverability for next-level heelside carves and surf-style vibes.

VIBRAM® MOUNTAINEER OUTSOLE

The Mountaineer outsole is the first of its kind. An outsole designed specifically for snowboarding and the mountaineering that is required to get to those larger-than-life lines. With Vibram® rubber and a traditional lug design, this crampon compatible outsole is built to work with all the gear you need.

VIBRAM® V5 OUTSOLE

Vibram® V5 Outsole features a full EcoStep rubber (30% regrind) with and Harshmellow™ pods under the toe and heel to reduce noise underfoot. The V5 Outsole is the perfect combination of sustainability and performance.

THIS GRIPS!™ PREMIUM RUBBER OUTSOLE

A K2 exclusive built to offer the best possible performance at the lowest possible weight. An EVA midsole with Harshmellow™ pods makes this quiet underfoot, and a dual rubber compound provides unmatched grip for the parking lot and the boot pack.

THIS GRIPS!™ PREMIUM FREESTYLE OUTSOLE WITH HARSHMELLOW™

Premium dual-density rubber outsole featuring K2's proprietary This Grips™ Compound. Taking inspiration from modern skate footwear, our new cupsole outsole features a rounded heel for less drag while hiking, a wrapped arch for support and stability, and vibration damping Harshmellow™ in the heel and forefoot.

ROLLSOLE™ OUTSOLE

TheRollSole Outsole aims at providing additional range-of-motion without sacrificing grip or support. This outsole is keeps the overall weight of the boot down while offering extra mobility side to side.

RUBBER LIGHT OUTSOLE

Full rubber bottom for maximum grip and durability is matched with our impact absorbing Harshmellow™ technology - reducing fatigue and providing a quiet feel underfoot.

PHYLIGHT™ OUTSOLE

This EVA outsole offers a uniform flex and the durability of a rubber outsole in a lighter-than-light package.

LOW PRO OUTSOLE

A lightweight solid rubber cupsole that grips hard and lasts long.

CLICKER™ X OUTSOLE

The Clicker™ X outsole features exaggerated rocker for walkability and a full rubber outsole for both hikability and durability. Harshmellow™ is integrated in the midsole and is all securely layered around our Clicker™ X technology.
