FREESTYLE

From day one, LINE has been at the forefront of freestyle skiing, pushing boundaries and delivering progressive, innovative skis that redefine the sport. From the Chronic standing the test of time to the Blend's unmatched playfulness, to partnering with the King of Afterbang in creating the Tom Wallisch Pro, we've been crafting skis for those who seek creativity, style, and progression for decades. With legends like Tom Wallisch, Will Wesson, and Taylor Lundquist leading the charge, we've learned a thing or two about freestyle skiing—and we're nowhere close to slowing down.

BLEND

OVERVIEW:

Inspired by Will Wesson's ability to imagine new possibilities on his skis, the Blend maintains a similar DNA to its predecessors but served up in a purpose-built, improved package. Complete with 98mm waist width and leaning heavier into the freestyle space, the Blend has fully come to grips with what it has become over the seasons. A flexy freestyle jib stick that makes pressing and buttering second nature with reinforcements designed to handle the harshest elements of the streets.

BLEND TBL

OVERVIEW:

Taylor Lunquist's pro model ski, the LINE Blend TBL. Inspired by Taylor's unique style, grit, and determination to change the game forever, the Blend TBL represents the go-to ski for innovation, style, and creativity in the park and the streets. Available in a full-size run, the Blend TBL is just like its counterpart down to the 98mm waist width and reinforced chassis, with a graphic inspired by Taylor.

TOM WALLISCH PRO

OVERVIEW:

Introducing a new and improved Tom Wallisch Pro! Developed hand in hand with Wallisch, the TW Pro remains the definitive high performance park ski in our lineup. Now featuring our Bio-Resin tech, combined with Thick-Cut Sidewalls, Thin Tip, and a reinforced core construction, the new and improved Tom Wallisch Pro is ready for everything from late nights in the street to stomping big airs at World Cup events around the globe. Tom and our team have been testing this ski non-stop for the past 2 years, and we couldn't be more excited for this new era of the Tom Wallisch Pro.

HONEY BADGER

OVERVIEW:

Notorious for its strength, ferocity, and toughness, the LINE Honey Badger will tackle whatever you put in front of it. Jibs, Bonks, Jumps, Taps, it doesn't matter, the Honey Badger doesn't give a...well, you get the picture. The Honey Badger is the perfect package to crush it in the streets, park, and all over the mountain at an affordable price; it doesn't get much better than that.

ALL-MOUNTAIN FREESTYLE

A skier is captured in mid-air, performing a freestyle trick. The skier is wearing a dark jacket and light-colored pants, and is holding a ski pole. A rainbow is visible in the sky behind the skier. The background shows a snowy mountain slope with evergreen trees under a cloudy sky.

Staying true to LINE's core freestyle mindset, we wanted a collection of skis that could rip just as well inside the park as they could outside it; thus, the new lineup was born. Complete with an expanded range of Chronicles and Bacons, reinforced with all-new Thin Tips, Thick-Cut Sidewalls, and Bio-Resin, the all-mountain freestyle collection embodies skis designed to last longer, and instill creative freedoms and versatility from groomers, to park to powder and everything in between.

BACON 122

OVERVIEW:

Inspired by our athletes wanting a ski that will allow them to float, butter, and stomp in the deepest of deep, the Bacon 122 represents a game-changing full twin-tip freestyle powder ski. Complete with the Bacon Collection's superpowers of Thick-Cut Sidewalls, Thin Tips & Tails, and Bio Resin Tech, paired with an ample 122mm waist width, the Bacon 122 is ready to help you cruise through powder, butter down the fall line, land switch off backcountry booters, and have a damn good time while doing it.

BACON 115

OVERVIEW:

Featuring all of the bells and whistles of the Bacon 108 down to symmetrical flex and playful feel, the LINE Bacon 115 is ideal for anyone looking to add some freestyle flair to their powder skiing. Whether you're stepping up to Backcountry Booters like Tom Wallisch, pressing butters like Mitchell Brower & Taylor Lundquist, or ripping Powder like Dylan Siggers, the Bacon 115 is up to the task.

CHRONIC 101

OVERVIEW:

It's the Chronic 101, maaan! This versatile all-mountain freestyle ski features the same durability superpowers as its little brother down to the beefed-up sidewalls, tips, and core. For those wanting to take advantage of all the mountain has to offer in the morning, followed by afternoon hot laps in the park, the Chronic 101 is here for all-mountain freestyle enjoyment. Become part of the C crew and get after it on the Chronic 101.

MARKER GRIFFON

OVERVIEW:

The go-to binding for in-bounds freeride and freestyle skiing, for the 24/25 season we've teamed up with Marker to create a Chronic specific Griffon binding. Grab the binding that matches the hottest freestyle skis on the market and get ready to ski and destroy.

CONCEPTS

Open up a new world of possibilities with the concept collection. From the Blade to the Sakana and Pescado, the Concept Collection represents skis that break the mold of traditional ski design. These skis are unique iterations of how we believe you can have more fun going down the mountain. Whether you want to rip early morning groomers, slushy park laps, or endless pow days, there are no rules for riding the Concept Collection. These skis are designed to help you open new lanes of creativity on the mountain.

THE POISSON

TITANAL SHAPE - PRECISION MEETS PLAY

The Poisson's metal laminate merges the Blade's Gas Pedal Metal feel with the Optic's Overdrive tech-but stylized to match this ski's freeride DNA. A full strip of titanal underfoot locks in stability, while segmented flanges in the tip and tail free up the ski's flex for more energy and liveliness.

Underfoot: full metal = stability + confidence.

Tip/Tail: broken strips = flex + energy.

Subtle edge bias: adds grip without making the ski overly critical.

Result: the Poisson sits between the Optic and Blade in stability, giving you precision for hard charging, but a more forgiving, slash-friendly ride in variable snow.

STEP TAIL - THE SLASH TRIGGER

Borrowed from surfboard design, the Step Tail breaks the running surface at a defined point. That makes the tail easy to slash or release out of turns, while still leaving surface area behind the step for float in pow.

On firm snow: feels shorter, looser, playful.

In deep snow: feels longer, balanced, surfy.

This tail unlocks a ski that's equal parts carver and slasher, giving you the freedom to pivot, spray, or lock into a carve depending on the terrain.

ROCKER PROFILE - FLAT IS FAST

The Poisson runs a traditional early rise in the tip for smooth turn initiation and float. But instead of loading up camber underfoot, we kept it nearly flat. Why? Because camber would've made this aggressive sidecut feel too locked in. Instead, precision is handled by the titanal and pop is added back with uni-directional carbon stringers. The flat camber = rally car turns in soft snow.

In the tail, rocker stays minimal, letting you finish turns with a clean C-shape carve without feeling trapped.

UNI-CARBON STRINGERS - POP & ENERGY

With camber toned down, the Poisson utilizes carbon stringers to inject life.

They snap energy back into each turn, so the ski never feels dead, balancing the suspension of the titanal with the pop of carbon.

THE POISSON EXPERIENCE

Think of the Poisson as a freeride scalpel. It's not about pointing straight through terrain, it's about slicing across it with power, control, and style. On groomers it feels precise and responsive; in deep snow it loosens up into surfy slashes. Fast, fluid, and confidence-inspiring, this is the ski for freeriders who want it all.

POISSON

OVERVIEW:

"Pwa-sawn"

The Poisson doesn't pick sides—it rips both. We mashed the Gas Pedal Metal guts of the Blade with the swallowtail soul of the Sakana, then hacked in a surf-inspired Step Tail built to slash and drift on command. Knife it across a firm groomer and it locks in, point it down a claustrophobic shoot and it holds steady, drop it in deeper stuff and it breaks loose. Bomber. Slashy. Stupid-fun.

SAKANA

OVERVIEW:

"Sa-ka-na"

An icon gets rowdy. We took the surfy, swallowtail feel of the original Sakana and rebuilt it for skiers who hit rails, spin side-hits, and stomp in the park. Now with a slightly kicked-up tail for smoother switch landings—plus Thick-Cut Sidewalls, Bio-Resin, and Thin Tips for durability that shrugs off rails and laps for days. Same carve-weird, slash-happy energy. Just tougher. Just more freestyle.

BLADE

OVERVIEW:

The skis that will change how you rip down the mountain, the Blade is your go-to ski when you want to have a ridiculous amount of fun at the resort. A Gas Pedal Metal™ layup allows these skis to charge through any condition, while a super tight sidecut offers the ability to turn on a dime. Pair this with a surprising amount of playfulness, and you've got one set of skis that will empower you to ski weird, ski different, and ski #morefunner.

PESCADO

OVERVIEW:

The best powder ski on earth. Simple as that. Thanks to a swallowtail design, soft flex, and a massive shovel, the LINE Pescado floats through deep snow like a dream. A directional back-mounted stance allows the ski's tail to sink in deeper snow, thus raising the tip and giving you more control through the deepest of the deep, while the same concept allows the Pescado to carve groomers exceptionally well. Pick up the Pescado and experience one of the most innovative, unique, and insanely fun powder skis on the market.

THE OPTIC COLLECTION

Born from LINE's history of pushing freeride skiing in a new direction, the Optic Collection continues to break the mold of traditional metal-laminate ski design. These aren't your ordinary, dull metal laminate freeride skis. They're LINE Freeride skis, and they charge like a freeride ski but play like a freestyle ski, and with four different waist widths to choose from, including an all-new Optic 88, there's a lot to love about the Optic Collection. Complete with our unique Gas Petal Metal Overdrive™ layup, the Optic Collection was created for pedal to the metal ripping from the firmest of corduroy to the deepest of pow. Set your sights down the mountain, kick it into overdrive, and experience freeride through a new lens on the Optic Collection.

OPTIC 114

OVERVIEW:

For the anyone setting their sights on storm days and endless in-bounds powder laps, the Optic 114 is here to answer the call. Equipped with our Gas Pedal Metal Overdrive™ technology, paired with a refined rocker profile, attuned tapering, and functional waist width, the Optic 114 is a super stable stomp stick that will float through the deepest of deep and plow through crud. Kick it into overdrive and experience freeride through a new lens on the Optic 114

APRÈS BOOTIE 2.0

MULTI-PINK

SIZES:
XS, S, M, L, XL

SLIDE 1.0

BLACK

SIZES:
XS, S, M, L, XL

OVERVIEW:

Introducing the all-new Slide 1.0. For the days when the Apres Booties are just a bit too warm, the Slide 1.0 is here. Complete with a Z-Pull Nylon Strap, Quilted Top, and a Custom Moldable Sole, you can imagine how good slipping your foot into the Slide 1.0 after a long day on the hill will feel. Available in Black and White and Tan and Black.

SIZE	US(MENS)	US(WOMENS)	MONDO
